

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT.

TO THE RIGHT HON.

SIR WILLIAM VERNON HARCOURT, Q.C., M.P.,

Her Majesty's Principal Secretary of State for the Home Department.

GENERAL REGISTRY OFFICE OF BIRTHS, Etc.,

EDINBURGH, 25th March 1885.

SIR,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 and 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1884, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Twentieth Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1883.

Twelve deaths from Small-pox were registered during the year, which, although an increase upon the number of deaths from that disease during 1883, is still small, and is an indication of the efficient manner in which the Vaccination Act is carried out by the public throughout Scotland.

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

The Report now submitted affords an insight as to the particulars usually tabulated relative to the Births, Deaths, and Marriages registered in the various Registration Districts of Scotland during the year 1884.

With the General Annual Report is the Twentieth Report on Vaccination, containing all available information as to the administration of the Scottish Vaccination Act, and especially with reference to the vaccination of children born in Scotland during 1883.

The estimated population of Scotland at June 30th, 1884, was 3,866,521, of which number 1,868,325 were of the male, and 1,998,196 of the female sex. There were registered during the year the births of 129,041 live children, 75,128 deaths were recorded, and 26,061 marriages; hence for every hundred of estimated population there were 3·34 births, 1·94 deaths, and 0·67 marriages, all of which are seen, on reference to Table II.,

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1884, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

BIRTHS.

129,041 births were registered in Scotland during 1884, being at the rate of 3·34 per cent., or 334 for every ten thousand of estimated population. The number and proportion of births in each of the great Registration groups of districts into which the country is divided are found in Tables IV. and V. In the Principal Town districts 54,242 live births are registered, or 364 for every ten thousand of the inhabitants thereof; in the Large Town districts, they numbered 14,552, or 355 per ten thousand; in the Small Town districts, they are 27,380 or 333 per ten thousand; in the Mainland Rural districts, they are 29,642, or 292 per ten thousand; and in the Insular-Rural districts 3225, being in the proportion of 248 births per ten thousand of estimated population of the same. On comparing these numbers with the corresponding for 1883, it is seen that in each of the five districts there is an increase in the births, and, as occurred last year, the birth rate in the Principal Town districts is greater than that in the Large Town districts, falling throughout the others, being lowest in the Insular-Rural districts.

Of the total registered births, 10,466 were illegitimate, being in the proportion of 8·11 per cent. In the Insular-Rural group of districts the rate of illegitimacy was 5·8 per cent.; in the Large Town districts 6·7 per cent.; in the Principal Town districts 7·5 per cent.; in the Small Town districts 7·9 per cent.; and in the Mainland-Rural districts 10·3 per cent.

Table VI. presents the relative frequency of bastardy in the Geographical divisions and separate counties of Scotland during the year under review. While the percentage of illegitimacy throughout the whole country was 8·1, four of its divisions exhibited a ratio below this, and a like number above, the inhabitants of the North-Western division being least erring in this respect, with 6·2 per cent., and those of the West-Midland, with 6·3 per cent.; while on the other hand the Southern division showed a percentage of 13·6, and the North-Eastern of 14·0.

In but three counties was the proportion 5·0 per cent. or under, viz.,

TABLE III.—Births, Deaths, and Marriages in each of the Eight Divisions of Scotland during the Year 1884, and their Proportion to the Estimated Population.

Divisions.	Population estimated to middle of 1884.	BIRTHS.		DEATHS.		MARRIAGES.

Southern . .	211,453	5,829	2·75	3,770	1·78	1,113	0·53

Shetland, with 4·8 per cent.; Ross and Cromarty, and Dumbarton each with 5·0 per cent. In twelve counties it exceeded 10·0 per cent., the highest being Elgin, in which births of this nature constituted 15·1 per cent. of the whole, and Banff and Wigtown each with 15·9 per cent.

66,363 of the births being males, and 62,678 females, it follows the proportion of boys to girls was as 105·9 is to 100. In the Insular-Rural districts their proportion was about equal, 100·1 to 100, being most varied in the Mainland-Rural districts, where the boys born were to the girls as 106·5 to 100, and in the Principal Town districts, where it was 106·6 to 100.

Births occurred in largest number during the month of May, when 374 of them were registered per diem, followed by June with 373 daily, April with 369, July 360, September 356, October and December each with 354 daily, March 343, January 340, August 337, February 335, and November 333. The average number of births registered day by day was 352, males 181, females 171.

DEATHS.

75,128 deaths were reported to the Registrars throughout Scotland as having occurred during 1884, being in the proportion of 194 for every ten thousand of estimated population. This is considerably below that for last year, as also under the average for the last ten years, which is 208 per ten thousand of population.

From Table V. we find the highest mortality rate to have been in the Principal Town districts, where 229 per ten thousand succumbed; in the Large Town districts, the proportion was 201; in the Small Town districts, it was 181; in the Mainland-Rural districts it was 155; while in the Insular-Rural districts but 150 deaths in every ten thousand of their inhabitants were notified to the above.

The average number of daily deaths was greatest in December, when 256 were registered, whilst in August they were but 183. In October they were 189, in July 192, in June 193, in November 197, in September 198, in January 208, in February 210, in March 212, and in April 214. The average number of deaths registered day by day was 205.

MARRIAGES.

26,061 marriages were reported as having taken place in Scotland during 1884, being at the rate of 67 for every ten thousand of the estimated population. This is below that for last year, as also for the mean of the previous ten years, which in each case was the same, viz., 70 per ten thousand.

The marriage rate as usual varied much in each of the respective districts; thus in the Principal Town districts it was in the proportion of 82 marriages per ten thousand of the inhabitants estimated to be residing in them at the middle of the year; in the Large Town districts it was 70; in the Small Town districts 63; in the Mainland Rural districts 51; and in the Insular Rural 45. This, on being compared with last year, shows a considerable decrease in the rate in the Principal Town districts, and slightly in those of the Large Towns, while it is exactly the same in the Small Town and Mainland Rural districts; there being an increase in those of the Insular Rural.

The greatest number of marriages was celebrated in June, when

they occurred at the rate of 124 per diem ; the fewest took place in May, but 34 daily, increasing as follows for the other months : 48 in August, 53 in March, 54 in February and October, 55 in September, 63 in April, 76 in November, 83 in July, 99 in December, and 113 in January ; the average number of marriages registered daily throughout the year being 71.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The remainder of the Report is based upon the information received each month from the Registrars of Glasgow, Edinburgh, Dundee, Aberdeen, Greenock, Leith, Paisley, and Perth, which, when regarded as to the position, population, and surroundings of those towns, may be accepted as affording a tolerably fair estimate as to the conditions of the country at large in respect to the various matters here treated of.

BIRTHS IN THESE EIGHT TOWNS.

45,364 births were reported in them during the year, being at the rate of 362 per ten thousand of their inhabitants. The proportion varied in the different towns, being highest in Glasgow, where 397 children were born to every ten thousand of estimated population of that city ; followed by Greenock with 392 ; Paisley with 375 ; Dundee with 355 ; Leith 343 ; Aberdeen with 335 ; Perth with 307 ; and lastly Edinburgh with but 302.

The number of illegitimate births among those is 3639, or 8·02 per cent. of the total births. Aberdeen and Dundee show the largest proportion of such, viz., 10·3 and 10·0 per cents. respectively ; Perth comes next with 8·6 per cent. ; followed by Glasgow and Edinburgh, each with 7·9 per cent. ; Paisley with 6·6 per cent. ; Leith with 5·8 per cent. ; and Greenock with 4·7 per cent.

Of the total births in those towns, 23,469 were males, and 21,895 females ; the proportion of boys to girls was therefore 107·1 to 100.

DEATHS IN THESE EIGHT TOWNS.

29,228 deaths were registered in them during 1884, of which 14,670 were of the male, and 14,558 of the female sex, being in the proportion of 233 exits in every ten thousand of their estimated population.

From Table VIII. we see that Glasgow stands highest in respect of its death rate, viz., 269 per ten thousand of the estimated population of the same ; followed by Paisley with 259 ; Aberdeen with 220 ; Dundee with 207 ; Greenock with 205 ; Edinburgh and Perth each with 197 ; and lastly Leith, with 188.

A glance at Table IX. shows that, in the case of four of those towns, the death rate is below that for last year, in the other four being above it, and on comparing with the mean for the preceding ten years, in all cases but one has this rate diminished.

The subject of infantile mortality in those towns is considered in Table X., where we find the numbers and proportions of children who

died in each, at ages under 5 years. Thus in Glasgow, 87 out of every thousand children estimated to be under 5 years of age died thus early; in Paisley they number 78 per thousand; in Dundee 67; in Aberdeen 62; in Greenock 60; in Edinburgh 59; in Leith 58; and in Perth 46. On the other hand, in Leith the percentage of deaths under 5 years of

TABLE VIII.—Births, Deaths, and Marriages, and their Proportion to the Population, during the Year 1884, in each of the following Principal Towns of Scotland; Estimated Number of Unmarried Women and Widows between 15 and 45 years of age; also the Illegitimate Births, and their Proportion to the Total Births, and to the Number of possible Mothers.

TOWNS.	Population estimated to the middle of 1884.	BIRTHS.		Unmarried Women and Widows between 15 and 45.	ILLEGIT. BIRTHS.			DEATHS.		MARRIAGES.	
		Num-ber.	Per cent. to Pop.		Num-ber.	Per cent. to Total Births.	Percentage to Possible Mothers.	Num-ber.	Per cent. to Pop.	Num-ber.	Per cent. to Pop.
Glasgow . . .	517,941	20,553	3·97	68,347	1633	7·9	2·39	13,928	2·69	4935	0·95
Edinburgh . . .	246,703	7,469	3·02	41,478	590	7·9	1·42	4,863	1·97	2005	0·81
Dundee . . .	150,329	5,342	3·55	25,301	537	10·0	2·12	3,120	2·07	1204	0·80
Aberdeen . . .	111,242	3,733	3·35	15,970	385	10·3	2·41	2,455	2·20	873	0·78
Greenock . . .	72,621	2,848	3·92	7,315	135	4·7	1·84	1,493	2·05	458	0·63
Leith . . .	66,552	2,283	3·43	7,083	132	5·8	1·86	1,251	1·88	457	0·68
Paisley . . .	58,273	2,185	3·75	8,905	145	6·6	1·62	1,509	2·39	514	0·88
Perth . . .	30,946	951	3·07	4,509	82	8·6	1·82	609	1·97	246	0·79

age to the total deaths is 46·8; in Glasgow 44·2; in Dundee 43·2; in Greenock 43·0; in Paisley 40·5; in Aberdeen 38·5; in Edinburgh 36·6, and in Perth 28·9.

Table XI. indicates the percentage of deaths from each class of disease, and from the principal diseases, to the estimated population in each of the towns; and Table XII. exhibits the relative frequency of the various causes of death.

Thus it is seen that Miasmatic diseases proved fatal to 0·417 per cent. of the total estimated inhabitants of the Eight Towns, being 17·92 per cent. of the total deaths. In Glasgow 0·524 per cent. of the inhabitants died from diseases of a like nature; in Paisley 0·479; in Leith 0·357; in Aberdeen 0·356; in Dundee 0·348; in Edinburgh 0·326; in Greenock 0·285; and in Perth 0·241 per cent. To Miasmatics there was due in Glasgow 19·49 per cent. of the total deaths; 18·97 per cent. in Leith; 18·37 per cent. in Paisley; 16·78 per cent. in Dundee; 16·55 per cent. in Edinburgh; 16·15 per cent. in Aberdeen; 13·85 per cent. in Greenock; and 12·25 per cent. in Perth.

In Glasgow, 5·41 per cent. of all deaths was attributed to Hooping Cough; 3·05 per cent. to Scarlet Fever; 2·56 per cent. to Measles; 1·74 per cent. to Fevers, 1·44 being Typhoid and 0·23 Typhus; 1·26 per cent. to Diphtheria; and 0·09 per cent. (12 cases) to Small-pox; 3·33 per cent. being due to Diarrhœal affections.

In Edinburgh, 5·37 per cent. of the deaths resulted from Hooping Cough; 1·82 per cent. from Measles; 1·94 per cent. from Fevers, 1·53 being Typhoid and 0·39 Typhus; 1·51 per cent. from Scarlet Fever; 1·09 per cent. from Diphtheria; and 2·66 per cent. from Diarrhœa and Dysentery.

Paisley	7,841	611	7·79	40·5
Perth	3,851	176	4·57	28·9

In Dundee, 3·50 per cent. of the deaths are accredited to Hooping Cough; 2·92 per cent. to Measles; 1·90 per cent. to Diphtheria; and 5·46 per cent. to Diarrhœa and Dysentery; while but 0·55 per cent. are due to Fevers.

In Aberdeen, 5·00 per cent. are due to Hooping Cough; 3·89 per cent. to Measles; 1·56 per cent. to Diphtheria; 1·23 per cent. to Fevers, 0·33 being Typhus and 0·78 Typhoid.

In Greenock, Hooping Cough again heads the mortality, causing 3·65 per cent. of the deaths; Diphtheria has 1·55 per cent. ascribed to it, and Scarlet Fever 1·15 per cent.; Fevers causing 0·94 per cent., of which 0·61 is due to Typhoid; while to Diarrhœa there falls 3·97 per cent.

In Leith, 4·08 per cent. died from Measles; 3·36 per cent. from Hooping Cough; 2·32 per cent. from Fevers, Typhus 1·84, Typhoid 0·40; and from Diarrhœa 4·24 per cent.

In Paisley, 5·35 per cent. succumbed to Measles; 1·59 per cent. to Hooping Cough; 1·45 per cent. to Scarlet Fever; 1·78 per cent. to Croup; and 1·91 per cent. to Fevers, 1·65 of them being Typhoid; and to Diarrhœal affections 3·70 per cent.

TABLE XI.—Percentage of Deaths from different Diseases to the Population in each of Eight of the Principal Towns of Scotland during the Year 1884, allowing for the Causes not specified.

DISEASES CAUSING DEATH.	Total Eight Towns.	Glasgow.	Edinburgh.	Dundee.	Aberdeen.	Greenock.	Leith.	Paisley.	Perth.

In Perth, 2·32 per cent. of the mortality is accounted for by Hooping Cough; 1·49 per cent. by Diphtheria; 1·32 per cent. by Croup; and 3·81 per cent. by Diarrhœa and Dysentery.

In the whole group of the above Towns, the following mortality was ascribed to the more ordinary Miasmatics:—There were 1372 deaths from Hooping Cough, being 4·73 per cent. of the total deaths registered, and equal to 11 deaths in each ten thousand of the inhabitants living therein. Diarrhœa caused 960 deaths, or 3·31 per cent. of the total, being in the ratio of 7·7 in every ten thousand of population. Measles stands next in order, having caused 764 deaths, or 2·63 per cent. of the total, equal to a mortality of 6·1 in every ten thousand. Perth alone stands among those towns as having no deaths reported from this cause. Scarlet Fever follows, with 567 deaths, equal to 1·95 per cent. of all, and in the ratio of 4·5 deaths in every ten thousand of population; Perth again standing low, with but 2 deaths from this disease.

Fevers caused 458 deaths, 93 of these being Typhus, 347 Typhoid, and 18 Simple Continued, together equalling 1·58 per cent. of the total mortality, or 3·6 deaths in each ten thousand of estimated population.

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1884, allowing for the Causes of Death not specified.

But 2 fatal cases of Typhus occurred in each of the towns Dundee, Paisley, and Perth, and in all the towns, with the exception of Leith, Typhoid Fever was a more frequent cause of death than Typhus.

Diphtheria caused 380 deaths, or 1·31 per cent. of the mortality in these towns, equal to a death rate of 3 per ten thousand. Croup caused 251 deaths, or 0·86 per cent. of all deaths, or 2 in every ten thousand of population.

From Small-pox 12 deaths occurred, all in Glasgow, 1 being in February, 2 during March, 6 during April, 1 during May, and 2 during June. Of those, 3 were children under 5 years of age, 3 at ages between 5 and 20 years, 5 at ages between 20 and 60 years, and 1 over 60 years of age.

148 deaths are ascribed to Erysipelas; 142 to Syphilis; and 94 to Rheumatism.

To Cancer 679 deaths are attributed, equal to 2·34 per cent. of the total deaths, or 5·4 per ten thousand of population. Edinburgh, Perth, and Aberdeen apparently suffered in highest proportion from this malignant form of disease. To Dropsy 156 exits are put down, equal to 0·54 per cent. of the total mortality, or 1·2 deaths per ten thousand of population. From Gout but 3 deaths occurred, all in Edinburgh.

Diseases of a Tubercular nature caused 4558 deaths, or 15·70 per cent. of the total deaths, equal to 36·6 deaths per ten thousand of population. To Phthisis alone 3130 of these are due, 10·78 per cent. of the total mortality, or 25 deaths in every ten thousand of the inhabitants. Glasgow, Paisley, Dundee, and Greenock suffered most heavily from this fell disease, Leith and Perth being most lightly affected. There were 742 deaths from Hydrocephalus; 430 from Tabes; and 256 from Scrofula.

Diseases of the Brain and Nervous System accounted for 3394 deaths, being 11·69 per cent. of the total, and equal to a mortality of 27·2 in every ten thousand of population. In Perth, Greenock, and Aberdeen,

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1884, compared with the Mean of the Ten Years 1871-1880.

MONTHS.	YEAR 1884.			1871-1880.	
	Mean Temperature.	Actual Deaths.	Proportion to 12,000 per annum or 1000 per month.	Monthly Proportion of Deaths.	Mean Temperature.
January . . .	40°·3	6,452	1,031	1,154	37°·5
February . . .	39°·2	6,104	975	1,061	38°·6
March . . .	41°·0	6,559	1,047	1,138	40°·2
April . . .	43°·3	6,480	1,025	1,064	44°·2
May . . .	48°·6	6,545	1,045	1,040	48°·4
June . . .	54°·2	5,786	924	939	54°·7
July . . .	57°·3	5,964	958	921	57°·3
August . . .	58°·4	5,663	905	898	57°·3
September . . .	54°·2	5,928	947	834	52°·6
October . . .	46°·9	5,860	936	885	46°·5
November . . .	40°·2	5,898	942	949	40°·2
December . . .	36°·7	7,949	1,270	1,122	37°·0
YEAR . . .	46°·7	75,128	12,000	12,000	46°·2

we find the greatest mortality to the total deaths to have occurred. The percentage of deaths from this class of diseases is as follows: in Perth 16·89; in Greenock 13·78; in Aberdeen 13·69; in Edinburgh 12·57; in Paisley 12·56; in Dundee 11·25; in Glasgow 10·67; and in Leith 10·57. The deaths from the same, per ten thousand of population were 33·2 in Perth; 32·7 in Paisley; 30·2 in Aberdeen; 28·7 in Glasgow; 28·3 in Greenock; 24·8 in Edinburgh; 23·3 in Dundee; and 19·9 in Leith.

From Diseases of the Circulatory System, 1857 deaths are returned, being 6·40 per cent. of the total deaths, or equivalent to 14·9 deaths per ten thousand of population. Perth again leads the list with the heaviest proportional mortality from these, viz., 23·8 for every ten thousand of its estimated population; followed by Aberdeen with 16·9; Paisley being lowest with 10·8.

Deaths from Diseases of the Respiratory Organs, excluding Consumption, number 5799, constituting 19·98 per cent. of the total deaths, or 46·5 deaths for every ten thousand of the estimated inhabitants of those towns. The death rate per like number was, in Glasgow 58·7; in Paisley 45; in Aberdeen 43·2; in Dundee 39·8; in Edinburgh 37·7; in Greenock 34; in Perth 31·6; and in Leith 27·4. The percentage of deaths of this nature to the total deaths, is in Glasgow 21·83; in Aberdeen 19·60; in Dundee 19·16; in Edinburgh 19·15; in Paisley 17·25; in Greenock 16·55; in Perth 16·07; and in Leith 14·57.

Bronchitis proved fatal to 3307 individuals; Pneumonia to 1722; Pleurisy to 130, and Laryngitis to 126; while to Lung Disease of Unspecified Nature, 459 deaths are put down.

Diseases of the Digestive Organs (excluding Teething) caused 1583 deaths, being 5·45 per cent. of the total deaths, and 12·7 in every ten thousand of population. Paisley, Glasgow, and Aberdeen show the greatest proportional mortality from these.

From affections of the Urinary Organs 609 persons died, being 2·10 per cent. of the mortality from all causes. In Aberdeen, Edinburgh, and Glasgow, such causes of death were most telling; Leith standing lowest.

845 deaths are accredited to Premature Birth; 346 to Teething; and 119 to Malformations, as Spina Bifida, Cyanosis, &c.

To Uterine disease and Ovarian Dropsy 80 deaths are ascribed; to Puerperal Fever or Metria 102; and to other conditions incidental to child-bed 173.

Old Age is the assigned cause of death in 1087 cases, and Atrophy and Debility in 870.

The total deaths due to Violence number 955, or 7·7 deaths of this nature took place among every ten thousand of the inhabitants of the Eight Towns. In Greenock 5·07 per cent. of the total deaths come under this heading; in Dundee 4·18 per cent.; in Leith 4·00 per cent.; in Glasgow 3·32 per cent.; in Edinburgh 2·91 per cent.; in Aberdeen 2·54 per cent.; in Perth 2·32 per cent.; and in Paisley 1·65 per cent. 879 of those are Accidental; 65 are due to Suicide; 9 to Homicide; and 2 to Judicial Hanging. Intemperance caused 111 deaths, 21 of those being Delirium Tremens.

In the Eight Towns 71 persons died at the age of 90 and above, 20 of them being males, and 51 females; one of the latter was 101 years of age at her death.

MARRIAGES IN THE EIGHT TOWNS.

The marriages registered in the above Eight Towns during 1884 number 10,692, which allows of 80 marriages for every ten thousand of their inhabitants. From Table VIII. we see that the marriage rate varied much in the different Towns; thus in Glasgow it was 95 per ten thousand, in Paisley 88, in Edinburgh 81, in Dundee 80, in Perth 79, in Aberdeen 78, in Leith 68, and in Greenock but 63 for every ten thousand of its population. On comparing this Table with the one corresponding for 1883, it is apparent the marriage rate has fallen in each of these towns, with the exception of Perth, where there is a slight rise.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1884 are extracted from the Astronomer-Royal's Notes appended to the Monthly Reports issued by the Registrar-General:—

January was chiefly remarkable for the excessive range of its Barometric pressure, and the extra force of the wind connected therewith; remarkable also in the second degree for the prevalent West, or

TABLE XIV.—Meteorology of Scotland for 1884, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1884.

rather W.S.W. direction of the wind, the heavy rainfall, the high mean temperature, and the small humidity of the air.

February was generally mild and favourable, with a high mean temperature, and if with extra rainfall, yet with drier air than usual, and if with extra wind force, still its direction preponderating from the South.

March was on the whole extremely favourable, with a high mean temperature, a fair amount of rain, wind, barometric range, and humidity, and the direction of the wind mainly southward.

April was characterised by a rather low barometric pressure with small range, rather low mean temperature, little humidity, small rainfall, little strength of wind, and that more than usually from the E.S.E.

The barometric pressure for *May* was less than the average, and the barometric monthly range considerably greater; and the mean temperature slightly below the average.

June was characterised by high barometric pressure, with small range, mean temperature somewhat below the average, though higher than it had been in the same month for three years previously, low humidity and small amount of rainfall.

July was characterised by a low barometric pressure, low mean temperature, rather more humidity, but much greater depth of rainfall than the average, with a greater number of days of falling, and a peculiar prevalence of south-easterly winds.

Notwithstanding several violent thunder and lightning storms, the month of *August* was unusually fine, the barometrical pressure above the usual height and very steady, the mean temperature higher than the average, and forming the culmination of this year's monthly

mean temperature. At the same time the air was drier, the depth of rainfall less, the number of its days of falling less, the strength of wind less, and its southerly direction over northerly more than the average.

The month of *September* was also favourable, though not to the same high degree. The barometric pressure was high, the mean temperature $1^{\circ}2$ above the average, and though the number of days on which rain fell was rather greater, the amount of rainfall was less, and if the strength of the wind was greater, there was less of the northerly element in it.

October had a mild temperature, very large fluctuations in the height of the barometer, extra force of wind, and superabundant westerly direction thereof.

November was chiefly characterised by a high barometric pressure, and that having been accompanied by a prevailing direction of west wind, a rather higher mean temperature, and less of both humidity, rain-fall depth, and number of days of falling. The month was more favourable than in the average of past years.

December had rather a low barometric pressure, and was rather a cold month, but otherwise very nearly approached the average of former years in each important climatological particular.

Tables XIII. and XIV. afford some information as to the Meteorological phenomena, as reported month by month, which had characterised the weather in the Eight Towns, Glasgow, Edinburgh, Dundee, Aberdeen, Greenock, Leith, Paisley, and Perth; and for comparison sake there is added a column giving the mean temperature for each month for the decennial period 1871-80. A glance at Table XIII. shows that for four of the months, April, June, July, and December, the mean temperature

during 1884 is slightly under that of the mean for the same months during the 10 years; that for November it is the same; and that the mean temperature for the other months during 1884 was somewhat higher than that of the mean for the years 1871-80.

Table XV. indicates the heaviest daily death roll in these towns to have occurred during April, May, November, and particularly so during December, being closely connected with the before-mentioned meteorological conditions: it was smallest during August, July, and March. From the Table we also gain an insight as to the varying number of deaths from the more important Miasmatics, and different orders of disease, as they occur month by month in the Eight Towns.

12 deaths from Small-pox were registered during the year, 1 occurring in February, 2 in March, 6 in April, 1 in May, and 2 in June. Measles caused a rise in the mortality during April, May, and June, falling until October, increasing again greatly during November and December, when 103 and 149 deaths were due to it. The mortality

TABLE XVII.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1884, and Proportion at each Age in every Hundred Deaths per Month.

YEAR	12,437	3,030	8,766	5,471	29,704	12,000

from Scarlet Fever fell gradually during the early months of the year, but showed a decided increase in August, and remained higher during the remaining than during the earlier months. Diphtheria followed much the same line, but fluctuated a little more. Hooping Cough gradually rose as a cause of death from January to June, and fell in the same way until December, when there was a rapid rise in the number of registrations. Croup fell steadily from January to August, when but 8 deaths are reported from it, rising again until December, when 34 are placed to its credit.

Fevers fluctuated between January and August, rising rapidly in September and October, falling again in November, but to rise in December.

Diarrhœa caused its highest mortality during July, 140 deaths, August 206, September 184, falling in October to 87, and still farther during November and December.

Consumption, at all times causing many deaths, stood most prominently forward during April, May, June, July, and December, least so in September. Diseases of the Respiratory Organs, as Bronchitis, Pneumonia, Laryngitis, &c., being much influenced by changes of temperature and inclement weather, we find that in the colder months at each end of the year, the number of deaths from those affections are at their maximum, falling much during the warmer weather of summer and early autumn; and much the same thing happens to those suffering from Cardiac Disease and Brain affections, many of which, as Apoplexy, are due to pathological changes occurring in the blood-vessels resulting in their rupture within the brain, with destruction of its tissues and death.

So with Old Age; it is well known to the readers of obituary notices in our daily newspapers, how with an advent of cold weather the number of deaths at advanced ages markedly increase, which is fully borne out by an examination of such Tables as the one under consideration.

In conclusion, we would point to Tables XVII. and XVIII. as giving some idea as to the monthly mortality experienced at each of the four periods of life in those Eight Towns. This among children under 5 years of age was greatest during December, November, September, and April; it was at a minimum during January.

Adolescents suffered in greatest numbers during May and December, September and April, while during the month of August the smallest number of deaths at ages between 5 to 20 appear in the Table.

Adults, which include all between 20 and 60, died in largest number during December, April, February, and January; their minimum being during August.

Aged persons, or those who had reached the age of 60 and above, suffered most in December, January, March, and April, and least during August.

It is thus again seen that December, which showed the lowest range of mean temperature of the twelve months, also affords the heaviest death roll.

The mortality amongst the inhabitants of those towns month by month was greatest during December, gradually diminishing in the others as follows:—April, November, May, February, January, September, March, June, July, October, and August.

TWENTIETH ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1883.

The Vaccination returns for the year 1883 show that of the 124516 children born in Scotland during that year, 108906 were successfully vaccinated, being in the proportion of 87·463 per cent. of the whole. In 1884 cases, or in 1·513 per cent., vaccination was postponed on medical

authority when the return was made up at the close of the year; 194 children, or 0·156 per cent., were certified to be unfit for vaccination from constitutional insusceptibility; 365 children, or 0·293 per cent., were insusceptible from previous successful vaccination; and 2 children were insusceptible from having already had Small-pox. 10713, or 8·603 per cent. of the children born, died before vaccination; and 2452 children, or 1·970 per cent., were removed from the district in which they were born before vaccination, or from some other cause they were unaccounted for. The number of postponed cases still continues to increase. In 1882 the number of births was 126162, and of postponements 1713, while in 1883, with 124516 births, the number of postponements was 1884, or 576 above the average for the previous ten years (Table XIX.).

Particulars relative to children who died before vaccination are omitted in Table XX., and the proportion shown of the children living at the age of six months, who were protected by vaccination. From this Table it appears that of 113803 children who were living at the age of six months, 108906 or 95·697 per cent. were stated to have been successfully vaccinated. In 1884 cases, or 1·655 per cent., vaccination was postponed. In 194 cases, or 0·170 per cent., the children were certified to be constitutionally insusceptible of vaccination; 2, or 0·002 per cent., were insusceptible from having had Small-pox; and 365, or 0·321 per cent., were insusceptible from previous successful vaccination. In 2452 cases, or 2·155 per cent., certificates of successful vaccination had not been returned to the Registrars.

TABLE XX.—Vaccinations in Scotland, 1873–1883, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

Total	12	100.00	3657	100.00	5415	100.00

In Table XXI. is given the number of Small-pox deaths for each year from 1855 to 1884, the numbers for the last two years being estimated. In 1884 Small-pox caused 12 deaths in Glasgow, these being the only deaths from this disease in any of the towns for which particulars are given in the Registrar-General's Monthly Reports.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

STATISTICAL DEPARTMENT,
17th March 1885.

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus :—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals, thus :—CARLUKE.
N.B.—An asterisk (*) is prefixed to those Districts which comprise one or more Parishes or parts of Parishes, and the component parts of these Districts will be found at page 80.
A dagger (†) is prefixed to those Districts which consist of only a part of the Parish of the same name.
* Vaccination Return not received.

No. of District.	REGISTRATION DISTRICTS.	REVISED POPULATION.		BIRTHS, DEATHS, AND MARRIAGES, 1884.			VACCINATIONS, 1883.					
		Census 1871.	Census 1881.	Births.	Deaths.	Marriages.	In susceptible of Vaccine Disease.	Vaccination Postponed.	Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.	Total Births for 1883.	
							On the ground of previous Successful Vaccination.	In respect of the Children having already had Small-pox.	On the ground of Constitutional Insusceptibility.

33. WIGTOWN.

APPENDIX.

VACCINATIONS, 1883.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

2. ORKNEY.

28. SANDAY.—Obstruction in the working of the Act occurred in consequence of change of Vaccinator, the former having left before the one presently acting had entered on his duties.

31. STRONSAY.—The age at which children have to be vaccinated has been changed by the Board of Supervision from six to twelve months.

4. SUTHERLAND.

53. LAIRG.—Vaccination well attended to. A child has been removed from the parish, and though said to be successfully vaccinated no certificate has been sent to me.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

67. GLENSHIEL.—Vaccination complete from 1864 to 1883.

74. LOCHALSH.—Of the eight entered in column 7 one is the child of a gentleman now in England, but the remaining seven are resident in the parish, most of whom, if not all, have been vaccinated, although certificates to that effect have not been sent in.

75. (1) LOCHBROOM.—Vaccination remarkably well attended to by all parties.

Insular.

86a. BARVAS.—The Medical Officer having died in July last, and no appointment of a successor made, accounts for the large number of unvaccinated.

6. INVERNESS.

Mainland.

90b. ALVIE.—Infant mortality has been high. Three of those who died before vaccination were triplets.

92. (1) BOLESKINE.—Vaccination Act works well. Frequent changes of medical men prevents some children from being attended to within the prescribed time.

94. CROY AND DALCROSS.—Notices of default have to be sent to a large proportion of the parents, but with very unsatisfactory results.

The excuse is frequently made that the children have been vaccinated but no certificates received.

104. LAGGAN.—The case of postponed vaccination is caused by the continued ill health of the child. Although the parents are travelling tinkers, they have rigidly fulfilled the requirements of the Act. This is the fifth postponement.

Insular.

111. (2) SOUTH HARRIS.—A mild type of Hooping-Cough was prevalent in certain parts of the district, which in all probability has retarded the progress of the Vaccinator, consequently an abnormal number remain unvaccinated.

118. (1) BENBECULA.—There are five defaulters, but some of these are on detached islands, and expect to have their children vaccinated shortly.

III. NORTH-EASTERN DIVISION.

8. ELGIN (OR MORAY).

129. DALLAS.—The entry in column 7 is that of a hawker's child whose vaccination was for a time postponed, but no trace of the parties can now be found.

136. NEW SPYTNIE.—Entry in column 7 is of the child of vagrants, and was born in Poor-house; the address given by the parents at registration having failed to find them. The deaths of infants both before and after vaccination were unusually numerous in 1883 and the beginning of 1884.

10. ABERDEEN.

183. CRATHIE AND BRAEMAR.—Vaccinations well attended to. The number of Deaths before vaccination is above the average, but no reason can be assigned therefor.

IV. EAST-MIDLAND DIVISION.

12. FORFAR.

288. FORFAR.—Act works well, but the period in which certificates are returned to the Registrar ought to be shortened, as this is a fruitful cause of many postponements.

V. WEST-MIDLAND DIVISION.

17. STIRLING.

476. (2) HAGGS.—Consequent on dull trade a number of removals have taken place in the course of the year. Of the five entries in column 7, four are of children of families whose whereabouts at present have not been ascertained.

19. ARGYLL.

Mainland.

515. KILBRANDON AND KILCHATTAN.—The large number of postponements arose in consequence of an epidemic of Measles.

Insular.

551. (1) TYREE.—The Registrar has good grounds for believing that nearly all the eight cases unaccounted for are vaccinated, although the certificates have not been sent in.

VI. SOUTH-WESTERN DIVISION.

22. Ayr.

590. (2) TROON.—Considerable difficulty is still experienced by the Registrar in getting

parents to vaccinate within the prescribed time, which might be obviated by paying the Vaccinator a small fee, in which case he would remind parents of their duty.

597. KILMARNOCK.—The Registrar has never had a direct refusal to comply with the Act, though there are occasional grumblers. The one difficulty is the tracing of those who leave the parish, specially in the case of illegitimates and persons whose occupations lead them to change, such as coal miners.

610. OLD CUMNOCK.—Of the two cases entered in column 7, one is of the child of a Congregational Minister who is now resident in Edinburgh, and whose refusal to vaccinate was noted in the last Return. He was fined by the Sheriff of Ayrshire at the instance of the Parochial Board of this Parish, in March last, and no certificate of vaccination has yet been received.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

686. FALA AND SOUTRA.—Hooping-Cough and Bronchitis prevalent, which accounts for two cases being still postponed.

**CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).**

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
15	Eday and Pharay	Part of Stronsay and Eday.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
376	Keiss	Parts of Canlsbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Rest of Applecross and part of Gairloch.
596	Carnoch	Parts of Contin, Fodderty, and Urray.
716	Kinlochluichart	Parts of Contin, Fodderty, and Urray.
866	Carloway	Parts of Lochs and Uig.
87	Lochs	Parts of Lochs and Uig.
112	Kilmuir	(1) Part of Kilmuir; (2) Rest of Kilmuir and part of Snizort
135	Elgin	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
152	Enzie	Parts of Beilie and Rathven.
1556	Glenrinnnes	Parts of Aberlour and Mortlach.
167	Seafeld	Parts of Cullen and Rathven.
2106	Kinninmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick, Tullich, and Glengairn.
2226	Millbex	Parts of Fyvie and Monquhiltter.
2276	New Pitsligo	Parts of Aurdour, New Deer, Strichen, and Tyrie.
2376	Savoch	Parts of Eilon, New Deer, Old Deer, and Tarvas.
240	Strathdon	Strathdon, and part of Tarland.
2496	Ythan Wells	Parts of Auchterless and Forgue.
272	Arbroath	Arbroath, and part of St Vigeans.
282	Dundee	Dundee, and part of Liff, Benvie, and Invergowrie.
294	Kettins	Kettins and part of Scone.
297	Kinnettles	Kinnettles and part of Caputh.
324	Aberfeldy	Parts of Dull, Fortingall, Kenmore, Logierait, and Weem.
331	Balquhiddier	Balquhiddier, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Parts of Caputh and of Dunkeld and Dowally.
355a	Fortingall	(1) Parts of Fortingall and Weem; (2) Part of Fortingall.
355b	Foss	Part of Dull.
360	Kenmore	Parts of Kenmore and Weem.
361	Killin	Parts of Kenmore, Killin, and Weem.
367	Kinloch-Rannoch	Parts of Fortingall and Logierait.
375	Logiealmond	Parts of Fowls-Wester, Little Dunkeld, Methven, Monzie, and Redgorton.
379	Meigle	Meigle, and part of Coupar-Angus. [Kinloch, and Rattray.
386b	Persie	Parts of Alyth, Bendochy, Blairgowrie, Caputh, Kirkmichael, Lethendy and
387	Perth	Perth, and parts of Kinnoull, Scone, and Tibbermore
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol, Dull, and Mouhn.
402	Anstruther-Easter	Anstruther-Easter and part of Kilrenny.
417	Crail	Part of Crail and May Island.
423	Dunbog	Dunbog, and parts of Abdie and Flisk.
424	Dunfermline	Parts of Dunfermline and Inverkelthing
425	Dunino	Dunino and part of Crail.
432	Inverkelthing	Parts of Inverkelthing and Dunfermline.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorn.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
490	Stirling	Stirling, and part of St Ninians.
493	Bonhill	Bonhill, and part of Dumbarton.
496	Dumbarton	Parts of Cardross and Dumbarton.
506	Ballachulish, etc.	Part of Kilmalie.
509	Cumlodden and Minard	Parts of Glassary and Glenaray.
513	Inveraray	Inveraray and part of Glenaray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura. [of Kilchrenan and Dalavich.
517	Kilchrenan	(1) Parts of Kilchrenan and Dalavich, and of Glenorchy and Inishall; (2) Rest
526	Lochgillhead	Parts of Glassary and South Knapdale.
529	Muckalrn	Parts of Ardcattan and Muckalrn, and of Glenorchy and Inishall.
535	Tarbert	Parts of Kilcalmonell and Kilberry, of Saddell and Skipuessa, and of South
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny. [Knapdale.
542	Kilfinichen and Kilvickeon	Parts of Kilfinichen and Kilvickeon, and of Torosay.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Torosay.
547	Portnahaver	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and of Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
556	Lochranza	Parts of Kilbride and of Kilmore.
557	North Bute	North Bute, and part of Rothesay.
572	Neilton	(1) Part of Neilton; (2) Rest of Neilton and part of Abbey.
573	Paisley	High, Middle, and Low Church Parishes, and parts of Abbey and of Renfrew.
576	Ardrossan	(1) Parts of Ardrossan and of West Kilbride; (2) Rest of Ardrossan.
578	Ayr	Ayr, and parts of Newton-upon-Ayr, and of St Quivox.
584b	Crosshill	Parts of Kirkmichael, Kirkcswald, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
612	St Quivox, etc.	Parts of Newton-upon-Ayr, and St Quivox.
626b	Calderhead	Parts of Cambusnethan and Shotts.
644	Glasgow	City of Glasgow, including Gorbals and parts of Barony and Govan
670	Queensferry	Queensferry, and part of Dalmeny.
684	Portobello	Parts of Duddingston and South Leith. [ton, and North Leith and South Leith.
685	Edinburgh	City of Edinburgh, Canongate, and parts of St Cuthberts, Duddingston, Liber-
690	Kirknewton & East Calder	Kirknewton and East Calder, and part of Kirkliston. [ton.
692	Leith	(1) Parts of Cramond, North Leith, and St Cuthberts; (2) Parts of North
698b	Stobhill	Leith, St Cuthberts, and South Leith.
744	Caddonfoot	Parts of Borthwick, Cockpen, Newbattle, and Temple.
766	Lathope	Parts of Galashiels, Selkirk, Yarrow, Innerleithen, and Stow.
787b	Kirkcubbin	Part of Melrose.
794	Kirkcubbin	Parts of Jedburgh, Oxnam, and Southdean.
812b	Brydockkirk	Kirkcubbin and part of Cavers.
833b	Wanlockhead	Parts of Annan, Cummerterres, and Hoddum.
857b	Bargrennan	Part of Sanguhar.
862	Corsockbridge	Parts of Minnigaff (Kirkcudbright) and of Penninghame (Wigtown).
864	Dalbeattie	Parts of Balmaclellan, Kirkpatrick-Durham, and Parton.
899	Stranraer	Part of Urr.
		Stranraer, and parts of Inch and Leswalt.

LIST of REGISTRATION DISTRICTS which include BURGHS, or TOWNS of 2000 Inhabitants, and upwards, or parts thereof, bearing a different name from the Districts in which they are situated.

No.	Registration Districts.	Burghs.	Towns.
80	Rosemarkie	* Fortrose.

494	Cardross		* Renton.
500	New or East Kilpatrick		* Milngavie.
503	Row		* Helensburgh.
523	Kilmore and Kilbride	* Oban.	
559 ³	Abbey		Johnstone.
560	Cathcart		(Busby.
562	Eastwood		Suburban of Glasgow (Crosshill).
564	Greenock, East	Port-Glasgow.	* Pollokshaws and Thornliebank.
571	Mearns		Busby.
576 ¹	Old Ardrossan		Saltcoats.
577	Auchinleck		Cumnock.
593	Galston		Newmilns.
597	Kilmarnock		Hurford.
603	Loudoun		Galston and Newmilns.
611	Riccarton	Kilmarnock.	Hurford.
613	Sorn		* Catrine.
615	Stevenston		Saltcoats.
621	Avondale		* Strathaven.
622 ¹	Maryhill		Suburban of Glasgow (Maryhill and
622 ²	Shettleston		Suburban of Glasgow (Shettleston and
622 ³	Shettleston		{ part of Tollcross).
624	Blantyre		Tollcross.
625 ¹	Bothwell		Stonefield.
628	Cambusnethan		* Bellshill, Uddingston and Mossend.
639	Dalziel		* Newmains and Wishaw.
643	East Kilbride		Motherwell.
644 ¹	Glasgow (Hutchesontown)		Busby.
644 ¹³	Glasgow (Gorbals)		Suburban of Glasgow (Govanhill and
644 ¹⁴	Glasgow (Kinning Park)		{ Pollockshields, and Strathbungo).
646 ¹	Govan		Suburban of Glasgow (Pollockshields,
646 ²	Partick		{ Strathbungo, and Kinning Park)
647	Hamilton		Suburban of Glasgow (Govan). (head).
651 ²	New Monkland (Landward)		Suburban of Glasgow (Partick and Hill.
652	Old Monkland		Larkhall and Motherwell.
	(1) Western District		Suburban of Airdrie.
	(2) Middle District		Bailliestone, and Tollcross.
	(3) Eastern District		Coatbridge and Rosehall.
654	Rutherglen		Do. do.
664	Carriden		Cambuslang.
672	Uphall		Borrowstounness.
673 ²	Fauldhouse		Broxburn.
676	Cockpen		* Crofthead.
689	Inveresk	* Musselburgh.	Bonnyrigg.
691	Lasswade		
727	Ayton		Penicuik, Loanhead.
776 ⁵	Ladhope	Galashiels.	Eymouth.
810	Wilton	Hawick.	
813 ⁵	Brydekirk	Aunan.	
820	Dryfesdale		Lockerbie.
863	Crossmichael		Castle Douglas.
868	Kells	* New Galloway.	
869	Kelton		Castle Douglas.
876	Minnigaff		Newton-Stewart.
880	Terregles	Dumfries.	
882	Troqueur	Do.	
895	Penninghame		Newton-Stewart

INDEX TO THE DISTRICTS.

*The Figures refer to the Numbers of the Districts in the preceding Tables of Births, Deaths, and Marriages, these being numbered consecutively from 1 to 901.**

Abbey, . . . 559	Airdrie, . . . 651	Alness, . . . 57	Alva (Stirling), 470	Alvah (Banff), 146	Alves, . . . 125	Alvie, . . . 90	Alyth, . . . 328	Ancrum, . . . 780	Anderston, . . . 644	Annan, . . . 812	Anstruther-E., 402	Anstruther-W., 403	Anwoth, . . . 855	Appin, . . . 525	Applecross, . . . 58	Applethorpe, 813	Arbirlot, . . . 271	Arbroath, . . . 272	Arbuthnott, . . . 250	Ardchattan, . . . 504	Ardclach, . . . 120	Ardersier, . . . 81	Ardnamurchan, 505	Ardoch, . . . 328	Ardrossan, . . . 576	Arisaig, . . . 505	Armadaile, . . . 662	Arngask, . . . 404	Arrochar, . . . 492	Ashkirk, . . . 781	Assynt, . . . 44	Athelstaneford, 703	Auchindoir, . . . 172	Auchinleck, . . . 577	Auchterarder, 329	Auchterderran, 405	Auchtergaven, 330	Auchterhouse, 273	Auchterless, . . . 173	Auchtermuchty, 406	Auchtertool, . . . 407	Auldearn, . . . 121	Avoch, . . . 59	Avondale, . . . 621	Ayr, . . . 578	Ayton, . . . 727	Baldernock, . . . 471	Balfron, . . . 472	Ballachulish and Corran of Ard-gour, . . . 506	Ballantrae, . . . 579	Ballingry, . . . 408	Balmacellian, 856	Balmaghie, . . . 857	Balmerino, . . . 409	Balquhider, . . . 331	Banchory-Devenick, . . . 251	Banchory-Ternan, . . . 252	Banff, . . . 147	Bannockburn, 488	Bargrennan, . . . 857	Barony, . . . 622	Barr, . . . 580	Barra (Inverness), . . . 108	Barrhead and Levern, . . . 572	Barrhill, . . . 582	Barry (Forfar), 274	Barvas, . . . 86	Bathgate, . . . 662	Beath (Fife), . . . 410	Bedrule, . . . 782	Beith (Ayr), . . . 581	Belhelvie, . . . 174	Bellie, . . . 126	Benbecula, . . . 118	Bendochoy, . . . 332	Benholm, . . . 253	Bernera, . . . 111	Bervie, . . . 254	Biggar, . . . 623	Birnie, . . . 127	Birsay, . . . 13	Birse, . . . 175	Blackford, . . . 333	Blackfriars, . . . 644	Blair-Athol, . . . 334	Blairgowrie, . . . 335	Blantyre, . . . 624	Blythswood, . . . 644	Boddam, . . . 232	Boharm, . . . 123	Boisdale, . . . 118	Boleskine, . . . 92	Bolton, . . . 704	Bonar, . . . 46	Bonhill, . . . 493	Borgue, . . . 858	Bo'ness, . . . 663	Borthwick, . . . 674	Bothkennar, . . . 478	Bothwell, . . . 625	Botriphnie, . . . 148	Bourtie, . . . 176	Bowden, . . . 783	Bower, . . . 34	Bowmore, . . . 536	Boyndie, . . . 149	Bracadale, . . . 109	Brechin, . . . 275	Bressay, . . . 1	Bridgeton, . . . 644	Brodick, . . . 553	Broughton, . . . 758	Brydekirk, . . . 813	Buchanan, . . . 474	Buckhaven, . . . 459	Buittle, . . . 859	Bunkle and Preston, . . . 728	Burntisland, . . . 411	Burra & Quarff, 1	Cabrach, . . . 177	Cadder, . . . 626	Caddonfoot, . . . 774	Caimey, . . . 178	Calderhead, . . . 626	Callander, . . . 336	Calton, . . . 644	Cambuslang, . . . 627	Cambusnethan, 628	Cameron, . . . 412	Camachie, . . . 644	Campbeltown, 507	Campsie, . . . 475	Canisbay, . . . 35	Canonbie, . . . 814	Canongate, . . . 685	Caputh, . . . 337	Cardross, . . . 494	Carreston, . . . 277	Cargill, . . . 338	Carlawerock, . . . 815	Carlaway, . . . 86	Carlisle, . . . 692	Carmichael, . . . 630	Carmunnock, . . . 631	Carmylie, . . . 276	Carnbee, . . . 413	Carnock (Ross), 59	Carnock (Fife), 414	Carnwath, . . . 632	Carriiden, . . . 664	Carrington, . . . 675	Carstairs, . . . 860	Carstairs, . . . 633	Castleton, . . . 784	Cathcart, . . . 560	Cavers, . . . 785	Cawdor, . . . 122	Ceres, . . . 415	Channelkirk, . . . 729	Chapel-of-Garioch, . . . 179	Chrnside, . . . 730	Clackmannan, 466	Clatt, . . . 180	Cleish, . . . 460	Closeburn, . . . 816	Clunie (Perth), 339	Cluny (Aber'd'n), 181	Clyne, . . . 45	Cockburnspath, 731	Cockpen, . . . 676	Coigach, . . . 75	Coldingham, . . . 732	Coldstream, . . . 733	Colinton, . . . 677	Coli, . . . 551	Collace, . . . 340	Collessie, . . . 416	Colmonell, . . . 582	Colonsay, . . . 539	Colvend, . . . 861	Comrie, . . . 341	Contin, . . . 60	Cookney, . . . 258	Corsack-Bridge, 862	Corstorphine, . . . 678	Cortachy & Clova 278	Coull, . . . 182	Coupar-Angus, 279	Covington and Thankerton, 634	Coylton, . . . 583	Craig, . . . 280	Craigie, . . . 584	Craignish, . . . 508	Craik, . . . 417	Crailing, . . . 786	Cramond, . . . 679	Cranshaws, . . . 784	Cranston, . . . 680	Crathie and Braemar, 183	Crawford, . . . 635	Crawfordjohn, 636	Creich (Fife), . . . 418	Crichton, . . . 681	Creich (Sutherland), . . . 46	Crieff, . . . 342	Crimond, . . . 184	Cromarty, . . . 61	Cromdale and Advie, . . . 128

* The actual number of Districts is 1043—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Crosshill, . . . 584	Dunlop, . . . 591	Forgan, . . . 431	Harray, . . . 18	Kilchoman, . . . 540
Crossmichael, . . . 363	Dunnet, . . . 86	Forgandenny, . . . 353	Harris, . . . 111	Kilchrenan, . . . 517
Croy & Dalcross, . . . 94	Dunnichen, . . . 283	Forglen, . . . 154	Hawick, . . . 789	Kilconquhar, . . . 436
Cruden, . . . 185	Dunning, . . . 350	Forgue, . . . 194	Heriot, . . . 683	Kilcreggan, . . . 502
Callen, . . . 150	Dunnottar, . . . 255	Forres, . . . 137	Hobkirk, . . . 790	Kildalton & Oa, . . . 541
Calross, . . . 343	Dunoon, . . . 510	Fort-Augustus (or Abertarf), . . . 92	Hoddom, . . . 829	Kildonan, . . . 52
Calsamond, . . . 186	Dunrossness, . . . 3	Forteviot, . . . 354	Holm & Paplay, . . . 19	Kildrummy, . . . 208
Calter, . . . 687	Duns, . . . 735	Forth, . . . 632	Holytown, . . . 625	Kilfinan, . . . 518
Caults, . . . 419	Dunscore, . . . 822	Fortingall, . . . 355	Hollywood, . . . 830	Kilfinichen and
Cambernauld, . . . 495	Dunsyre, . . . 642	Fortrose, . . . 80	Houston and	Kilvickeon, . . . 542
Cumbrass, . . . 552	Durness, . . . 48	Foss, . . . 355	Killellan, . . . 565	Killean and
Cumlodden and	Duror, . . . 525	Fossoway and	Howmore, . . . 118	Kilchenzie, . . . 519
Minard, . . . 509	Durris, . . . 255	Tulliebole, . . . 461	Hownam, . . . 791	Killearn, . . . 432
Cummertrees, . . . 817	Durrisdeer, . . . 823	Foula, . . . 12	Hoy & Graemsay, . . . 20	Killearnan, . . . 68
Capar, . . . 420	Duthil, . . . 96	Foulden, . . . 741	Humbie, . . . 710	Killin, . . . 361
Carrie, . . . 682	Dyce, . . . 190	Foveran, . . . 195	Hume, . . . 744	Kilmadock, . . . 362
	Dysart, . . . 426	Fowlis-Easter, . . . 356	Hantly, . . . 202	Kilmalcolm, . . . 569
		Fowlis-Wester, . . . 357	Hutchesontown, . . . 644	Kilmallie, . . . 520
Daily, . . . 585		Fraserburgh, . . . 196	Hutton (Berwick), . . . 745	Kilmarnock, . . . 437
Dairsie, . . . 421		Fyvie, . . . 197	Hutton (Dumf.), . . . 831	Kilmarnock, . . . 497
Dalavich, . . . 517	Eaglesham, . . . 561			Kilmartin, . . . 521
Dalbeattie, . . . 864	Earlsferry, . . . 436	Gairloch, . . . 66	Inch (Wigtown), . . . 886	Kilmaurs, . . . 598
Dalgetty, . . . 422	Earlston, . . . 736	Galashiels, . . . 775	Inchinnan, . . . 566	Kilmelford, . . . 524
Dalkeith, . . . 683	Eassie & Nevay, . . . 284	Galston, . . . 593	Inchture, . . . 359	Kilmeny (Argyll), . . . 543

REPORT.

TO THE RIGHT HON.

GEORGE OTTO TREVELYAN, M.P.,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, Etc.,

EDINBURGH, 25th March 1886.

SIR,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 and 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1885, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Twenty-first Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1884.

But Eight deaths from Small-pox were recorded in the Registers of Eight of the Principal Towns of Scotland, during the year under review.

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

I have herewith the honour to submit the Report containing all the usual details regarding the Births, Deaths, and Marriages registered during the year 1885, in the 1,046 Registration Districts of Scotland. Appended to the General Report is the Twenty-first Report on Vaccination in which is contained all the available information regarding the administration of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1884.

The population of Scotland estimated to the middle of 1885 was 3,907,736 persons. This calculation assumes that the annual rates of increase of males and females observed between the census enumerations of 1871 and 1881 have since the latter period remained the same.

During 1885 there were registered 126,110 births, 74,603 deaths, and 25,256 marriages; being in the proportion of 3.23 births, 1.91 deaths, and 0.65 marriages for every hundred of estimated population. When these numbers are compared with similar data for recent years as given in Tables I. and II. it is found that the birth-rate is lower than has been

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1885, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.	
1855	2,978,065	93,349	7,357	62,004	19,680	31,345	3.1491	2.0820	0.6608	7.8

reported since 1855, that the death-rate is the lowest on record, and that the marriage rate is under that of any year excepting 1879, when it was still lower than it is for the present year.

The excess of births over deaths is 51,507.

BIRTHS.

126,110 births were registered in Scotland during the year under review, being at the rate of 3·23 per cent. or of 323 for every ten thousand of estimated population. Tables IV. and V. exhibit the number and proportion of births recorded in each of the five groups of Registration Districts. Of the whole natal events 52,100 took place in the Principal Town districts, 26,657 of these being male and 25,443 female children; 14,265 occurred in the Large Town districts, 7,389 males and 6,876 females; 27,192 in the Small Town districts, 13,828 males and 13,364 females; 29,357 in the Mainland Rural districts, 15,061 males and 14,296 females; and 3,196 in the Insular-Rural districts, 1,669 being of the male and 1,527 of the female sex. On comparing these with the estimated population of each corresponding district, the Principal Town districts are upon this occasion found to have the highest birth-rate, viz., 3·44 per cent., followed by the Large Town districts with a rate of 3·43 per cent.; the Small Town districts showing 3·27 per cent.; the Mainland Rural districts, 2·89 per cent.; and the Insular-Rural districts, 2·46 per cent.

10,668 of the registered births or 8·5 per cent. are illegitimate, a somewhat higher rate than in 1884. In the Insular-Rural districts the rate is 6·1 per cent.; in the Large Town districts 7·2 per cent.; in the Principal, and Small Town districts 8·1 per cent.; and in the Mainland Rural Districts 10·3 per cent.

In Table VI. is presented the relative frequency of illegitimate births as occurring in the various divisions and counties of Scotland. Among the former, the North-Eastern and Southern, each show a percentage rate of 14·2, the lowest being in the North-Western with 6·5 per cent., and West Midland with 6·3 per cent. In the counties, the rate varies from 4·7 per cent., in Ross and Cromarty, to 17·1 per cent. in Banff. In 13 counties the rate was above 10 per cent.; that in Kinross being 13·2; in Aberdeen 13·7; in Kirkcudbright 14·8; in Elgin 15·0; in Dumfries 15·3; in Wigtown 15·7; and in Banff, as before mentioned, 17·1 per cent.

TABLE III.—Births, Deaths, and Marriages in each of the Eight Divisions of Scotland during the Year 1885, and their Proportion to the Estimated Population.

1 DIVISIONS.	Population estimated to middle of 1885.	BIRTHS.		DEATHS.		MARRIAGES.	
		Number.	Per cent. to Pop.	Number.	Per cent. to Pop.	Number.	Per cent. to Pop.
Northern . .	122,692	3,080	2·47	2,094	1·71	605	0·49
North-Western .	165,723	4,232	2·55	2,553	1·54	771	0·47
North-Eastern .	428,878	13,708	3·20	7,058	1·65	2,527	0·60
East-Midland .	620,806	18,593	2·99	10,904	1·76	3,740	0·60
West-Midland .	298,933	9,132	3·05	5,498	1·84	1,574	0·53
South-Western .	1,478,651	53,260	3·60	32,377	2·19	10,729	0·73
South-Eastern .	579,985	18,218	3·14	10,347	1·78	4,133	0·71
Southern . .	212,068	5,937	2·80	3,772	1·78	1,177	0·55

Of the 126,110 births, 64,604 were male and 61,506 female infants, so that for every 100 girls there were born 105 boys. The proportion of male to female births was greatest in the Insular-Rural districts and least in the Small Town districts.

TABLE IV.—Births, Illegitimate Births, Deaths and Marriages in the Five Registration Groups of Town, Rural, and Insular Districts in Scotland in 1885.

		Kincaidine . .	11·8	Ayr	7·3	Wigtown . . .	15·7

Births were most numerous in April, when they were registered at the rate of 364 per diem, followed by June with 361 daily, October with 351, July with 350, January with 349, December with 347, May with 344, February and March each with 340, September with 336, August with 333, and lastly November with a daily rate of 331.

DEATHS.

The number of deaths recorded throughout Scotland during 1885, was 74,603 which is in the proportion of 1·91 per cent. or 191 for every ten thousand of population estimated, and which is the lowest as yet recorded in these reports. The mean average death-rate for the last ten years is 205 per ten thousand of the Inhabitants.

The mortality rate differs as may be presumed in the various districts, thus in the Principal Town districts it is 217 per ten thousand of those residing in them; in the Large Town districts, it is 195; in the Small Town districts, 186; in the Insular-Rural districts, 160; and in the Mainland-Rural districts, 159.

The average number of daily deaths was greatest in January, when it was 263, followed by February with 241, March 226, April 217, December 213, June 203, November 201, May 200, July 179, August 176, October 169, and lastly September with 166.

MARRIAGES.

25,256 marriages were registered as having taken place throughout the country during 1885, being at the rate of 65 per ten thousand of the population, a somewhat smaller proportion than that for last year; the mean for the last ten years being 69. The marriage rate varies in the several districts, thus it was 77 per ten thousand of the inhabitants in the Principal Town districts; 70 among those in the Large Town districts; 61 in the Small Town districts; 51 in the Mainland-Rural districts; and 41 in the Insular-Rural districts, being in the case of the Large Town and Mainland-Rural districts the same as it was in them last year, but is in the other districts below that for 1884.

The largest number of marriages was celebrated in June at the rate of 119 per diem; followed by January with 110; December with 92; July with 81; November with 79; April with 59; October with 53; February, August, and September, each with 52; March with 50; and May with 33. The average number of marriages registered daily throughout the year was 69.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

What follows of this Report is deduced from the information forwarded every month by the Registrars of the under named Eight Principal Towns of Scotland, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Greenock, Leith, Paisley, and Perth, and it is believed that the statements made as to the condition of their inhabitants, and the mortality occurring among them from the various diseases, may be regarded as offering a fair estimate of the condition of the country at large.

BIRTHS IN THESE EIGHT TOWNS.

43,800 births were registered in the above-mentioned Eight Towns during 1885, being at the rate of 345 per ten thousand of their estimated population. Glasgow shows the highest rate, and Perth the lowest. In the former city the rate is 382 per ten thousand of its inhabitants, followed by Paisley 371, Aberdeen 343, Leith 334, Dundee 324, Greenock 323, Edinburgh 294, and Perth 283.

Of these 43,800 births, 3806 are illegitimate, equivalent to a percentage of 8·69 of the whole. In Dundee 11·1 per cent. are of this nature; in Aberdeen 10·8 per cent.; in Perth 9·4 per cent.; in Edinburgh 9·0 per cent.; in Glasgow 8·2 per cent.; in Paisley 7·4 per cent.; in Leith 6·9 per cent.; and in Greenock 5·7 per cent. In another Column on Table VIII. the percentage of illegitimate births to possible mothers in the persons of widows and unmarried women between the ages of 15 and 45, is seen to be in Aberdeen 2·60; in Glasgow 2·39; in Leith 2·17; in Dundee 2·13; in Perth 1·83; in Greenock 1·82; in Paisley 1·81; and in Edinburgh 1·57.

22,385 of the total births in these Towns are males, and 21,415 females, the proportion of boys born to girls being therefore as 104·5 to 100.

DEATHS IN THESE EIGHT TOWNS.

The number of deaths registered in these Towns during 1885 was 27,856, of which 13,829 are of the male and 14,027 of the female sex, together being in the ratio of 219 in every ten thousand of their estimated populations.

From Table VIII. we find that in Glasgow 259 exits occurred in each like number of its population as above; in Paisley 249; in Greenock 210; in Dundee 201; in Edinburgh 182; in Aberdeen 179; in Perth 172; and in Leith 168.

A glance at Table IX. shows that in all cases with the single exception of Greenock, the death-rate is below that of 1884, and that in all the rate for 1885 is below that of the mean of the previous ten years.

Table X. presents some information as to infant mortality in them by which is meant deaths occurring among children under 5 years of age. In one column there is the percentage of deaths among infants at those tender years for each town, and in another the ratio of mortality under 5 years to the total mortality in the same. Thus, we find that in Glasgow, 86 out of every thousand such children died during the year; in Paisley 73 did the same; in Greenock 64; in Dundee nearly 60; in Edinburgh 46; in Leith 45; and in Aberdeen and in Perth 41. Again of every hundred deaths, those at ages under 5 years constituted in Perth 29·8 of them; in Edinburgh 31·3; in Aberdeen 31·8; in Dundee and Paisley 39·6; in Leith 40·6; and in Glasgow and Greenock 45·5.

Table XI. indicates the percentage of deaths from various classes of disease, and from the principal diseases to the population of each

town as estimated to the middle of the year; and Table XII. exhibits the relative intensity of the same causes of death, allowance being in all cases made for those causes which are not precisely specified.

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in the Principal Town Districts of Scotland, during each of the Years 1855-1885.

YEARS.	Population estimated to the middle of each year.	BIRTHS.		DEATHS.		MARRIAGES.

Perth	31,322	886	2.83	4,545	83	9.4	1.83	540	1.72	213	0.68

For the first time in this Report the nomenclature of disease which has been in use in the English Reports for a few years is followed, and the tables have been arranged to suit this change.

The deaths from Zymotic diseases are at the rate of 0.293 per cent. of the total estimated inhabitants of the towns and constituted 13.34 per cent. of the deaths from all causes. In Glasgow the percentage of the population dying from this class of diseases was 0.404; in Paisley 0.356; in Greenock 0.255; in Leith 0.245; in Perth 0.218; in Edinburgh 0.191; and in Aberdeen 0.157.

Of the total deaths Zymotics caused 15.57 per cent. in Glasgow; 14.56 per cent. in Leith; 14.29 per cent. in Paisley; 12.66 per cent. in Perth; 12.18 per cent. in Greenock; 10.61 per cent. in Dundee; 10.52 per cent. in Edinburgh; and 8.75 per cent. in Aberdeen.

In Glasgow 3.98 per cent. of all the deaths is due to Hooping-cough; 2.28 per cent. to Measles; 2.22 per cent. to Scarlet Fever; 1.00 per cent. to 0.85 per cent. being Enteric; and 2.59 per cent. to Diarrhœa

one in Greenock, and of the mortality was due to Hooping-cough. Of the 6 in Glasgow, 1 per cent. being Enteric; 1.10 per cent. in June, a male, aged 26 years, died of Scarlet Fever; and 0.35 per cent. of Diarrhœa and Dysentery.

TABLE XII.—Percentage of Deaths from different Diseases in the Principal Towns of Scotland during the Year 1885, allaid, and 0.10 to specified.

DISEASES CAUSING DEATH.	Total Eight Towns.	Glasgow.	Edinburgh.	Dundee.	Aberdeen.	Greenock.	Leith.	Paisley.

In Aberdeen, 1·04 per cent. of the deaths is due to Hooping-cough; 0·99 per cent. to Scarlet Fever; 0·59 per cent. to Measles; 0·84 per cent. to Fevers, Typhoid being 0·64; Diphtheria 0·74; Diarrhœa and Dysentery causing 2·67 per cent.

In Greenock, 3·52 per cent. of the total deaths are accredited to Hooping-cough; 1·30 per cent. to Diphtheria; 1·11 per cent. to Measles; 0·52 per cent. to Scarlet Fever, and 1·50 per cent. to Fevers, 0·91 per cent. of them being Typhus, and 0·59 Typhoid; 2·86 per cent. are due to Diarrhœal Affections.

In Leith, Hooping-cough caused 3·40 per cent. of the deaths; Scarlet Fever 1·83 per cent.; Diphtheria 1·22 per cent.; Fevers 2·00 per cent., 1·04 being Typhus, and 0·96 Typhoid or Enteric; Diarrhœa and Dysentery causing 2·27 per cent.

In Paisley, 3·95 per cent. of the deaths are due to Hooping-cough; 1·97 per cent. to Measles; 1·90 per cent. to Scarlet Fever; 0·20 per cent. to Diphtheria; 1·50 per cent. to Fevers, 1·36 Typhoid; and 2·65 per cent. to Diarrhœa.

In Perth, 5·96 per cent. are due to Hooping-cough; 1·83 per cent. to Diphtheria; 0·37 per cent. to Scarlet Fever; 1·50 per cent. to Fevers, all being Typhoid; 3·16 per cent. to Dysentery.

TABLE XI.—Percentage of Deaths due to Principal Diseases to the Population in each of Eight of the Principal Towns of Scotland, for the Year 1885, allowing for the Causes not specified.

Grouping these Eight Towns together, the following is the mortality ascribed to the more important specific febrile diseases. 964 deaths are placed against Hooping-cough (a great diminution on the number occurring last year), equal to 3·48 per cent. of the total registered deaths, and a mortality rate of over seven in every ten thousand of their estimated populations. Diarrhœa and Dysentery caused 699 deaths, or 2·53 per cent. of the total deaths, a death-rate of 5·5 per ten thousand of population. Measles causes 561 deaths, or 2·03 per cent. of all the deaths, equal to a death-rate of 4·4 per ten thousand of population; Scarlet Fever accounting for 410, or 1·48 per cent. of all the deaths, equivalent to 3·2 per ten thousand.

Fevers caused 332 deaths, or 1·20 per cent. of all, equal to a rate of 2·6 per ten thousand of population, of those Typhus causes 58 deaths, and Typhoid 263, most of the former occurring in Glasgow, Greenock, and Leith, the latter in Glasgow and Edinburgh.

Diphtheria caused 253 deaths, or a percentage of 0·91 of the total mortality, a death-rate of 2·0 per ten thousand.

From Small-pox eight deaths occurred in the Towns, six in Glasgow, one in Greenock, and one in Paisley.

Of the 6 in Glasgow, 1 occurred in February, a male, aged 19 years; 1 in June, a male, aged 26 years; 2 in September, an infant aged 2 months,

and a male, aged 24 years; 2 in November, a male, aged 25, and a female, aged 26 years. In Greenock the death of a male, aged 42, is registered in December; and in Paisley a male, aged 27, in October.

The total number of these Zymotic deaths, as grouped together, is 3227, as compared with 4541 for last year.

Erysipelas caused 131 deaths, and Syphilis 145.

Among Constitutional diseases, we find Rheumatism and Rheumatic Fever to have caused 127 deaths. Cancer caused 713 deaths, or 2·58 per cent. of the total mortality, or 5·6 deaths in every ten thousand of their populations, the largest proportion of such occurring in Edinburgh, Aberdeen, and Perth. Ascites and Dropsy are the assigned causes of 117 deaths; and Gout of 4, Edinburgh claiming 3 of them, and Aberdeen the other.

To Phthisis 3104 exits are attributed, being 11·21 per cent. of the total mortality, or in the proportion of 24·6 deaths in every ten thousand of the inhabitants of the towns; and as on former occasions, Glasgow, Paisley, Dundee, and Greenock, apparently suffered most, Aberdeen least.

Acute Hydrocephalus caused 469 deaths; Tabes Mesenterica 394; and 257 occur from the other forms of Scrofula. In all, Constitutional diseases caused 5162 deaths, or 18·65 per cent. of the total.

Affections of the Brain and Nervous System caused 3430 deaths, equal to 12·39 per cent. of the whole, or to 27 deaths in every ten thousand of population. Greenock and Paisley present the highest death-rate from these, viz., 15·83 per cent., and 15·31 per cent. respectively, followed by Aberdeen with 13·99 per cent.; Perth 13·59 per cent.; Leith 13·08 per cent.; Dundee 12·18 per cent.; Edinburgh 12·01 per cent.; and Glasgow 11·50 per cent.; or in proportion to each ten thousand of their populations as follows—Paisley 38, Greenock 33, Glasgow 30, Aberdeen 25, Dundee 24, Perth 23,—Leith and Edinburgh each with 22 deaths.

From diseases of the Circulatory System 1911 deaths occur, being equivalent to 6·90 per cent. of the deaths, or 15 in every ten thousand of

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1885, compared with the Mean of the Ten Years 1871–1880.

B

population. Perth stands highest with 10·05 per cent. of its whole mortality due to diseases of this nature, followed by Aberdeen with 9·64, and Edinburgh, 9·11 per cent., Glasgow and Paisley standing lowest, with 5·66 and 5·44 per cent. respectively.

6323 deaths occurred from diseases of the Respiratory System (not including Phthisis), or 22·84 per cent. of all the deaths in these towns are due to them; equal to a death-rate of 50 per ten thousand of their inhabitants. Glasgow suffered to the extent of 25·03 per cent. of the total deaths being due to such, or 65 out of every ten thousand of her inhabitants so perished. Dundee and Greenock follow with 23·96 per cent., and 23·71 per cent. respectively of their deaths thus caused, in other words, among every ten thousand of their inhabitants 48 and 50 so die. Aberdeen and Perth suffer least; in the former 18·50 per cent., and in the latter 15·46 per cent. of all deaths being so caused.

Bronchitis ends the lives of 3441 individuals, or 12·43 per cent. of all the deaths; Pneumonia of 2300; Croup of 231; while Pleurisy, and other Lung diseases, cause 222 exits.

Diseases of the Digestive System caused 1986 deaths, or 7·17 per cent. of the total; in the ratio of 15·7 per ten thousand of population. Dentition caused 337; Enteritis 326; Peritonitis 305; Diseases of the Liver 319.

Diseases of the Urinary Organs caused 544 deaths, 1·96 per cent. of all, or 4·3 in every ten thousand of population. Of this order Acute Nephritis and Bright's disease together, caused 289 deaths.

782 registry entries are due to Premature Births; 73 to Congenital Malformation, as Cyanosis, Spina Bifida, &c., and 1040 to Old Age.

Atrophy and Debility are assigned causes for 935 deaths, and in 168 cases the cause is not ascertained, or so ill-defined as to be of no use in compiling our tables.

Violence ends 846 lives, 3·06 per cent. of the gross mortality, and 6·7 in every ten thousand of population.

In Greenock, Dundee, and Glasgow, nearly 8 deaths in every ten thousand of their populations are accidental; in Aberdeen, Leith, and Perth, they are under 5. To Intemperance 81 deaths are directly due; by Suicide 65 persons ended their lives; and in 4 cases Murder or Manslaughter was the cause.

In these Eight Towns, 71 persons died during the year aged 90 or over, 15 being men and 56 women; three of the latter had attained to ages over 100, two being 102 at death, and one 107, all widows.

MARRIAGES IN THE EIGHT TOWNS.

10,157 Marriages are registered as having been celebrated in these towns, which is in the ratio of 80 for every ten thousand of their estimated populations. The rate varies in the different towns, as is seen on Table VIII., where Glasgow stands first with 88 in the above mentioned proportion; Edinburgh and Paisley come next with 82; Aberdeen with 76; Leith with 74; Dundee and Perth each with 68; and Greenock with 58.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1885 are extracted from the Astronomer-Royal's Notes appended to the Monthly Reports, issued by the Registrar-General:—

January was characterised chiefly by the unusual amount of easterly wind, and its usual concomitants low mean temperature and rather scanty rain, especially on the East Coast.

Although the Mean Barometric pressure was lower than ever recorded before for a *February* month, that was due so largely to the absence of north winds and the preponderance of west and south over east, that the month in 1885 may be pronounced favourable on the whole. The force of the wind was indeed rather in excess, and the rain-fall slightly in excess also, but the humidity of the air was the average of former years, and the mean temperature $0^{\circ}7$ higher.

Without deviating very far from the average of former years on any one point, the weather of *March* 1885 may be generally characterised as sharp, or dry, cold and bracing; the mean barometric pressure having been high and rather steady, the mean temperature slightly below the average, the humidity less, the rain less in both its depth and number of days of falling, the strength of the wind rather greater but its several directions nearly as usual.

TABLE XIV.—Meteorology of Scotland for 1885, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1885.

April had a mean temperature just equal to the average of former years, much cold weather in the beginning of the month, being balanced by warm weather towards the end of it; otherwise it inclined, in less humidity and less rain, but more wind strength, to the dry and windy.

May was undoubtedly cold, wet, windy, and afflicted with low barometric pressure, this last exceeded only once before, viz., in 1878. The mean temperature also was only once lower, viz., in 1869. The rain-fall was of the same depth in 1872, but has not been greater since 1862; while the number of rainy days has never been equalled before in any month of May.

June was dry and windy, with high barometric pressure and very large barometric range. The dryness, indeed, was quite exceptional, the rain-fall being only about one-third of the average amount for the last twenty-nine years, and, excepting last year, never having been so small for the same month in any other year within that number; while the number of days of falling was less by five than the average. The mean temperature was slightly less than the average.

July was characterised chiefly by great barometric pressure, great daily range of temperature, very small rain-fall; more south and less north wind than usual, together with a preponderating direction from the westward.

The characteristic of *August* was its unusual coldness, caused mainly and immediately by the great preponderance of East and North winds over West and South in place of the reverse arrangement ordinarily experienced.

With an unusually low barometric pressure, and a predominance of west wind in more than the average strength, the mean temperature of

September 1885, was lower than that of any year since 1877; while the number of rainy days was larger, and the depth of rain-fall greater, than the average by nearly a third part, making altogether a very inclement month.

During the month of *October*, there was a very unusual preponderance of N.N.W. wind, bringing with it a lower mean temperature than has ever been previously recorded for October, except in the year 1880, when it was exactly the same.

November was very near the mean of all previous recorded Novembers as to its mean quantities, in almost every item of registration, excepting only that the depth of rain-fall was less by about a third part, and the direction of the wind was much more from the East and North-East than customary.

The prevailing characteristic of the weather for *December* was very high barometric pressure, accompanied by the unusual simultaneous feature of large range of the barometer, the two together resulting in a very windy month combined with dryness.

Table XIII. shows the monthly mortality, and mean temperature, throughout Scotland during 1885; and in the last two columns there is given, for sake of comparison, the monthly proportion of deaths, and mean temperature for each month, for the decennial period 1871-80. On comparing the mean monthly temperature of the present year (1885), with that for the ten years, it is found that for every month in the former, with the exception of November and December, this is below that of the latter. During the months presenting the lowest mean tem-

perature there is the largest proportion of deaths, January and March being most prominent in this respect; the lowest death-rate occurring during the autumn months of September and October. Table XIV. gives more extended information regarding various meteorological phenomena, deduced from observations made daily at 55 Stations of the Meteorological Society of Scotland scattered over the country.

Table XV. exhibits the connection between certain atmospheric phenomena, and the mortality from certain diseases, in the Eight Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Greenock, Leith, Paisley, and Perth, and from it daily deaths are seen to occur most numerous in them during January, February, March, December, and April, being fewest in September and October, as was also the case throughout the country.

8 deaths from Small-pox were registered in the towns during the year—1 in February, 1 in June, 2 in September, 1 in October, 2 in November, and 1 in December. Measles caused its greatest mortality

TABLE XVII.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1885, and Proportion at each Age in every Hundred Deaths per Month.

MONTHS.	Actual Number of Deaths in 1885.					Proportion at each Age in every Hundred Deaths per Month.

TABLE XVIII.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1885.

MONTHS.	Relative Number of Deaths in 1885.					Monthly Deaths proportioned to 1000 per month or 12,000 per annum.
	0-5 Years.	5-20	20-60	60 and above.	Total.	
January	1,343	233	979	616	3,171	1,340
February	1,154	241	758	527	2,680	1,132
March	1,086	249	789	490	2,614	1,104
April	1,016	219	804	454	2,498	1,053
May	901	255	681	386	2,223	939
June	963	250	692	430	2,335	966
July	790	235	655	346	2,026	856
August	913	217	583	372	2,085	881
September	723	207	602	350	1,882	795
October	763	168	680	367	1,933	838
November	936	220	747	454	2,357	996
December	871	250	820	516	2,557	1,080
YEAR	11,564	2,744	8,790	5,308	28,406	12,000

during January and the following three months, gradually falling thereafter throughout the year. The deaths from Scarlet Fever are largest in November, February, October, and March; and those from Hooping-Cough during the first five months of the year, being much reduced in number during the autumnal and early winter months. Diphtheria and Fevers do not present a great range of up and down October and November in the case of the former, and January in that of the latter standing highest. Diarrhoeal Affections are pre-eminent during August and September, least so in the early months of the year.

Phthisis or Consumption, always presenting a large death roll, is most marked in March and January, least so in July, August, September, and November. Croup presents its highest mortality during the months at either end of the year.

Deaths from diseases of the Respiratory System generally tell most heavily during January and December, the months with lowest temperature and inclement weather, least so during August and September, when it is the reverse; the like being the case with those from diseases of the Circulatory System and Old Age.

Brain Diseases were most fatal during June, March, and January, least so during October.

From Tables XVII. and XVIII. we may glean information regarding the monthly mortality at the various periods of life, viz., among Children, Adolescents, Adults, and the Aged.

Thus among Children, aged 0-5 years, the greatest number of deaths occurred during January, February, March, and April, being fewest in September.

Among Adolescents, aged 5-20 years, deaths are most frequent in May, December, and March, least so during October.

Adults, 20-60 years, suffer most during January, December, March, and April, least during August and September.

The Aged, or those over 60 years of age, die in largest numbers during January, December, March, and February, in the smallest, during July and September; so that it is again seen that in the coldest months of January, March, and December, the highest death-rates occur.

The average daily mortality, among all the inhabitants of the Eight Towns, was heaviest during January, gradually diminishing in the other months as follows:—February, March, December, April, November, June, May, August, July, October, September.

There is appended to this Report three Tables, giving a graphic delineation of the Birth, Death, and Marriage-rate curves from 1855, when registration of these came into operation, to the present year, and which show at a glance the various rises and falls which have occurred in the case of each.

TWENTY-FIRST ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1884.

The Vaccination returns for the year 1884 show that of the 129123 children born in Scotland, 112122, or 86·334 per cent. were successfully vaccinated. In 1964 cases, or in 1·521 per cent., vaccination was postponed by medical certificate when the return was made up at the close

TABLE XIX.—Vaccinations in Scotland, 1874–1884, and Proportion to the Births each Year.

Years.		Success-fully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL BIRTHS.
				From Constitutional Insusceptibility.	From having had Small-pox.	From previous Vaccination.

of 1885; 242 children, or 0·187 per cent., were declared to be unfit for vaccination from constitutional insusceptibility; 265 children, or 0·205 per cent. were insusceptible from previous successful vaccination. None of the children were insusceptible from having previously had Small-pox. 11694, or 9·057 per cent. of the children born died before vaccination; and in 2836 cases, or 2·195 per cent., the children were removed from the district in which they were born before vaccination, or from some other cause they were unaccounted for. A noticeable feature is the steady increase of postponed cases. The average of postponed cases during the previous ten years was 1·103 per cent., while for the year 1884 the proportion was 1·521 per cent. (Table XIX.)

In Table XX. the particulars relative to children who died before vaccination are omitted; and the proportion shown of children, living at the age of six months, who were protected by vaccination. It appears from this Table, that of 117429 children who were living at the age of six months, 112122, or 95·481 per cent. were certified to have been successfully vaccinated. In 1964 cases, or in 1·672 per cent., vaccination was postponed. In 242 cases, or 0·206 per cent., the children were stated to be constitutionally insusceptible of vaccination; 265, or 0·226 per cent., were insusceptible from previous successful vaccination; but none were insusceptible from having previously had Small-pox. In 2836 cases, or 2·415 per cent., the children were unaccounted for from having previously left the district in which they were born, or otherwise.

TABLE XX.—Vaccinations in Scotland, 1874–1884, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

Years.		Successfully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL LIVING.

Total	8	100.00	3657	100.00	5415	100.00

In Table XXI. is given the usual account of the deaths from Small-pox in Scotland, during each year, from 1855 to 1885. From Table XXII. it will be seen that in Eight of the Principal Towns of Scotland during 1885, only 8 of the deaths were caused by Small-pox, of which 6 occurred in Glasgow, 1 in Greenock, and 1 in Paisley. With reference to the death from Small-pox in Greenock, it is explained by the Sanitary Inspector, "that deceased arrived in Greenock by the Allan Liner 'Buenos Ayrean,' on 24th November, suffering from Small-pox, which he had contracted in Montreal. The 'Buenos Ayrean' left that port on 12th November, and the deceased sickened on the 21st."

I have the honour to be,

SIR,

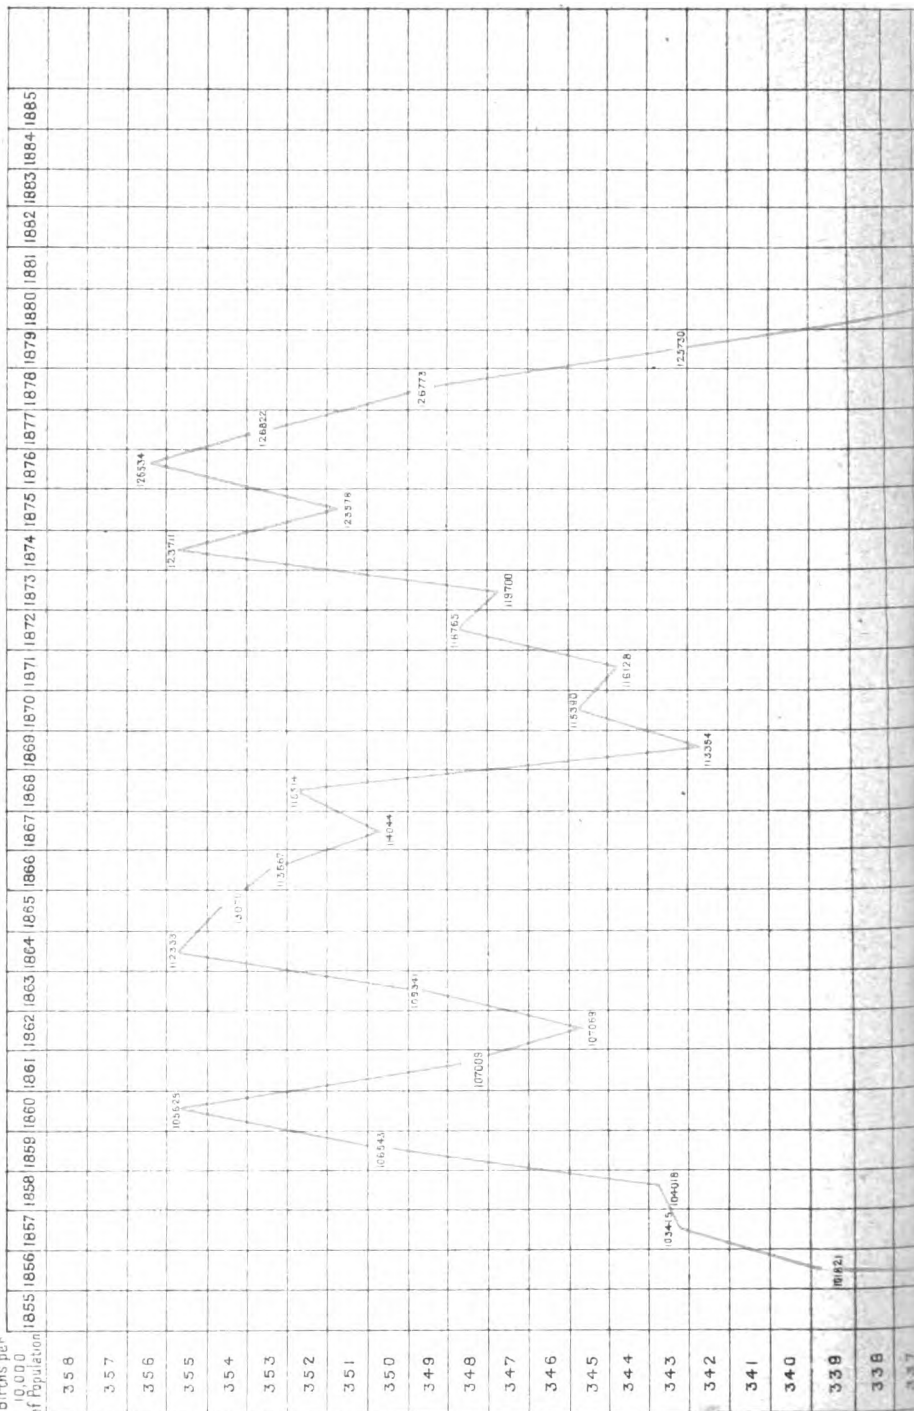

Your most obedient Servant,

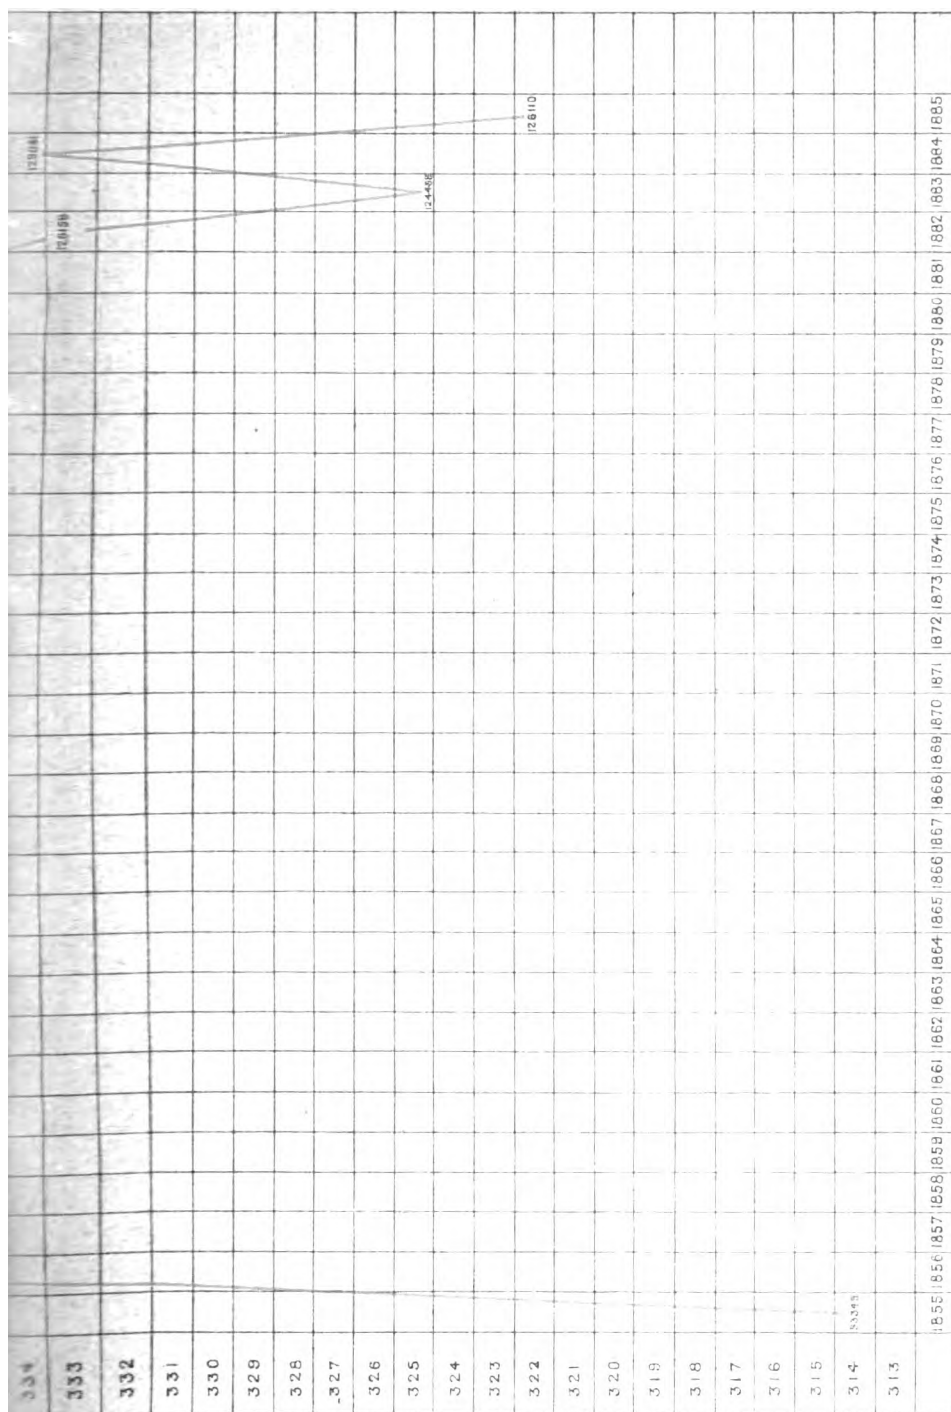

R. J. BLAIR CUNYNGHAME, M.D.

STATISTICAL DEPARTMENT,
5th March 1886.

GRAPHIC DELINEATION OF THE BIRTH RATE PER 10,000 OF THE POPULATION IN SCOTLAND, FROM 1855 TO 1885

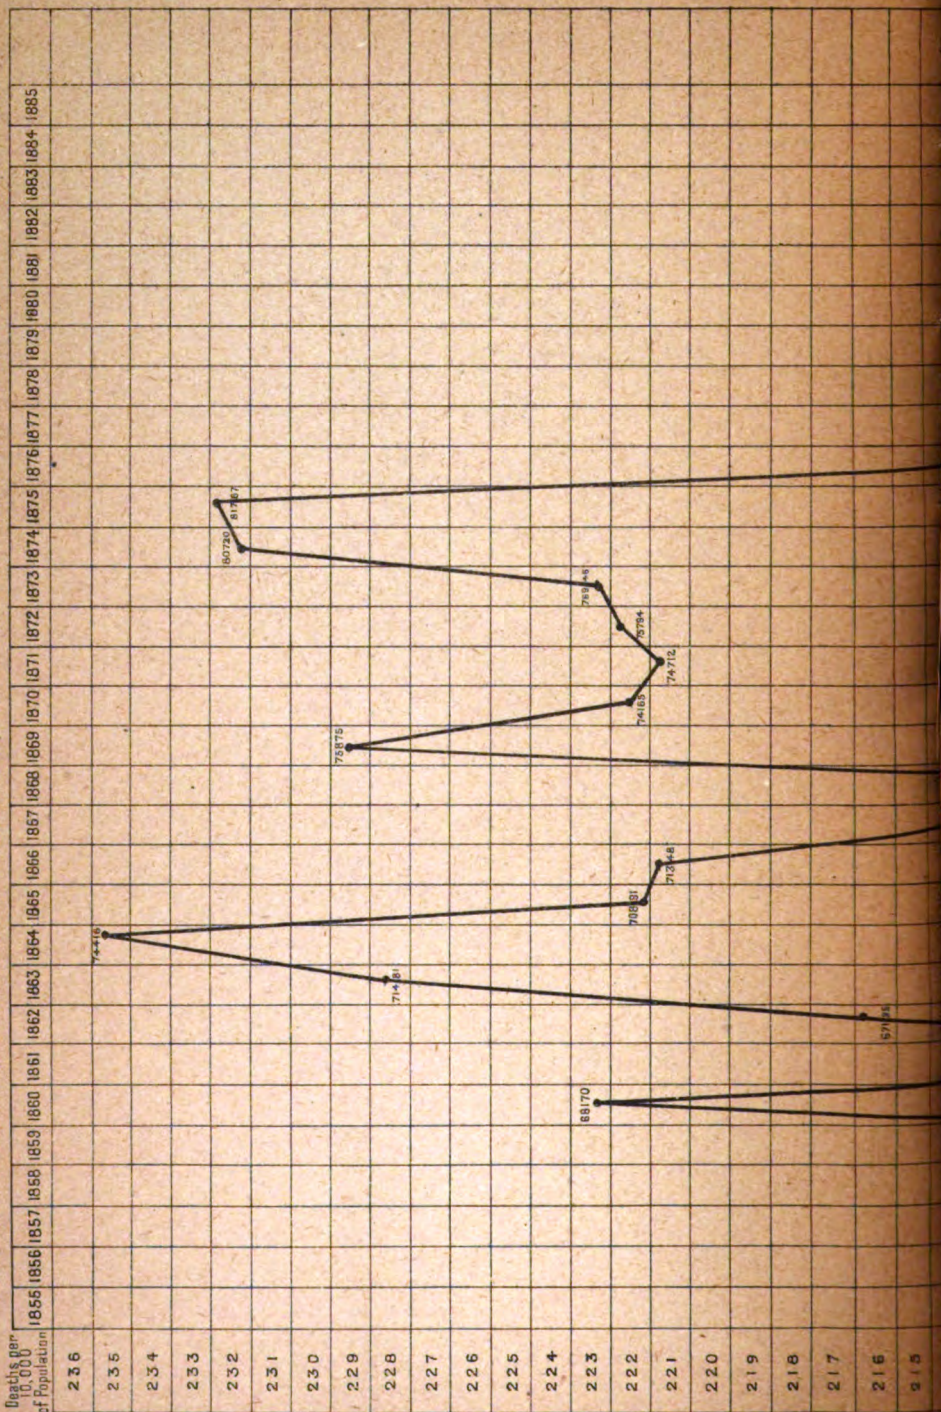

Births per
10,000
of Population

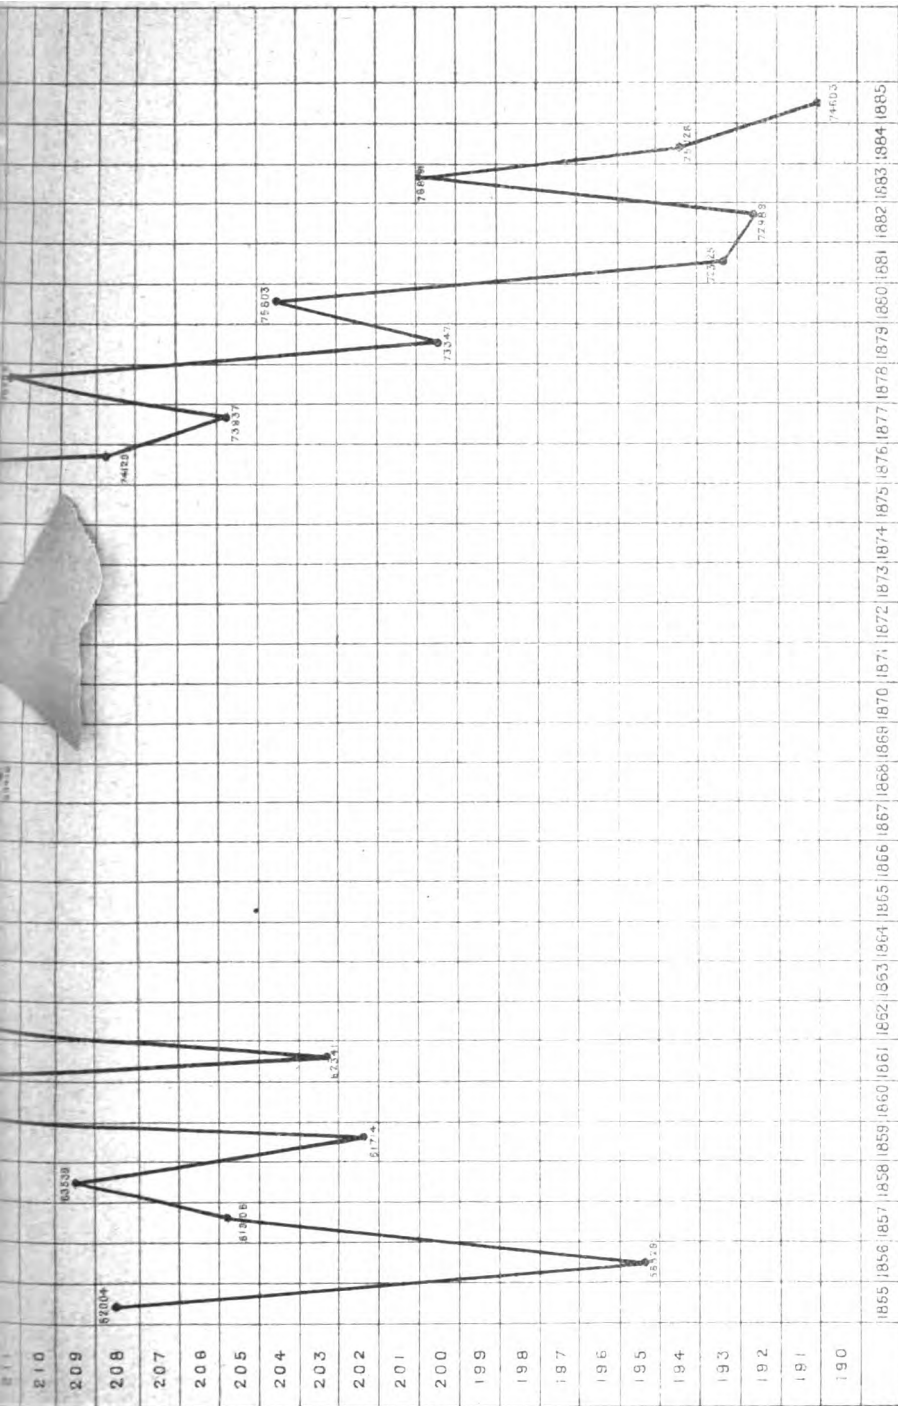

The figures on the face of the Chart are the exact numbers of Births occurring during the year.

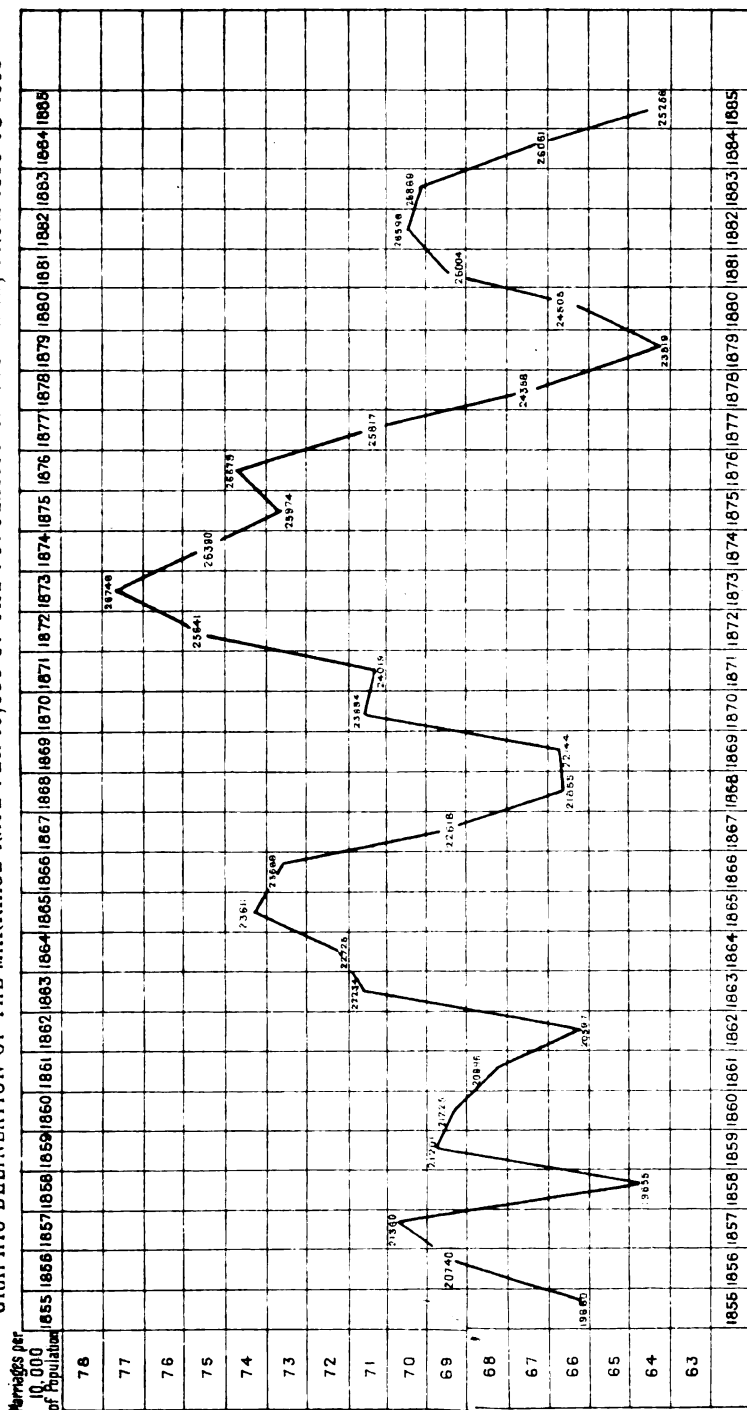

GRAPHIC DELINEATION OF THE DEATH RATE PER 10,000 OF THE POPULATION IN SCOTLAND, FROM 1855 TO 1885

The figures on the face of the Chart are the exact numbers of Deaths occurring during the year.

GRAPHIC DELINEATION OF THE MARRIAGE RATE PER 10,000 OF THE POPULATION IN SCOTLAND, FROM 1855 TO 1885

The figures on the face of the Chart are the exact numbers of Marriages occurring during the year.

XI.—ABSTRACT of the METEOROLOGY in Eight of the Principal Towns of Scotland during the several Months of the Year 1885.

Mean Height above the Sea-level, 123 feet. Mean Latitude, 56° 12'. Mean West Longitude, 3° 30'.

1885.	BAROMETER.		SELF REGISTERING THERMOMETER.						HYGROMETER.		DEDUCTIONS from Glaisher's Tables, 2nd Edit.				RAIN.		WINDS.											Mean Pressure on square foot.
	Mean at 32° and Sea-level.	Monthly Range.	Inch.	Highest in Month.	Lowest in Month.	Mean Temperature.	Monthly Range.	Mean Daily Range.	Greatest Daily Range.	Dry Bulb, or Mean Temp. of Air.	Wet Bulb, or Temp. of Evaporation.	Dew-point Temperature.	Elastic Force of Vapour.	Wt. of Vapour in Cubic Foot of Air.	Humidity, Sat. 100.	Number of Days it fell.	Amount.	Number of Days it blew in certain Directions.								lbs.

33. WIGTOWN.

APPENDIX.

VACCINATIONS, 1884.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

1. SHETLAND.

8. NORTHMAVINE.—The 11 yet unvaccinated were not brought forward when the Vaccinator went his rounds, either because they were suffering from Hooping Cough, then epidemic, or their parents were afraid of infection.

12. (3) PAPA STOUR.—The Vaccinator has not visited the district, for the purpose of vaccination, during the past year.

4. SUTHERLAND.

48. DURNESS.—The postponements were chiefly on account of constitutional debility of the children, as manifested by eruptions over their heads and bodies.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

66. (2) SOUTHERN DISTRICT OF GAIRLOCH.—Vaccination most creditably attended to by the Medical Officer and the parents. It is no small praise for the district to be absolutely free from defaulters.

75. (1) LOCHBROOM.—Vaccination remarkably well attended to, considering that the poor people have half-a-crown to pay for the operation, and often to travel great and difficult journeys to the Vaccinator. Surely when vaccination is compulsory it should be gratuitous. The trouble is enough without the expense, especially in cases where the payment is a matter of great consideration.

6. INVERNESS.

Mainland.

906. ALVIE.—Vaccinations fairly well up, and generally parents exhibit a desire to meet the law.

97. (1) GLENELG.—It will be seen from the Return that the Act continues to work satisfactorily.

97. (3) NORTH MORAE.—During the last half of the year the Vaccinator twice made the circuit of the district for the purpose of vaccination, and the Registrar has every reason to

believe that all children have been successfully vaccinated, although some of the certificates are withheld till paid for.

108. KIRKHILL.—Vaccination schedules difficult to get in. Many parents have to be warned several times before complying with the requirements of the Act.

104. LAGGAN.—The parents of the child whose vaccination is still outstanding, being hawkers, are sometimes very difficult to get at.

Insular.

109. BRACADALE.—The parish has been for a considerable time without a resident Vaccinator; it is understood, however, that some of those included in col. 7 are vaccinated, though the certificates have not yet been transmitted.

111. (2) SOUTH HARRIS.—Vaccination is not so successfully carried on as it might, but the Registrar is not able to say whose fault it is.

113. NORTH UIST.—Hooping Cough was in the parish for fifteen or sixteen months, but has now disappeared.

119. STRATH.—So many being unaccounted for is owing to the frequent change of Medical Officers. The parish is divided into six Vaccination Districts, but the weather having been so very boisterous since the appointment of the present Medical Officer, he did not consider it safe to invite parents or guardians, with their children, to meet him at any of the centres.

III. NORTH-EASTERN DIVISION.

7. NAIRN.

122. CAWDOR.—Vaccination well attended to. It has been suggested to parents to have the operation performed ere teething begins, and as a result there have been fewer postponements.

8. ELGIN (OR MORAY).

136. NEW SPYNE.—The entry unaccounted for is that of a tramp's child, which was born in the Poorhouse, and subsequently lost trace of.

10. ABERDEEN.

173. AUCHTERLESS.—The case unaccounted for is that of a tramp's child, which is reported to be dead. Its mother may yet be found, however, and a certificate obtained.

186. CULSAMOND.—Vaccination Act still requires particularly attention on the part of the Registrar.

241. STRICHEN.—As reported on previous occasions, the Vaccination Act has always been found to operate admirably in this parish. This, it is believed, is chiefly owing to the excellent arrangements originally made, and still continued, by the Vaccinator.

IV. EAST-MIDLAND DIVISION.

13. PERTH.

330. AUCHTERGAVEN.—There is sometimes unnecessary delay on the part of the Vaccinator, but no unwillingness on the part of parents. In almost every case there is a Medical Officer to attend the birth, and to him the parents look for attending to vaccination.

344. DOWALLY.—Two certificates for 1884 have not yet been received by the Registrar, neglect on the part of the Vaccinator being stated as the cause of the delay.

14. FIFE

411. BURNTISLAND.—A mining village recently established in connection with a mineral oil work, and containing about 200 families, gives trouble in regard to vaccination. The population is somewhat migratory, and it is difficult on that account to get hold of the vaccination particulars.

V. WEST-MIDLAND DIVISION.

19. ARGYLL.

Mainland.

517. (2) DALAVICH.—The two cases of postponement were on account of weak health. The children, who were twins, are now improving. The other two left the district some time ago, but the parent of one of them is still communicated with.

Insular.

548. SALEN.—Owing to delay in the appointment of a Medical Officer for this District, during the latter part of 1884 and the first five months of 1885, no vaccinations were effected, and a few of the parents still persist in throwing obstacles and delay in the way of vaccination.

551. (2) COLL.—The large number of vaccinations still postponed is on account of the pre-

vailing cold weather, and from a desire to let the children get stronger before the operation is performed.

20. BUTE.

555. KINGARTH.—The number of removals is above the average, on account of the workmen at Lord Bute's new mansion having now to seek work elsewhere.

VI. SOUTH-WESTERN DIVISION.

21. RENFREW.

568. (1) KILBARHAN.—The case entered as "insusceptible," is the first that has occurred during the last ten years. The only difficulty is caused by the carelessness of parents.

22. Ayr.

583. COYLTON. The number of cases entered in col. "Removed from District," is exceptionally large, on account of the partial stoppage of Merry & Cunningham's Works at Rankinston. Some of the workmen went to America, and others could not be traced. All the cases of this class belong to Rankinston.

597. KILMARNOCK.—There is a disposition on the part of parents to comply with the requirements of the Act, although there is occasional grumbling on the part of some.

607. MUIRKIRK.—The Vaccination Act is well attended to in this parish. Occasionally the Registrar has a little difficulty in getting in the certificates. The Medical men decline to give up the certificates until their fees are paid; and there is sometimes a little delay between the parents and the Medical Officers on that account.

VII. SOUTH-EASTERN DIVISION.

27. BERWICK.

743. GREENLAW.—The Act works on the whole very well. At the suggestion of the Vaccinator, the Registrar has issued during last year Schedule "A" as well as Schedule "D" to the parent, and by this arrangement the Schedules come in with much greater regularity; but in the Registrar's opinion, much better results would be secured if the legal period for vaccination were reduced from six months to three, because the bulk of postponements arises from the fact, that between three and six months the health of children is affected by teething.

**CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).**

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
16	Eday and Pharay	Part of Stronsay and Eday.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
37b	Keles	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Rest of Applecross and part of Gairloch.
68b	Carnoch	Parts of Contin, Fodderty, and Urray.
71b	Kinlochluhart	Parts of Contin, Fodderty, and Urray.
86b	Carloway	Parts of Lochs and Uig.
87	Lochs	Parts of Lochs and Uig.
112	Kilmuir	(1) Part of Kilmuir; (2) Rest of Kilmuir and part of Snisort.
135	Elgin	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
152	Enzie	Parts of Bellie and Rathven.
155b	Gleninnes	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
210b	Kinninmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmulok, Tullich, and Glengairn.
232b	Millbrea	Parts of Fyvie and Monquhitter.
237b	New Pitullogie	Parts of Aberdour, New Deer, Strichen, and Tyrie.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
240	Strathdon	Strathdon, and part of Tarland.
249b	Ythan Wells	Parts of Auchterless and Forgue.
272	Arbroath	Arbroath, and part of St Vigeans.
283	Dundee	Dundee, and part of Liff, Benrie, and Invergowrie.
294	Kettins	Kettins and part of Scone.
297	Kinnettles	Kinnettles and part of Caputh.
324	Aberfeldy	Parts of Dull, Fortingall, Kenmore, Logierait, and Weem.
331	Balquhiddier	Balquhiddier, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Parts of Caputh and of Dunkeld and Dowally.
355a	Fortingall	(1) Parts of Fortingall and Weem; (2) Part of Fortingall.
355b	Foss	Part of Dull.
360	Kenmore	Parts of Kenmore and Weem.
361	Killin	Parts of Kenmore, Killin, and Weem.
367	Kinloch-Rannoch	Parts of Fortingall and Logierait.
375	Logiealmond	Parts of Fowle-Wester, Little Dunkeld, Methven, Monzie, and Redgorton.
379	Meikle	Meikle, and part of Coupar-Angus. [Kinloch, and Rattray.
386b	Perrie	Parts of Alyth, Bendochy, Bialagowrie, Caputh, Kirkmichael, Lethendy and
387	Perth	Perth, and parts of Kinnoull, Scone, and Tibbermore
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathmillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol, Dull, and Moulin.
402	Anstruther-Easter	Anstruther-Easter and part of Kilenrany.
417	Crail	Part of Crail and May Island.
423	Dunbog	Dunbog, and parts of Abdie and Flisk.
434	Dunfermline	Parts of Dunfermline and Inverkelthling
425	Dunino	Dunino and part of Crail.
432	Inverkelthling	Parts of Inverkelthling and Dunfermline.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kirkcaldy.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
490	Stirling	Stirling, and part of St Ninians.
493	Bonhill	Bonhill, and part of Dumbarton.
496	Dumbarton	Parts of Cardross and Dumbarton.
506	Ballachullish, etc.	Part of Kilmalie.
509	Cumlodden and Minard	Parts of Glassary and Glenaray.
513	Inveraray	Inveraray and part of Glenaray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura. [of Kilchrenan and Dalavich.
517	Kilchrenan	(1) Parts of Kilchrenan and Dalavich, and of Glenorchy and Inishail; (2) Rest
526	Lochgilthead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardchattan and Muckairn, and of Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell and Kilberry, of Saddell and Skipness, and of South
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny. [Knapdale.
542	Kilfinichen and Kilviceken	Parts of Kilfinichen and Kilviceken, and of Torosay.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochaspelvie	Part of Torosay.
547	Portmahaver	Part of Kilchornan.
548	Salea	Parts of Kilfinian and Kilmore, and of Torosay.
549	Tobermory	Part of Kilfinian and Kilmore.
556	Lochranza	Parts of Kilbride and of Kilmorey.
567	North Bute	North Bute, and part of Rothesay.
572	Neilton	(1) Part of Neilton; (2) Rest of Neilton and part of Abbey.
573	Falaley	High, Middle, and Low Church Parishes, and parts of Abbey and of Renfrew.
576	Ardrossan	(1) Parts of Ardrossan and of West Kilbride; (2) Rest of Ardrossan.
578	Ayr	Ayr, and parts of Newton-upon-Ayr, and of St Quivox.
584b	Crosashill	Parts of Kirkmichael, Kirkcaldy, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
612	St Quivox, etc.	Parts of Newton-upon-Ayr, and St Quivox.
626b	Calderhead	Parts of Cambusnethan and Shotts.
644	Glasgow	City of Glasgow, including Gorbals and parts of Barony and Govan
670	Queensferry	Queensferry, and part of Dalmeny.
684	Fortbello	Parts of Duddington and South Leith. [ton, and North Leith and South Leith.
685	Edinburgh	City of Edinburgh, Canongate, and parts of St Cuthberts, Duddington, Liber-
690	Kirknewton & East Calder	Kirknewton and East Calder, and part of Kirkcaldy.
692	Leith	(1) Parts of Cramond, North Leith, and St Cuthberts; (2) Parts of North
698b	Stobhill	Leith, St Cuthberts, and South Leith.
774a	Caddofoot	Parts of Borthwick, Cockpen, Newbattle, and Temple
776b	Ladhope	Parts of Galashiels, Selkirk, Yarrow, Innerleithen, and Stow.
787b	Edgerston	Part of Melrose.
784	Kirktown	Parts of Jedburgh, Oxnam, and Southdean.
813b	Brydekirk	Kirktown and part of Cavers.
835b	Wanlockhead	Parts of Annan, Cummertrees, and Hoddam.
867b	Bargrennan	Part of Sanquhar.
862	Corackbridge	Parts of Minnigaff (Kirkcudbright) and of Penninghame (Wigtown).
864	Dalbeattie	Parts of Balmacellian, Kirkpatrick-Durham, and Parton.
899	Stranraer	Part of Urr.
		Stranraer, and parts of Inch and Leawalt.

Ardoch,	328			Buckle and Preston,	728	Clatt,	180		

* The actual number of Districts is 1038—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

REPORT.

TO THE MOST HON.

THE MARQUESS OF LOTHIAN, K.T.

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 24th March 1887.

MY LORD,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 and 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1886, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Twenty-second Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1885.

But Eight deaths from Small-pox were recorded in the Registers of Eight of the Principal Towns of Scotland, during the year under review.

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

I have herewith the honour to submit the Report containing all the usual details regarding the Births, Deaths, and Marriages registered during the year 1886, in the 1,047 Registration Districts of Scotland. Appended to the General Report is the Twenty-second Report on Vaccination in which is contained all the available information regarding the administration of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1885.

The population of Scotland estimated to the middle of 1886 was 3,949,393 persons, calculated as usual upon the assumption that the yearly rate of increase of both sexes found to occur between the census enumerations of 1871 and 1881, has since the latter date remained the same.

During 1886 the births registered number 127,927, the deaths 73,622, and the marriages 24,469; being in the proportion of 3·24 births, 1·86 deaths, and 0·62 marriages in every hundred of the above estimated population. When these numbers are compared with the like data for recent years as seen on Tables I. and II. it is found that the birth-rate

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1886, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illeg. to Total Births.

BIRTHS.

127,927 births were registered throughout Scotland during the year 1886, being in the proportion of 3·24 per cent. or 324 for every ten thousand of estimated population. Tables IV. and V. show the numbers of infants born, and the percentage to the population in each of the Registration Districts into which the whole country is divided. 52,338 of the whole births occurred in the Principal Town districts, equivalent to 3·40 in every hundred of the population residing therein, the male children numbering 26,905 and the female 25,433; in the Large Town districts the total number is 15,214, or in the proportion of 3·60 per cent. of the inhabitants, the males being 7,847 and the females 7,367; in the Small Town districts the natal events are 27,618, or 3·28 per cent. to the population, males 14,321, females 13,297; in the Mainland Rural districts the whole number is 29,495, equal to 2·89 per cent. of the population, males 15,185, females 14,310; and in the Insular-Rural districts they are 3,262 *i.e.* in the ratio of 2·52 per cent. to the inhabitants of the same, the males being 1,696, the females 1,566. These proportions indicate the highest birth-rate to have been in the Large Town districts, followed by that in the Principal Town and Small Town districts, that in the Mainland Rural exceeding the same in the Insular-Rural districts.

Of the total births 10,503 are illegitimate, a smaller number than last year, being equivalent to 8·2 per cent. of the whole. As usual this rate varies considerably in the different districts, being lowest in the Insular-Rural, where it is 6·4 per cent.; in the Large Town districts it is 6·5 per cent.; in the Principal Town districts it is 7·7 per cent.; in the Small Town districts it is 8·3 per cent.; and in the Mainland Rural districts it is 10·1 per cent.

Table VI. shows the varying relative frequency of illegitimate births as occurring in the various divisions or groups of counties into which Scotland is divided, and in each county separately. Among the former, the North-Eastern is highest, showing a percentage rate of 14·3, the Southern being next with 13·6, the lowest being the South-Western in which it is 6·6, the West Midland 6·4, and North-Western 5·9. In the counties the rate varies from 4·6 per cent., in Sutherland and Ross and

TABLE III.—Births, Deaths, and Marriages in each of the Eight Divisions of Scotland during the Year 1886, and their Proportion to the Estimated Population.

Of the whole 127,927 children born during the year, 65,954 were of the male, and 61,973 of the female sex; so that for every 100 girls born there were 106·4 boys. The proportion of male to female births was highest in the Insular-Rural districts and lowest in the Principal Town districts.

Births were registered in largest numbers in April, when they were at the rate of 376 per diem, followed by March with 370 daily, June with 366, May with 359, July with 355, February with 349, October with 344, January with 343, September and November each with 338, August with 337, and lastly December with 330, as a daily rate.

DEATHS.

The number of deaths registered throughout Scotland during the year was 73,622 which is in the proportion of 1·86 per cent. or 186 in every ten thousand of population as estimated, being the lowest rate yet recorded. The mean average death-rate for the immediately preceding ten years is exactly 200 per ten thousand of the Inhabitants.

The mortality rate varies in each of the five great Registration districts in accordance with their population and their aggregation, thus in the Principal Town districts it is highest and equal to 210 in each ten thousand of the population of the same; in the Large Town districts, it is 199; in the Small Town districts, it is 180; in the Mainland Rural districts, it is 155; and in the Insular-Rural districts 153 deaths occurred for each ten thousand of the inhabitants; being in all with the exception of the Large Town districts lower than last year.

The average number of daily deaths was greatest in March, being then 252, followed by December with 226, February with 219, January with 212, April with 210, May with 207, November with 201, June with 194, July with 182, August with 175, September with 171, and October with 169.

MARRIAGES.

24,469 marriages were registered in Scotland during the year, being at the rate of 62 in each ten thousand of the population, a still lower proportion than for last year: the mean for the last ten years is 68. As with the birth and death-rate that of the marriages varies in the different Registration Districts, being highest in the Principal Town districts; where it is at the rate of 75 per ten thousand of the inhabitants of the same; 65 in those of the Large Towns; 57 in the Small Town districts; 48 in the Mainland-Rural districts; and but 37 in the Insular-Rural districts, in every case below the like for last year.

June showed the largest number of registered marriages, followed in gradually diminishing numbers by January, December, July, November, August, March, September, October, April, February, and May.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The remainder of the Report deals with eight of the Principal Towns of Scotland, the information being furnished each month by the Registrars of the same, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Greenock,

Leith, Paisley, and Perth, and it is believed the statements made as to the condition of their inhabitants, and the mortality occurring among them from the various diseases, may be regarded as offering a fair estimate of the condition of the country at large.

BIRTHS IN THESE EIGHT TOWNS.

44,114 births were registered in these Eight Towns during 1886, being at the rate of 343 per ten thousand of their estimated population. The highest rate is indicated in Glasgow, the lowest in Edinburgh. In the former city the rate is equal to 380 per ten thousand of its inhabitants, closely followed by Paisley with 379, Aberdeen coming next with 346, then Greenock with 334, Leith with 324, Dundee with 311, Perth with 296, and Edinburgh with 292.

3665 of these children are born out of wedlock, equivalent to 8·31 per cent. of the whole. This rate is highest in Aberdeen, where they form 11·5 per cent. of the total; followed by Dundee with 10·2 per cent.; Perth with 9·4 per cent.; Edinburgh with 8·4 per cent.; Glasgow with 8·0 per cent.; Greenock with 5·9 per cent.; Paisley with 5·6 per cent.; and Leith with 5·5 per cent. Another Column of Table VIII. gives the percentage of illegitimate children to possible mothers, *i.e.*, unmarried females and widows between 15 and 45 years of age, which is seen to be in Aberdeen 2·79; in Glasgow 2·32; in Greenock 1·96; in Perth 1·92; in Dundee 1·89; in Leith 1·69; in Edinburgh 1·47; and in Paisley 1·39.

22,687 of the children born in these Eight Towns are of the male sex, and 21,427 of the female, the proportion of boys to girls being therefore as 105·8 is to 100.

DEATHS IN THESE EIGHT TOWNS.

The registered Deaths in these Towns during the year amounted to 27,524, being in the proportion of 214 in each ten thousand of their estimated population; 13,594 are of the male, and 13,930 of the female sex.

Table VIII. indicates that in Glasgow the like ratio of Deaths to its computed population is 251; in Paisley it is 227; in Aberdeen it is 194; in Edinburgh it is 192; in Dundee and Perth it is 183; in Leith it is 176; and in Greenock 173.

On comparing these figures with the corresponding on Table IX. it is seen that in the cases of Glasgow, Dundee, Greenock, and Paisley, the death-rate for 1886 is below that for 1885, in the other Towns the reverse holds; and also that in each Town the rate for the present year is below that of the mean for the preceding ten years.

Table X. is drawn up to give some information as to the mortality among young children, *i.e.*, under 5 years of age, in the same towns. One column shows the percentage of deaths among the children of this age for each Town, and in the next is the percentage of Deaths as compared with the total Deaths. Thus in Glasgow, out of the number of children under 5 years of age, estimated to be alive, 78 in each thousand succumbed to one or other form of disease; in Paisley the proportion was 60; in Edinburgh it was 56; in Dundee it was 51; in Leith it was 50; in Aberdeen it was 49; in Greenock it was 43; and in

Perth 36. Of every hundred deaths registered at the same ages, but to the total deaths, 43·0 occurred in Leith; 42·7 in Glasgow; 37·4 in Dundee; 36·6 in Greenock; 35·5 in Edinburgh; 35·4 in Paisley; 34·8 in Aberdeen; and 24·2 in Perth.

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in the Principal Town Districts of Scotland, during each of the Years 1855–1886.

Perth . . .	31,702	940	2·96	4,591	88	9·4	1·92	579	1·83	239	0·75

Tables XI. and XII. exhibit the rate of mortality due to various classes of disease, and to the more important special causes of death in each of the Eight Towns, such rate being calculated in the former Table with reference to the estimated population, and in the latter with reference to the total deaths from all causes, allowance being made in all cases for the causes of death not precisely specified.

The percentage of deaths from Zymotic diseases was 0·264 on the total estimated population of the towns collectively, being 12·31 per cent. of the total registered deaths. Such causes proved fatal to 0·356 per cent. of the population of Glasgow, to 0·276 per cent. of that of Paisley; to 0·232 per cent. of that of Leith; to 0·229 per cent. of that of Aberdeen; to 0·209 per cent. of that of Edinburgh; to 0·173 per cent. of that of Dundee; to 0·154 per cent. of that of Perth; and to 0·120 per cent. of that of Greenock. The corresponding percentages of deaths from Zymotics to the total deaths were 14·18 in Glasgow; 13·19 in Leith; 12·16 in Paisley; 11·84 in Aberdeen; 10·89 in Edinburgh; 9·44 in Dundee; 8·42 in Perth; and 6·95 in Greenock.

In Glasgow, 5·48 per cent. of all the deaths is due to Hooping-cough; 2·74 per cent. to Scarlet Fever; 2·09 per cent. to Diarrhoea; 0·96 per cent. to Fevers, (0·69 per cent. being Enteric or Typhoid), 0·76 per cent. to Measles; and 0·74 per cent. to Diphtheria.

In Edinburgh, 3·49 per cent. of the total mortality is due to Measles; 2·03 per cent. to Diarrhoea; 1·21 per cent. to Hooping-cough; 1·09 per cent. to Diphtheria; 0·92 per cent. to Scarlet Fever; 0·88 per cent. to Fevers, (0·78 per cent. being Enteric.)

TABLE IX.—Percentage of Deaths to the Population in each of Eight of the Principal Towns of Scotland during each of the Years 1876–1886.

TABLE X.—Deaths of Children under Five Years of age in each of Eight of the Principal Towns of Scotland during the Year 1886.

Towns.	Estimated Number of Living Children under 5 years in 1886.	Deaths under 5 years of age.	Percentage of Deaths under 5 years.	Percentage of Deaths under 5 years to the Total Deaths.
Glasgow	71,511	5,594	7·82	42·7
Edinburgh	31,229	1,786	5·66	35·5
Dundee	20,753	1,064	5·13	37·4
Aberdeen	15,848	777	4·90	34·8
Greenock	11,091	473	4·25	36·6
Leith	10,580	532	5·02	43·0
Paisley	8,067	481	5·96	35·4
Perth	3,945	140	3·55	34·2

In Dundee, Diarrhoeal affections cause the highest proportional mortality, 4·89 per cent. of all the deaths being due to them, 1·51 per cent. is due to Scarlet Fever; 0·67 per cent. to Diphtheria; 0·60 per cent. to Fevers, (0·46 per cent. being Typhoid, and 0·14 per cent. Typhus), while but 0·28 per cent. is due to Hooping-cough, and 0·03 per cent. to Measles.

In Aberdeen, 3·69 per cent. of the total deaths is due to Diarrhoea; 2·74 per cent. to Hooping-cough; 1·21 per cent. to Scarlet Fever; 0·90 per cent. to Diphtheria; 0·67 per cent. to Fevers, (0·63 per cent. being Typhoid), 0·49 per cent. falling to Measles.

In Greenock, 2·42 per cent. of the mortality occurs from Diarrhoeal affections, 1·33 per cent. from Fevers, (0·78 per cent. being Typhus, and 0·47 per cent. Typhoid), 0·78 per cent. from Diphtheria; 0·39 per cent. from Hooping-cough; 0·23 per cent. from Scarlet Fever; and 0·08 per cent. from Measles.

In Leith, 5·05 per cent. is due to Measles; 3·09 per cent. to Diarrhoea; 0·97 per cent. to Fevers, (0·49 per cent. being to Typhus, and 0·32 per cent. to Typhoid), 0·65 per cent. to Scarlet Fever, and 0·49 per cent. to Hooping-cough and Diphtheria.

In Paisley, 4·57 per cent. is due to Diarrhoea; 2·28 per cent. to Fevers, (1·91 per cent. being Enteric; 0·22 per cent. Simple or ill-defined,

TABLE XI.—Percentage of Deaths from different Diseases to the Population in each of Eight of the Principal Towns of Scotland during the Year 1886, allowing for the Causes not specified.

and 0.15 per cent. to Typhus), 1.62 per cent. to Hooping-cough; 1.33 per cent. to Scarlet Fever; 0.59 per cent. to Diphtheria; and 0.29 per cent. to Measles.

In Perth, Diarrhœal Affections cause 3.33 per cent. of all the Deaths. Fevers, 1.40 per cent. (1.05 per cent. being Typhoid, and 0.17 per cent. each to Typhus and Cerebro-Spinal), 0.53 per cent. to Hooping-cough; 0.35 per cent. to Diphtheria; and 0.17 per cent. to Measles.

In the whole Group of Eight Towns, the following is the mortality ascribed to the more important specific febrile diseases which were registered during the year. From Hooping-cough 874 exits occurred, which is at the rate of 3.20 per cent. of the total registered mortality, and in the proportion of 6.8 in each ten thousand of their inhabitants. Diarrhœa and Dysentery together cause 741 deaths, which is equal to 2.71 per cent. of the total, a mortality rate of 5.8 per ten thousand of population. Scarlet Fever caused 499 deaths, or 1.83 per cent. of all, and equal to nearly 4 for each ten thousand of population. Measles caused 348 deaths, or 1.27 per cent. of all, equal to 2.7 per ten thousand.

Fevers caused 267 deaths, or 0.98 per cent. of all, equal to a death-rate of 2.1 per ten thousand of population. Of these Typhus caused 54 exits, and Typhoid or Enteric 197, most of the former being in Glasgow, Greenock, and Leith, the latter, in Glasgow, Edinburgh, and Paisley.

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1886, allowing for the Causes of Death not specified.

Diphtheria caused 214 deaths, or 0·78 per cent. of all, a death-rate of 1·6 per ten thousand.

From Small-pox 8 deaths occurred during the year, 2 in Glasgow, 3 in Edinburgh, 1 in Aberdeen, and 2 in Leith. Both of those in Glasgow were registered in January, one a female æt. 33 years, the other a male æt. 20 years. The first of the Edinburgh deaths was a female æt. 58 years, registered in March, another female æt. 17 years in April, and a boy æt. 7 years in May. The fatal case in Aberdeen was a female æt. 68, registered in December, and in Leith both deaths were registered in March, and both were males, one æt. 22 years, the other an infant of 4½ months.

The total number of these specific Zymotics grouped together is 2951, a considerable decrease over last year when they were 3364. Erysipelas caused 101 deaths, and Syphilis 137.

Diseases of a Constitutional nature caused 5348 deaths in all, equal to 19·5 per cent. of the total mortality, or 41·9 in every ten thousand of the population. Among them, Rheumatism and Rheumatic Fever caused 137 deaths. Cancer caused 743 deaths, or 2·71 per cent. of the total mortality, and equal to 5·8 deaths in every ten thousand of the estimated population, being most marked as a cause of death in Edinburgh, Aberdeen, and Dundee. To Ascites and Dropsy 113 deaths are placed, and to Gout 5.

Phthisis accounts for 3151 exits, being 11·53 per cent. of the total mortality; and in the ratio of 24·7 in every ten thousand of population of the above eight towns,—Glasgow, Dundee, Paisley, and Perth suffering most.

Acute Hydrocephalus caused 476 deaths; Tabes Mesenterica 438; and 263 fall to other forms of Scrofula.

From diseases of the Brain and Nervous System, the deaths were 3428, being 12·54 per cent. of the gross mortality; and 26·9 per ten thousand of estimated population. The percentage of deaths from diseases of this class was 17·02 in Perth; 13·91 in Greenock; 13·56 in Paisley; 13·03 in Leith; 12·86 in Edinburgh; 12·47 in Aberdeen; 12·46 in Dundee; and 11·97 in Glasgow. In proportion to the number of

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1886, compared with the Mean of the Ten Years 1871-1880.

YEAR	44°·9	73,622	12,000	12,000	46°·2

inhabitants they were for every ten thousand, 31·1 in Perth; 30·7 in Paisley; 30·0 in Glasgow; 24·7 in Edinburgh; 24·1 in Aberdeen; 24·0 in Greenock; 22·9 in Leith; and 22·8 in Dundee.

There were 1972 deaths referred to diseases of the Circulatory Organs, being 7·22 per cent. of the deaths from all causes, and 15·5 exits per ten thousand of population. Perth shows a percentage on its gross mortality of 9·82; Edinburgh follows with 9·17; Aberdeen with 8·59; Greenock with 7·73; Dundee with 7·53; Leith with 6·76; Paisley with 6·48; and Glasgow with 6·13.

To diseases of the Respiratory Organs (not including Phthisis), 6199 deaths are ascribed, being 22·68 per cent. of the gross mortality in these towns, and equal to a death-rate of 48·6 in every ten thousand of their collective population. Glasgow comes first with 24·89 per cent. of the total deaths there registered during the year being due to such diseases; followed by Greenock with 23·67 per cent.; Dundee with 22·67 per cent.; Paisley with 20·93 per cent.; Edinburgh with 20·70 per cent.; Leith with 18·81 per cent.; Aberdeen with 18·00 per cent.; and Perth with 17·89 per cent.

To Bronchitis 3402 deaths are due, or 12·45 per cent. of the total mortality, varying from 13·63 per cent. in Paisley, and 13·30 per cent. in Glasgow, to 9·85 per cent. in Leith, and 9·30 per cent. in Perth. Pneumonia caused 2187 exits; Pleurisy 115; and Croup 240.

From diseases of the Organs of Digestion, there were 1877 deaths, being 6·87 per cent. of the total mortality, or 14·7 in every ten thousand of the inhabitants of the towns. Dentition accounts for 255 deaths; Enteritis for 318; Peritonitis for 322; and Diseases of the Liver for 341.

Diseases of the Urinary Organs caused 554 deaths, 2·03 per cent. of all, or in the proportion of 4·3 in every ten thousand of the population. Acute Nephritis caused 105, Bright's Disease 204.

Premature Birth accounts for 777 exits; Congenital Malformations, as Cyanosis, Spina Bifida, &c., for 75; and Old Age for 1060.

Atrophy and Debility are the causes in 894 cases, and in 194 they are unascertained or so ill-defined as to be of no use in computing the tables.

Violence ends the lives of 867 persons, equal to 3·17 per cent. of all, and to 6·8 in each ten thousand of population. 804 of the deaths are Accidental; 11 Homicidal; and 52 Suicidal. From Intemperance 72 lives are lost.

In these towns, 87 persons died during the year at 90 years of age or over, 28 being men and 59 women. One of the former had attained the age of 105 years at death, and two of the latter were also over 100 at death, both widows, one 101 and the other 102 years.

MARRIAGES IN THE EIGHT TOWNS.

10,133 Marriages were registered in these towns during the year, which is at the rate of 79 for each ten thousand of their computed population. The rate varies in each town, being highest in Edinburgh, where it is (Table VIII.) 87 in the like proportion, next comes Glasgow with 86; Paisley with 83; Aberdeen and Perth each with 75; Leith with 66; Dundee with 61; and Greenock with 58.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1886 are extracted from the Astronomer-Royal's Notes appended to our Quarterly Reports:—

The weather of *January* was of a very untoward kind, cold, wet, and windy; in the latter element abounding in North, as contrasted to South, wind; and in a less degree in East, as compared with West, wind.

The chief characteristics of *February* were coldness, paucity of rainfall, and abundance of East wind; the barometric pressure being likewise unusually high, higher in fact than it has been since 1878.

March was chiefly characterised by its low mean temperature, with small daily range of temperature (speaking of cloudy skies), greater humidity of the air, greater rainfall, greater strength of wind than the average, and a greater proportion of Easterly and South-Easterly direction therein.

April approached the mean of former years more nearly than several preceding months. Mean temperature was still below the average, but less so than last month, so that the rise of temperature with spring was greater by more than a degree between April and March this year than is customary.

TABLE XIV.—Meteorology of Scotland for 1886, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1886.

May was characterised by low temperature, being 1°·7 below the mean of the last 30 years. Rainfall abundant, being greater than that of any May since 1862 and greater than the average of 30 years by 1·57 inches.

June was characterised chiefly by lower mean temperature, large daily range of temperature, small humidity of the air, very scanty rainfall (little more than half the average), and great amount or strength of wind; or in other words the progress of the season is a fortnight behind what is customary on the mean of former years.

With a barometric pressure rather less, and a barometric range considerably greater, the mean temperature of *July* 1886, after six extra cold months, at length caught up and passed beyond the average of former July months by 0°·6.

August is shown to have been a month of standard fine, dry, and breezy weather. The barometric pressure was very nearly the mean for August in all former years, and if the monthly range differed much, it was on the side of less range, and therefore less aerial disturbance.

September was characterised chiefly by high barometric pressure, rather low mean temperature, small humidity and few days of rainfall, though greater depth of rain fallen, extra strength of wind, and directions though mainly and as usual W.S.W., yet having more additions of easterly wind than usual.

The chief feature in the weather of *October* was the excess of mean temperature, by no less than 2°·8. Its absolute reading was however only 50°·1, which was equalled in 1878, and surpassed in 1876 and 1857; while being accompanied in 1886 by an extra small daily range of temperature, the mean temperatures of the days alone did not rise to a

sufficient height to satisfy the requirements for ripening many of the agricultural crops.

Like October, the chief feature of the weather of *November* 1886 was the high mean temperature, which amounted to $44^{\circ}0$, or an excess of as much as $3^{\circ}0$ over the average of the same month for the last 30 years, and within that period was exceeded by only three Novembers, viz., in 1857, 1863, and 1881, when it was $45^{\circ}1$, $44^{\circ}3$, and $44^{\circ}9$ respectively.

The weather of *December* was of an exceedingly wintry character, frost and snow having prevailed in all parts of the country, and this was attended by low barometric pressure, excessively large barometric range, remarkably low mean temperature, rainfall less than usual, by about half an inch, increased prevalence of winds from Northern quarter, and deficiency of those from the Southern.

Table XIII. furnishes the means of comparing the months of 1886 with those of the period between 1871 and 1880, and of tracing the connection between the proportion of the gross mortality and the average temperature experienced during the decennium and during the year under review. On comparing the mean monthly temperature of the present year (1886) with that for the ten years, it is seen that for every month with the exception of October and November, it is in the case of the former under that of the latter. March and December show the heaviest mortality, and it may be noted the former follows two of the coldest months of the year, and the latter was itself the coldest of the twelve.

It is not until June we find a decided diminution in the number of deaths which is continued throughout the next four months, July, August, September, and October. In six of the months the proportion

of deaths during the present year is above that of the decennial mean. Table XIV. affords further information as to various meteorological phenomena deduced from daily observations made at 55 stations of the Meteorological Society of Scotland, situated in various parts of the country.

Table XV. contains the usual information regarding the connection between the chief meteorological peculiarities of each month of 1886, and the amount of mortality experienced in the Eight Towns; and as in the country at large, we here find the heaviest Death-toll to be in March and December, the lightest in June and the four succeeding months.

Of the 8 fatal cases of Small-pox which were registered in these towns, 2 were so in January, 3 in March, and 1 each in April, May, and December.

Measles numbered but 4 deaths in January, but steadily increased until June when they were 68, falling until November, when they again rose considerably. The greatest number of deaths from Scarlet Fever

August	835	233	608	334	2,010	859
September	928	180	592	338	2,038	867
October	866	171	612	349	1,998	855
November	1,074	222	693	469	2,460	1,052
December	1,064	225	842	494	2,645	1,131
YEAR	11,004	2,722	8,806	5,428	28,060	12,000

occurred during the last six months of the year, rising steadily and perceptibly from June onwards. Hooping-Cough causes its fewest deaths during January and February, when they are 56, and varies from 63 to 93 during each of the other months. Diphtheria shows its highest mortality during the months at either end of the year, and the same remark applies to Fevers and that chiefly to Enteric or Typhoid. Diarrhœa is most apparent during the later summer and autumnal months, its highest being during September.

Phthisis was most fatal during the first six months of the year, although in each month a large number of exits are due to it, the smallest number being 198 in October. Croup indicates its highest mortality during the last three months, — October, November, and December.

The mortality from diseases of the Respiratory Organs is perhaps more than in most other cases associated with marked atmospheric alterations, or sudden and frequent alternations of cold and mild weather. During the present year the coldest months, March and December, give the largest number of deaths, chiefly from Bronchitis and Pneumonia, the lowest occurring in the warmer months of July, August, and September; and almost identically the same thing happens in regard to Heart-Affections and diseases of the Circulatory System generally, which so often complicate Pulmonary Affections.

Brain Diseases were most lethal during March, April, and May, least so during August, September, and October.

Tables XVII. and XVIII. are drawn up to exhibit the relative amounts of mortality at different ages among the population of the Eight Towns, at each of the monthly periods of 1886.

Thus, Children aged 0–5 years, died in the highest proportion during November, December, March, and September, in the lowest during July and August.

Among Adolescents, aged 5–20 years, the proportion of deaths is greatest in March, May, and June, the minimum occurring in October.

Adults, or those between 20 and 60 years, and who are, naturally, most exposed to inclemencies of weather, while actively engaged in earning daily bread for themselves and families, suffered chiefly during March, December, and the early months of the year, during the months when Chest affections are most fatal.

Lastly, the Aged, or those who have passed the limit of 60 years, succumbed in the greatest numbers during the early and late months of the year, when the mean temperature was at its minimum, being highest in March, when 131 such died, and 106 in January, lowest during August, when 59 was the mortality.

As regards the mortality of the entire population of these Eight Principal Towns of Scotland during 1886, the months rank in the following order, being heaviest in March, and gradually diminishing throughout, the others thus:—December, February, November, May, January, April, June, July, September, August, and October.

TWENTY-SECOND ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1885.

The Vaccination returns for the year 1885 show that of the 126152 children born in Scotland, 109866, or 87·090 per cent. were successfully vaccinated. In 2073 cases, or in 1·643 per cent., vaccination was postponed on medical authority when the returns were made up at the close

TABLE XIX.—Vaccinations in Scotland, 1875–1885, and Proportion to the Births each Year.

Years.		Successful Vacci- nated.	Vaccina- tion Post- poned.	Insusceptible of Vaccination.			Died before Vaccina- tion.	Removed from District before vaccination, or otherwise un- accounted for.	TOTAL BIRTHS.
				From Constitu- tional Insuscep- tibility.	From having had Small-pox.	From previous Vacci- nation.

of 1886; 225 children, or 0·179 per cent. were declared to be unfit for vaccination from constitutional insusceptibility; and 228 children were insusceptible from previous successful vaccination. There were no cases of insusceptibility in respect of the children having previously had Small-pox. 10872, or 8·618 per cent. of the children born died before vaccination; and in 2888 cases, or in 2·289 per cent. the children were removed from the district in which they were born previous to vaccination, or from some other cause they were unaccounted for. It will be seen from Table XIX. that the number of cases of postponements continues steadily to increase. During the previous ten years the average percentage of these cases was 1·157, while for the year 1885 the proportion is 1·643 per cent.

In Table XX. the particulars relative to children who died before vaccination are omitted; and the proportion shown of children living at the age of six months who were protected by vaccination. From this Table it is seen that of 115280 children who were living at the age of six months, 109866 or 95·304 per cent. were certified to have been successfully vaccinated. In 2073 cases, or in 1·799 per cent., vaccination was postponed. In 225 cases, or in 0·195 per cent., the children were stated to be constitutionally insusceptible of vaccination; and 228 or 0·197 per cent., were insusceptible from previous successful vaccination; none, however, were insusceptible from having had Small-pox. In 2888 cases, or in 2·505 per cent., the children were unaccounted for in consequence of having left the district in which they were born, or from some other cause.

TABLE XX.—Vaccinations in Scotland, 1875-1885, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

Years.		Successfully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL LIVING.

Total	8	100.00	2657	100.00	5415	100.00

In Table XXI. is given the usual account of the deaths from Small-pox in Scotland, during each year, from 1855 to 1886. From Table XXII. it will be seen that in Eight of the Principal Towns of Scotland during the year 1886, only 8 of the deaths were caused by Small-pox, the same number as in 1885. Of these, 2 occurred in Glasgow, 3 in Edinburgh, 1 in Aberdeen, and 2 in Leith.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

STATISTICAL DEPARTMENT,
2nd March 1887.

APPENDIX.

VACCINATIONS, 1885.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

1. SHETLAND.

10. (2) WHITENESS and WEISDALE.—In many cases the first attempt at vaccination was unsuccessful.

12. (3) PAPA STOUR.—The three children unvaccinated were unwell at the time of the vaccinator's visit.

4. SUTHERLAND.

48. DURNESS.—There is now a Doctor resident in the parish, which greatly facilitates the operation of the Act.

53. LAIRG.—Vaccination is well attended to, though in some cases children have to be brought very long distances.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

75. (1) LOCHBROOM.—The number unaccounted for, or remaining unvaccinated is unusually large. It may be explained thus:—The Medical Officer died in March last, and since then three young qualified gentlemen came to the District, but as none of them cared to remain, it can easily be understood that vaccination, which is at best, in such a wide rough parish as this, rather troublesome, and not very lucrative, would be a little neglected. However, a permanent settlement of a Medical Officer is not far distant, when the duty, it is to be hoped, will be attended to as usual, though the people do begin to demur at paying half a crown, with often a long fatiguing journey.

75. (2) COIGACH.—The present Vaccinator is the fourth holding the same office, during the year, owing to death and other causes of removal. Vaccination is consequently somewhat in arrear.

Insular.

86a. BARVAS.—The number postponed (71) is abnormal, owing to Hooping Cough being prevalent.

6. INVERNESS.

Mainland.

95. DAVIOT and DUNLIGHTY.—Making allowances for the distances (many of the parents have to travel to the Vaccinator), and the stormy character of the weather in these uplands during the winter season, the vaccination requirements are very fairly complied with.

101. KILTARLITY.—Vaccination unusually satisfactory, as, with the exception of three who died shortly after birth, every child born in the parish during 1885 has now been successfully vaccinated. The hearty assistance given by the Medical Officer has contributed to bring this about.

112. (2) STENSBOROUGH.—Cold and boisterous weather, preventing the children being brought to the Vaccinator, is the cause of so many cases (12) being yet unaccounted for.

114. (2) RAASAY.—A number of those entered in col. 7 were vaccinated in October and November, but the Vaccinator has had no opportunity of granting certificates.

118. (1) BENBECULA.—Seven of the 15 entered in col. 7 were vaccinated, but in consequence of the Doctor being called from the parish for a short time, they are still uncertified.

118. (3) BOISDALE.—The frequent changes of Doctors during the year caused vaccination to fall behind.

III. NORTH-EASTERN DIVISION.

8. ELGIN (OR MORAY).

131. DUFFUS.—The want of a resident Doctor is still felt, but notwithstanding vaccinations are fairly well attended to.

10. ABERDEEN.

209. KINCARDINE O'NEIL.—No cases of postponed vaccination during the year.

11. KINCARDINE.

259. FORDOUN.—Two of those unaccounted for were children of Ploughmen, and one of an African Missionary, who left the country with his child before vaccination.

IV. EAST-MIDLAND DIVISION.

12. FORFAR.

282. (4) ST ANDREW (DUNDEE).—To secure the carrying out of the requirements of the Act, a great amount of labour and attention is still necessary on the part of the Registrar. The statutory notices have to be sent to more than a third of the parents, who wait for the notices as they do for notice to pay water, poor, or police rates, before they apply to Medical Men, and the consequences are a needless number of postponements. The period allowed for vaccination is much too long. Before it expires, teething and other ailments affect infants, and necessitate postponements. Removals often take place within six months, and parochial officials have great trouble in tracing defaulters. The ten days' grace, which is a great cause of carelessness, should be abolished, the operation of the Act being now so well known.

14. FIFE.

411. BURNISLAND.—The fluctuating character of the families residing at the mining village of Binnend is the occasion of considerable trouble to the Registrar in recovering the vaccination certificates. Removals take place and no record is left of the new domicile.

V. WEST-MIDLAND DIVISION.

19. ARGYLL.

Mainland.

526. LOCHGILFHEAD.—All the eight cases of postponement were caused by dilatoriness in not vaccinating the children before teething set in. Four instead of six months would be an improvement.

20. BUTE.

558. BOTHERSAY.—Measles caused a large number of deaths before vaccination, and the after effects thereof prolonged postponements.

VI. SOUTH-WESTERN DIVISION.

21. RENFREW.

580. OATHGART.—Great inconvenience is caused by neglect to return the certificates after the vaccination has been performed. Postponements, in some cases, occurred as often as 12 or 14 times.

588. (1) KILBARCHAN.—Some parents are still careless, but this is not so noticeable now as formerly.

22. Ayr.

597. KILMARNOCK.—There is nothing to complain of regarding the working of the Vaccination Act. A few grumble, but that is all. The return shows a considerable decrease on the number of postponements, but a very large increase in deaths before vaccination, the numbers being 73 for 1884, and 109 for 1885. A few are illegitimates, or children of itinerants who were only temporarily in Kilmarnock.

607. MUIRKIRK.—There is a prospect of obtaining certificates of Vaccination of the five still unaccounted for, at an early date.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

685. (3) CANONGATE (EDINBURGH).—Two of the children unaccounted for are twins. The father refused to have them Vaccinated, and was prosecuted before the Sheriff. He pled guilty and was fined the sum of 5s. with 10s. 6d. of expenses.

686. FALA and SOUTHA.—Bad weather and blocked roads during the winter months, and distance from the Medical Practitioner sometimes delay vaccination.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
15	Eday and Phary	Part of Stronsay and Eday.
22	North Ronaldsay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
27b	Kelso	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Rest of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin, Fodderty, and Urray.
71b	Kinlochluichart	Parts of Contin, Fodderty, and Urray.
86b	Carloway	Parts of Lochs and Uig.
87	Lochs	Parts of Lochs and Uig.
113	Kilmuir	(1) Part of Kilmuir; (2) Rest of Kilmuir and part of Snisort.
185	Elgin	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
193	Enzie	Parts of Belle and Rathven.
155b	Glenrines	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
210b	Kinninmonth	Parts of Cramond, Longside, Lunmoy, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick, Tullich, and Glengairn.
222b	Millbrae	Parts of Fyvie and Monquhitter.
237b	New Pittaligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
237b	Savoch	Parts of Elton, New Deer, Old Deer, and Tarves.
240	Strathdon	Strathdon, and part of Tairland.
249b	Ythan Wells	Parts of Auchtermore and Fergus.
273	Arbroath	Arbroath, and part of St Vigens.
289	Dundee	Dundee, and part of Liff, Benzie, and Invergowrie.
294	Kettins	Kettins and part of Soona.
297	Kinnettles	Kinnettles and part of Caputh.
324	Aberfeldy	Parts of Dull, Fortingall, Kenmore, Logierait, and Weem.
331	Balquhiddier	Balquhiddier, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Parts of Caputh and of Dunkeld and Dowally.
353a	Fortingall	(1) Parts of Fortingall and Weem; (2) Part of Fortingall.
355b	Foss	Part of Dull.
360	Kenmore	Parts of Kenmore and Weem.
361	Killin	Parts of Kenmore, Killin, and Weem.
367	Kinloch-Rannoch	Parts of Fortingall and Logierait.
375	Logiealmond	Parts of Fowla-Wester, Little Dunkeld, Methven, Monzie, and Redgorton.
379	Meigie	Meigie, and part of Couper-Angus.
386b	Perrie	Parts of Alyth, Bendochy, Blairgowrie, Caputh, Kirkmichael, Lethendy, and
387	Perth	Perth, and parts of Kinnoull, Soona, and Tibbermore.
393b	Stanley	Parts of Auchtermore, Kinclaven, and Redgorton.
394b	Strathmillan	Part of Killin.
394c	Tenantry	Parts of Blair-Athol, Dull, and Mounin.
402	Anstruther-Easter	Anstruther-Easter and part of Kilrenny.
417	Craill	Part of Craill and May Island.
428	Dunbog	Dunbog, and parts of Abdie and Fisk.
434	Dunfermline	Parts of Dunfermline and Inverkeithing.
435	Dunino	Dunino and part of Craill.
432	Inverkeithing	Parts of Inverkeithing and Dunfermline.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorna.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
490	Stirling	Stirling, and part of St Ninians.
493	Bonhill	Bonhill, and part of Dumbarton.
496	Dumbarton	Parts of Cardross and Dumbarton.
506	Bellachulish, etc.	Part of Kilmalia.
509	Cumlodden and Minard	Parts of Glassary and Glenaray.
513	Inveraray	Inveraray and part of Glenaray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura. [of Kilchattan and Dalgich.
517	Kilchrenan	(1) Parts of Kilchrenan and Dalavich, and of Glenorchy and Inishail; (2) Rest
526	Lochgiphead	Parts of Glassary and South Knapdale.
529	Muckatrin	Parts of Ardchattan and Muckatrin, and of Glenorchy and Inishail.
535	Tarbert	Parts of Kilmacdonnell and Kilberry, of Saddell and Skipness, and of South
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
542	Kilfinichen and Kilvickieon	Parts of Kilfinichen and Kilvickieon, and of Torosey.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Torosey.
547	Portmahavey	Part of Kilchoman.
548	Salen	Parts of Kilfinichen and Kilmore, and of Torosey.
549	Tobermory	Part of Kilfinichen and Kilmore.
556	Lochranza	Parts of Kilbride and of Kilmore.
557	North Bute	North Bute, and part of Bothesay.
573	Nelliston	(1) Part of Nelliston; (2) Rest of Nelliston and part of Abbey.
573	Palaeley	High, Middle, and Low Church Parishes, and parts of Abbey and of Benfrew.
576	Ardrrossan	(1) Parts of Ardrrossan and of West Kilbride; (2) Rest of Ardrrossan.
578	Ayr	Ayr, and parts of Newton-upon-Ayr, and of St Quivox.
594b	Crosshill	Parts of Kirkmichael, Kirkcaldy, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
595	St Quivox, etc.	Parts of Newton-upon-Ayr, and St Quivox.
626b	Calderhead	Parts of Cambusethan and Shotts.
644	Glasgow	City of Glasgow, including Gorbals and parts of Barony and Govan.
670	Queensferry	Queensferry, and part of Dalmeny.
684	Portobello	Parts of Duddingston and South Leith. (ton, and North Leith and South Leith.
685	Edinburgh	City of Edinburgh, Canongate, and parts of St Cuthberts, Duddingston, Liber-
690	Kirknewton & East Calder	Kirknewton and East Calder, and part of Kirkcaldy.
693	Leith	(1) Parts of Cramond, North Leith, and St Cuthberts; (2) Parts of North
698b	Stobhill	Leith, St Cuthberts, and South Leith.
774a	Caddonfoot	Parts of Borthwick, Cockpen, Newbattle, and Temple.
776b	Ladhope	Parts of Galaahills, Selkirk, Yarrow, Innerleithen, and Stow.
787b	Edgerston	Part of Melrose.
794	Kirktown	Parts of Jedburgh, Oxnam, and Southdean.
818b	Brydekirk	Kirktown and part of Cavers.
852b	Wanlockhead	Parts of Annan, Cummertrees, and Hoddum.
857b	Bargrennan	Part of Sanquhar.
863	Corrochbridge	Parts of Minnigaff (Kirkcudbright) and of Penninghame (Wigtown).
864	Dalbeattie	Parts of Balmacollan, Kirkpatrick-Durham, and Parton.
869	Stranraer	Part of Urr.
		Stranraer, and parts of Inch and Leawick.

LIST of REGISTRATION DISTRICTS which include BURGHS, or TOWNS of 2000 Inhabitants, and upwards, or parts thereof, bearing a different name from the Districts in which they are situated.

No.	Registration Districts.	Burghs.	Towns.
80	Rosemarkie	* Fortrose.	
130	Drafnie		* Lossiemouth.
155a ²	Macduff	Banff.	
164	Rathven		* Buckie.
167	Seafield	Cullen.	
211	Kinnellar	Kintore.	
213	Kintore	Inverurie.	
251 ¹	Banchory-Devenick	Aberdeen.	
253	Benholm	Inverbervie.	
255	Dunnottar		Stonehaven.
258 ¹	Fetteresso		Do.
262	Kinneff, etc.	Inverbervie.	
274	Barry		Carnoustie.
280	Craig	Montrose.	
282 ⁴	St Andrews (Dundee)		Broughty-Ferry.
310	Monifieth		Do.
316	Panbride		Carnoustie.
371	Lecropt		Bridge of Allan.
374	Logie	Stirling.	Do.
385	Muckhart		Dollar.
386a	Muthill		Crieff.
389	Rattray		Blairgowrie.
460	Abdie		Suburban of Newburgh.
405	Ancherderran		Lochgelly.
408	Ballingry		Do.
410	Beath		Cowdenbeath.
431	Forgan		Newport.
436	Kilconquhar	* Earlsferry.	
438	Kilrenny	Anstruther-Easter.	
456	Scoonie		* Leven.
459	Wemyss		Buckhaven.
466	Clackmannan		Alloa.
475	Campsie		* Lennoxtown.
478	Dunipace		Denny.
485	Larbert		Stenhousemuir.
488	St Ninians		Bannockburn.
493	Bonhill		* Alexandria.
494	Cardross		* Renton.
500	New or East Kilpatrick		* Milngavie.
503	Row		* Helensburgh.
523	Kilmore and Kilbride	* Oban.	
559 ³	Abbey		Johnstone.
560	Cathcart		{ Busby.
562	Eastwood		{ Suburban of Glasgow (Crosshill).
564	Greenock, East	Port-Glasgow.	* Pollokshaws and Thornliebank.
571	Mearns		Busby.
576 ¹	Old Ardrossan		Salcoats.
577	Auchinleck		Cumnock.
593	Galston		Newmlins.
597	Kilmarnock		Hurlford.
603	Loudoun		Galston and Newmlins.
611	Riccarton	Kilmarnock.	Hurlford.
613	Sorn		* Catrine.
615	Stevenston		Salcoats.
621	Avondale		* Strathaven. [Possilpark].
622 ¹	Maryhill		Suburban of Glasgow (Maryhill and { Suburban of Glasgow (Shettleston and { part of Tollcross).
622 ²	Shettleston		Tollcross.
622 ²	Shettleston		Stonefield.
624	Blantyre		* Bellshill, Uddingston and Mossend.
625 ¹	Bothwell		* Newmains and Wishaw.
628	Cambusnethan		Motherwell.
639	Dalziel		Busby. [Polmadie].
643.	East Kilbride		Suburban of Glasgow (Govanhill and { Suburban of Glasgow (Govanhill, { Pollockshields, and Strathbungo), { Suburban of Glasgow (Pollockshields, { Strathbungo, and Kinning Park)
644 ¹	Glasgow (Hutchesontown)		Suburban of Glasgow (Govan). [head].
644 ³	Glasgow (Gorbals)		Suburban of Glasgow (Partick and Hill Larkhall and Motherwell.
644 ⁴	Glasgow (Kinning Park)		Suburban of Airdrie.
646 ¹	Govan		Balliestone, and Tollcross.
646 ²	Partick		Coatbridge and Roschall.
647	Hamilton		Do.
651 ²	New Monkland (Landward)		Cambuslang.
652	Old Monkland		Borrowstounness.
	(1) Western District		Broxburn.
	(2) Middle District		* Crofthead.
	(3) Eastern District		Bonnyrigg.
654	Rutherglen	* Musselburgh.	
664	Carriden		Penicuik, Loanhead.
672	Uphall	Galashiels.	Eymouth.
673 ²	Fauldhouse	Hawick.	
676	Cockpen	Annan.	
689	Inveresk		Lockerbie.
691	Lasswade		Castle Douglas.
727	Ayton	* New Galloway.	
776b	Ladhope		Castle Douglas.
810	Wilton	Dumfries.	Newton-Stewart
813b	Brydekirk	Do.	
820	Dryfesdale		
863	Crossmichael		
863	Kells		
869	Kelton		
876	Minnigaff		
880	Terregles		
882	Troqueer		
895	Penninghame		

* The asterisk indicates that the entire Burgh or Town is embraced in the Registration District.

INDEX TO THE DISTRICTS.

*The Figures refer to the Numbers of the Districts in the preceding Tables of Births, Deaths, and Marriages, these being numbered consecutively from 1 to 901.**

Abbey, 559	Ardrossan, 576	Bathgate, 662	Burntisland, 411	Cleish, 490
Abbey St Bath- ans, 726	Arisaig, 505	Beath (Fife), 410	Burra & Quarff, 1	Closeburn, 816
Abbotshall, 399	Armadales, 662	Bedrule, 782	Busby, 571	Clunie (Perth), 339
Abdia, 400	Arngask, 404	Beith (Ayr), 581		Cluny (Aberd'n), 181
Abercorn, 661	Arrochar, 492	Belhelvie, 174		Clyde, 45
Aberdaigie, 323	Ashkirk, 781	Bellie, 126	Cabrach, 177	Cockburnspath, 781
Aberdeen, 168	Assynt, 44	Benbecula, 118	Cadder, 626	Cockpen, 676
Aberdour (Aber- deen), 169	Athelstaneford, 703	Bendochy, 332	Caddonfoot, 774	Colgach, 75
Aberdour (Fife), 401	Auchindoir, 172	Benholm, 253	Cairney, 178	Coldingham, 732
Aberfeldy, 324	Auchinleck, 577	Bernera, 111	Calderehead, 626	Coldstream, 733
Aberfoyle, 825	Auchterarder, 329	Bervie, 254	Callander, 336	Colinton, 677

* The actual number of Districts is 1042—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place common names in the order in which they are pronounced.

R E P O R T .

TO THE MOST HON.

THE MARQUESS OF LOTHIAN, K.T.,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, Etc.,

EDINBURGH, 19th March 1888.

MY LORD,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 and 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1887, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Twenty-third Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1886.

There were but four deaths from Small-pox recorded in the Registers of Eight of the Principal Towns of Scotland during the year under review.

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

I have herewith the honour to submit the Report containing all the usual details regarding the Births, Deaths, and Marriages registered during the year 1887, in the 1,048 Registration Districts of Scotland. Appended to the General Report is the Twenty-third Annual Report on Vaccination, in which is contained all the available information regarding the administration of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1886.

At the middle of the year under consideration, 1887, the estimated population of Scotland was 3,991,499, of these 1,934,215 being males, and 2,057,284 being females.

During the year there were registered 124,375 births, 74,500 deaths, and 24,851 marriages; hence for every hundred of estimated population there were 3·12 births, 1·87 deaths, and 0·62 marriages. On comparing these numbers with the corresponding on Tables I. and II., it is seen that the births show a lower proportion than in any previous year, as

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1887, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Percentage to Population.			Per cent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

1884	3,866,521	129,157	10,459	75,163	26,106	53,989	3·3404	1·9411	0·6752	8·12
1885	3,907,736	126,100	10,680	74,607	25,304	51,493	3·3269	1·9092	0·6774	8·47
1886	3,949,393	127,927	10,503	73,622	24,469	54,305	3·3391	1·8641	0·6196	8·21
1887	3,991,499	124,375	10,365	74,500	24,851	49,875	3·1192	1·8665	0·6226	8·23

also is the case with the deaths, excepting for last year, when it was a trifle less than for the present year, the marriages being in the same category, except that upon this occasion the rate is just over that for last (1886).

The excess of births over deaths is 49,875.

BIRTHS.

124,375 births were registered throughout Scotland during 1887, being at the rate of 3·12 per cent. or 312 for every ten thousand of estimated population; 63,856 of these were males, and 60,519 females. Tables IV. and V. afford information as to the number and proportion of births in the five Groups of Registration Districts into which Scotland is divided. In the Principal Town districts the registered births amount to 50,819, equivalent to 3·25 in every hundred of the inhabitants residing therein, the males numbering 25,985, the females 24,834; in the Large Town districts the total number is 15,027, or in the proportion of 3·38 per cent. of the inhabitants, the males being 7,756, the females 7,271; in the Small Town districts the births are 26,276, or 3·11 per cent. of the population, males 13,491, females 12,785; in the Mainland Rural districts the natal events are 29,100, or 2·88 per cent. of the population, males 14,954, females 14,146; and in the Insular-Rural districts the births are 3,153, or in the ratio of 2·44 per cent. to the inhabitants of the same, males 1,670, females 1,483. From these proportions it is apparent the highest birth-rate was in the Large Town districts, followed by that in the Principal Town districts, Small Town districts, Mainland Rural districts, and lowest in the Insular-Rural districts.

The number of illegitimate births is 10,365, or 8·3 per cent. of the total births. This rate varies considerably in the five districts; ranging from 10·3 per cent. in the Mainland Rural districts, to 6·1 per cent. in the Insular-Rural districts, in the Small Town districts being 8·1 per cent., in the Principal Town districts 7·9 per cent., and in the Large Town districts 6·8 per cent. of the total births.

The relative frequency of illegitimacy in the various geographical divisions into which the whole country is sub-divided, and in the counties separately, is tabulated on Table VI. Among the former, the highest rate is seen to be in the Southern division, where 14·2 per cent. of the total births during the year were illegitimate, followed by the North-Eastern with 13·9 per cent. of like nature, falling to 8·6 per cent. in the East-Midland division, followed by the Northern with 8·4 per cent., the South-Eastern with 7·9 per cent., the North-Western with 6·9 per cent., the South-Western with 6·8 per cent., and the

Of the total 124,375 births during the year, 63,856 were boys, and 60,519 girls, so that for every 100 of the latter sex 105·5 boys were born; this proportion varying in the various Registration districts from 112·6, the highest in the Insular-Rural districts, to 104·6, the lowest in the Principal Town districts.

Births were registered throughout the country in largest numbers during June, when they were at the rate of 366 per diem, followed by May with 359 daily, April with 353, March with 349, January with 338, July with 335, December with 333, February and August each with 332, September and October each with 331, and November with 330, as a daily rate. The average number of births registered day by day was 341, males 175, females 166; the illegitimate being 28 per diem.

DEATHS.

The number of deaths registered throughout Scotland during the year was 74,500, being in the proportion of 1·87 per cent. or 187 in every ten thousand of the estimated population, the lowest rate as yet recorded, except last year when it was 186. The mean average death-rate for the immediately preceding ten years is 198 per ten thousand of the inhabitants.

The highest proportional mortality rate occurs in the Principal Town districts, where it is 209 per ten thousand; in the Large Town districts, it is 200; in the Small Town districts, it is 180; in the Mainland Rural districts, it is 156; and in the Insular-Rural districts 155 in every ten thousand of the population of the same. These, when compared with last year's figures, are apparently somewhat higher in the Large Town districts and Mainland Rural districts, the same in the Small Town districts, and lower in the Principal Town and Insular Rural districts.

The average number of daily deaths was greatest in January and March, each with 229, followed by December with 228, April with 213, May with 209, February with 208, November with 205, June with 193, August with 188, July with 186, October with 183, and September with 176. The average number of deaths registered day by day is 204.

MARRIAGES.

24,851 marriages were registered during 1887, being at the rate of 62 for every ten thousand of the population, almost the same as last year, and with this exception, the lowest since Registration began. The mean for the last ten years is 67.

The marriage rate is highest in the Principal Town districts, where it is 75 per ten thousand of the population, followed by the Large Town districts, where it is 64, falling to 57 in the Small Town districts, to 49 in the Mainland-Rural districts, and to 34 in the Insular-Rural districts.

The largest number of marriages are registered during the month of June, followed in decreasing numbers by January, December, July, November, October, August, April, March and September, each with the same number, February following, and May last.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The information upon which the following sections of the Report are founded is obtained from materials furnished weekly by the Regis-

trars of the following Principal Towns, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Greenock, Leith, Paisley, and Perth, and it is believed the remarks made as to the circumstances of their inhabitants may fairly represent that of those throughout the country at large.

BIRTHS IN THESE EIGHT TOWNS.

The births registered as occurring in the above Towns during the year under review amount to 43,057, being in the proportion of 331 in each ten thousand of their estimated population. The highest rate was that in Paisley, the lowest that in Perth. In the former city the rate is 370 in each ten thousand of its inhabitants, closely followed by Glasgow with a birth-rate of 369, Aberdeen coming next with 325, Leith with 311, Greenock with 299, Dundee with 298, Edinburgh with 292, and Perth with one of 275.

Of the total 43,057 births, 3643, or 8·46 per cent. of the whole are illegitimate. In Aberdeen 10·6 per cent. of the births are of this nature, in Dundee it is 10·4 per cent.; in Perth it is 9·8 per cent.; in Edinburgh it is 8·5 per cent.; in Glasgow it is 8·3 per cent.; in Leith it is 6·6 per cent.; in Paisley it is 6·5 per cent.; and in Greenock it is 5·4 per cent. In the seventh Column of Table VIII. is found the percentage of illegitimate children born during the year to the possible mothers, i.e., the unmarried females and widows between 15 and 45 years of age presumed to be residing in those towns. In Aberdeen there were 2·42 children born out of wedlock to every hundred such possible mothers; in Glasgow 2·32; in Leith 1·93; in Dundee and Perth 1·85; in Greenock 1·61; in Paisley 1·57; and in Edinburgh 1·48.

Of the total children born during the year in the Eight Towns 22,025 were of the male sex, and 21,032 of the female sex, the proportion of boys to girls being accordingly as 104·7 is to 100.

DEATHS IN THESE EIGHT TOWNS.

28,068 deaths were registered as occurring in these Towns during the year, males 13,793, females 14,275, together representing a rate of 216 in every ten thousand of their inhabitants.

Table VIII. shows the death-rate to be in Paisley 260 per ten thousand of its estimated population; in Glasgow 231; in Aberdeen 218; in Dundee 212; in Greenock 198; in Edinburgh 197; in Perth 184; and in Leith 175.

On comparing these ratios with the like for last year (Table IX.), it appears that in all cases excepting Glasgow and Leith the rate for the present year indicates an increase upon that for 1886, and again when a comparison is made between them and the mean death-rates for the last ten years, in all cases excepting Aberdeen and Paisley the rate for the present year is below that of the ten.

Table X. affords some information as to the mortality during the year among young children in these eight towns. In one column is the percentage of deaths among such children,—viz., under five years of age for each town, and in the next is the percentage of deaths among the same when compared with the total mortality. Thus we find that in Glasgow 74 out of every 1000 children under 5 five years of age estimated to be in the city succumbed during the year; in Paisley the

number is 72; in Dundee 71; in Aberdeen 66; in Greenock 63; in Edinburgh 56; in Leith and in Perth 52. Again, from the last column in the table it appears that 47·3 per cent. of the total mortality in Greenock occurred among such young children; in Dundee 44·7 per

cent. suffered likewise; in Leith 44·4 per cent.; in Glasgow 44·0 per cent.; in Aberdeen 42·1 per cent.; in Paisley 37·2 per cent.; in Edinburgh 35·1 per cent.; and in Perth 34·8 per cent.

Tables XI. and XII. present the rate of mortality due to various classes of disease, and to the more important special causes of death in each of the Eight Towns, such rate being calculated in the former Table with reference to the estimated population, and in the latter with reference to the total deaths from all causes, allowance being made in all cases for the causes of death not precisely specified.

The percentage of deaths from Zymotic diseases was 0·361 on the total estimated population of the towns, forming 16·73 per cent. of the total mortality occurring therein. Such causes proved fatal to 0·447 per cent. of the population of Aberdeen; to 0·417 per cent. of that of Dundee; to 0·382 per cent. of that of Paisley; to 0·368 per cent. of that of Perth; to 0·363 per cent. of that of Glasgow; to 0·338 per cent. of that of Greenock; to 0·305 per cent. of that of Edinburgh; and to 0·291 per cent. of that of Leith. The corresponding percentages of deaths from these same diseases to the total deaths are 20·57 in Aberdeen; 20·00 in Perth; 19·68 in Dundee; 17·04 in Greenock; 16·61 in Leith; 15·69 in Glasgow; 15·50 in Edinburgh; and 14·70 in Paisley.

In Glasgow, out of every hundred deaths 5·35 were attributed to Hooping-cough; 2·53 to Measles; 1·98 to Scarlet Fever; 1·89 to Diarrhœa and Dysentery; 1·32 to Diphtheria; and 1·10 to Fevers, of which 0·88 are Typhoid or Enteric, and 0·17 Typhus.

In Edinburgh, the percentage of deaths from Hooping-cough is

TABLE X.—Deaths of Children under Five Years of age in each of Eight of the Principal Towns of Scotland during the Year 1887.

Towns.	Estimated Number of Living Children under 5 years in 1887.	Deaths under 5 years of age.	Percentage of Deaths under 5 years.	Percentage of Deaths under 5 years to the Total Deaths
Glasgow	71,790	5,342	7·44	44·0
Edinburgh	31,724	1,790	5·64	35·1
Dundee	21,100	1,496	7·09	44·7
Aberdeen	16,128	1,073	6·65	42·1
Greenock	11,254	712	6·33	47·3
Leith	10,876	562	5·17	44·4
Paisley	8,182	588	7·19	37·2
Perth	3,992	206	5·16	34·8

5.42; from Scarlet Fever 2.91; from Diarrhœal affections 2.30; from Diphtheria 1.08; from Fevers 1.06, of which 0.78 are Typhoid or Enteric, and 0.22 Typhus; and 0.90 from Measles.

In Dundee, Hooping-cough causes the heaviest mortality of like nature, 6.95 per cent. of the total deaths being due to it; Scarlet Fever causes 4.94 per cent.; Diarrhœa and Dysentery 4.01 per cent.; and Measles 1.26 per cent.

In Aberdeen, Measles is the cause of no less than 10.93 per cent. of the total mortality; Hooping-cough of 3.50 per cent.; Diarrhœal affections of 2.32 per cent.; Scarlet Fever of 1.14 per cent.; Fevers causing 1.02 per cent., of which 0.71 per cent. are Enteric, and 0.20 per cent. Typhus.

In Greenock, the percentage of deaths from Hooping-cough is 9.96; from Diarrhœa 2.27; from Diphtheria 1.27; and from Measles 1.13; Scarlet Fever only causing 0.73 per cent.

In Leith, 6.44 per cent. of all is due to Hooping-cough; 4.53 per cent. to Diarrhœa and Dysentery; 1.27 per cent. to Measles; 1.11 per cent. to Scarlet Fever; 1.03 per cent. to Diphtheria; 0.95 per cent. to Fevers, 0.87 per cent. being Enteric.

In Paisley, Diarrhœal affections and all Fevers each cause 3.87 per cent. of the deaths, 3.11 per cent. of the latter being due to Typhoid

Fever; 0·63 per cent. to Typhus; Hooping-cough causing 3·30 per cent.; Scarlet Fever and Diphtheria each 0·70 per cent.

In Perth, in every hundred deaths, 6·84 are due to Hooping-cough; 3·93 to Scarlet Fever; 3·25 to Diarrhœa; 1·88 to Measles; 0·85 to Fevers, of which 0·68 are Enteric; and 0·34 to Diphtheria.

In the aforesaid Eight Towns collectively, there were registered during the year 1563 deaths from Hooping-cough, being at the rate of 5·60 per cent. of the total mortality, and in the proportion of 12·1 in each ten thousand of their inhabitants. Measles caused 718 deaths, or 2·57 per cent. of the whole mortality, and equal to 5·5 in each ten thousand of population. To Diarrhœa and Dysentery combined are ascribed 709 deaths, 2·54 per cent. of all, and equal to 5·5 per ten thousand. Scarlet Fever caused 639 exits, 2·29 per cent. of all, and 4·9 per ten thousand souls. Diphtheria caused 284 deaths, 1·02 per cent. of all, and 2·2 per ten thousand as before. Fevers caused 321 deaths, or 1·15 per cent. of all the mortality, 2·5 in each ten thousand of the population; of these Typhus caused 62, and Typhoid or Enteric 245 deaths, the former most markedly in Paisley and Greenock, the latter in Glasgow, Leith, and Edinburgh.

Small-pox caused 4 deaths during the year, 2 in Aberdeen, both males between 20 and 60 years of age, one in the month of June, the other in August; and 2 in Perth, both females, one between 5 and 20

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1887, allowing for the Causes of Death not specified.

years, the other between 20 and 60 years of age, both occurring during October.

The total number of deaths from diseases of a Zymotic character is 4670, a considerable increase over the same for last year, when they were 3364, and are the cause of 16·73 per cent. of the total mortality. Syphilis causes 125 deaths, Erysipelas 119, and Puerperal Fever 96.

Diseases of a Constitutional nature caused 4932 deaths, or 17·67 per cent. of all, and equal to 38·2 in every ten thousand of population. Rheumatism and Rheumatic Fever caused 104 deaths. Cancer caused 780 deaths, equal to 2·79 per cent. of all, or 6·0 deaths in every ten thousand of population, and most apparent in Edinburgh, Perth, Leith, and Aberdeen. Gout is the cause of 6 deaths. To Phthisis 2827 deaths are ascribed, 10·13 per cent. of the total mortality, and equivalent to 21·9 deaths per ten thousand of the inhabitants, Glasgow, Paisley, and Dundee showing the largest ratio to estimated population. Tubercular Meningitis caused 431 deaths, Tabes Mesenterica 376, and other forms of Scrofula 267.

From diseases of the Nervous System there are 3213 deaths, or 11·51 per cent. of all, and equal to 24·9 exits in each ten thousand of the population of the above towns. The percentage of deaths from such to those from all causes was 14·26 in Paisley; 12·90 in Greenock; 12·43 in Aberdeen; 11·35 in Glasgow; 11·34 in Edinburgh; 11·28 in Perth; 10·30 in Dundee; and 10·01 in Leith; the like rate per ten thousand of the population being 37·1 in Paisley; 27·0 in Aberdeen; 26·3 in Glasgow; 25·6 in Greenock; 22·3 in Edinburgh; 21·8 in Dundee; 20·8 in Perth; and 17·5 in Leith.

Diseases of the Organs of Circulation account for 2024 deaths, or 7·25 per cent. of all, and 15·7 in each ten thousand of population. Edinburgh shows a percentage on the gross mortality of 9·88; followed by Perth with one of 9·40; Leith 9·30; Dundee 7·28; Aberdeen 6·96; Paisley 6·72; Greenock 6·48; and Glasgow 6·03.

To diseases of the Respiratory Organs (Phthisis excluded), 6213

YEAR . . .	46°·0	74,500	12,000	12,000	46°·2

C

deaths are due, or 22·25 per cent. of the total mortality, and 48·1 in every ten thousand of the inhabitants. Glasgow heads the list of the towns with 24·23 per cent. of its total mortality thus accounted for; followed by Paisley with 23·51 per cent.; Greenock with 22·19 per cent.; Dundee with 21·63 per cent.; Leith with 21·22 per cent.; Aberdeen with 19·86 per cent.; Edinburgh with 19·53 per cent.; and Perth with 18·29 per cent. Bronchitis is the cause of 3286 of the above, *i.e.*, 11·77 per cent. of the whole mortality, or 25·4 in every ten thousand of population, being highest in Paisley and Glasgow, lowest in Greenock and Edinburgh. Pneumonia caused 1956 deaths; Pleurisy 129; and Croup 264.

From diseases of the Organs of Digestion, 1823 deaths occur, being 6·53 per cent. of all, and in the ratio of 14·1 in every ten thousand of population. Enteritis is the cause of 297; Peritonitis of 273; Dentition of 274; and Liver Disease of 297.

Diseases of the Urinary Organs caused 608 exits, 2·18 per cent. of all, or 4·7 in every ten thousand of population. Acute Nephritis caused 127, and Bright's Disease 200 of the above.

Premature Birth accounts for 742 deaths; Congenital Malformations to 126; and Old Age to 1009.

Atrophy and Debility are the causes in 842 cases, and Dropsy in 92, while in 250 the cause of death is so indefinitely defined or unknown to be of no use in computing the tables, &c.

In 847 cases Violence is the cause of death, or 3·03 per cent. of the total mortality, and 6·5 per ten thousand of population. 786 of these deaths are Accidental; 9 Homicidal; and 52 Suicidal. 78 are due to Intemperance.

In the eight towns, 103 persons died during 1887 at ages of 90 or over, 23 being men and 80 women. A female, formerly a servant, and two widows, were 101 years old at death, and a woman (condition not stated), was 102.

MARRIAGES IN THE EIGHT TOWNS.

10,266 marriages were registered in the above during the year, which is at the rate of 79 to every ten thousand of the inhabitants as estimated to reside therein. This rate varies in the different towns; thus it is 86 in like proportion in Glasgow; 83 in Edinburgh; 80 in Paisley; 77 in Aberdeen; 69 in Perth; 67 in Dundee; 65 in Leith; and 62 in Greenock.

WEATHER AND ITS INFLUENCE ON MORTALITY.

The following remarks on the weather of the year are extracted from the Notes of the Astronomer-Royal which appear in the Registrar-General's Quarterly Reports:—

January was on the mean of its whole extent not remarkable in an extreme degree for any given, or ordinarily recognised meteorological

feature, though inclining in a second degree to rather higher mean temperature, less rainfall, more strength of wind, and that chiefly from the W.S.W. Yet the mean temperature was sufficiently low to have caused most of the so-called rainfall to have been in reality snowfall, and to have kept the face of the country white, in place of green, for a considerable number of days, and to have produced no little irritation to citizens on account of the supposed ill-considered rules of municipalities regarding the clearance of pavements and removal of the proceeds.

While amongst the *direct* characteristics of the weather of *February* it may be cited that the mean temperature was nearly 1° above the mean of all former Februarys; the daily range of temperature greater by rather more than 1° ; the depth of rainfall smaller by one-third; the strength of wind less by a tenth; the N. and E. elements of its direction rather less, but the W. greater—there was over-shadowing or over-ruling these features the very notable *indirect* one of the mean barometric pressure being greater than ever recorded before for the February of any year, and greater than the mean of all former Februarys by no less a quantity than 0.331 inch—the barometric range at the same time being not far from the normal.

March, which began with remarkably mild weather, but presently relapsed into cold and snow, proved, on the mean of the whole month,

TABLE XIV.—Meteorology of Scotland for 1887, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1887.

nine-tenths of a degree Fahr. colder than the mean March of all former years; but was 1°·4 above the temperature of last year's March, and its longer continued and far deeper snowfalls.

April was on the whole a very cold, dry, and generally inclement month, these characteristics being accompanied by high barometric pressure, and a barometric range greater than the average; while the mean temperature was less than the average by nearly two degrees.

May was characterised by high barometric pressure and large monthly range, accompanied by small rainfall, and a wind pressure greater than the average by 0·44 lbs. on the square foot, while the mean temperature was nearly an average.

In *June* the greatness of the mean height of the barometer was unprecedented in all previous Junes, excepting that of 1865. The mean temperature, 58°·4, was a far higher figure than the same return for June has reached for more than 20 years past; but the most remarkable feature was the scantiness of the rainfall, joined to the previous dry state of the country.

While the barometric pressure for *July* was near the ordinary quantity, its monthly range was much greater, and with such disturbance, the rainfall was heavier than in any other month of the present year, except January. And yet as a rainfall for July, it was scanty, or almost $\frac{1}{2}$ of an inch less than the mean of all former months of July. At the same time the mean temperature was remarkably high, higher indeed than in any one recorded year, except that of 1868, while the prevailing dryness of the air was shown by a humidity return so small as 76.

August 1887 was a month of remarkable quietude, comfort, and pleasantness, with nothing much out of the way, or differing notably

TABLE XV.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Disease, in Eight of the Principal Towns of Scotland, during each Month of the Year 1887.

from the mean of former years for the same month; the small differences found being generally on the side of what is agreeable and healthy.

With the month of *September* the long drought of the spring and summer of 1887 decidedly closed. The barometric pressure was rather high, but much disturbed; mean temperature, rather low; humidity, abundant; a greater number of rainy days, and greater depth of rainfall than the average; not much wind, and its direction inclining more to E.N.E. than usual.

The weather of *October* was characterised by unusually high barometric pressure and low mean temperature, accompanied by less humidity, a smaller number of rainy days, and a smaller depth of rainfall than the average; while the wind was slightly above the average as to pressure on the square foot, and had a more than usually great preponderance of westerly direction.

The month of *November* was generally disturbed, cold, damp, wet, windy, and with east wind preponderating; but none of these influences prevailed to any remarkable extent.

December was remarkable for low barometric pressure, small barometric range, low mean temperature, small depth of rainfall, and small force of wind, the direction of the winds and the quantities of the other elements being nearly as usual.

By means of Table XIII. a comparison may be made between each month of 1887 and those of the decennial period between 1871 and 1880, as regards the average temperature, and the proportionate mortality experienced throughout Scotland in each month during the above period, and for the year under review. It thus appears that while the mean temperature of the month of January is the same for the year 1887 and

for the ten years, the mean temperatures of February, May, June, and July, are above those of the same months during the longer period. The greatest proportion of monthly deaths occurred during January, March, and December, the three coldest months of the year, the least during September and October. Table XIV. gives information on various points deduced from meteorological observations made at 55 stations throughout Scotland and tabulated month by month. On Table XV. we find among other things the deaths from a few of the more important Miasmatic and other diseases for each month in the Eight Towns, placed for the sake of comparison in conjunction with the varying meteorological conditions for each month.

There were but 4 fatal cases from Small-pox registered in these towns during the year, 1 during June, 1 during August, and 2 during October.

Measles, which had been increasing during the latter months of 1886, continued to cause many deaths until July 1887, when they fell to 14

TABLE XVII. — Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1887, and Proportion at each Age in every Hundred Deaths per Month.

TABLE XVIII. — Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1887.

MONTHS.	Relative Number of Deaths in 1887.					Monthly Deaths proportioned to 1000 per month or 12,000 per annum.
	0-5 Years.	5-20	20-60	60 and above.	Total.	
January	1,084	226	925	565	2,770	1,162
February	1,027	262	690	484	2,463	1,033
March	1,212	253	799	549	2,813	1,180
April	1,089	241	776	427	2,483	1,042
May	1,021	219	660	471	2,371	995
June	955	246	668	401	2,260	948
July	938	209	612	338	2,097	880
August	911	211	606	398	2,126	892
September	871	193	620	365	2,049	859
October	875	208	648	428	2,159	906
November	1,035	235	712	474	2,456	1,030
December	1,055	229	744	529	2,557	1,073
YEAR	11,993	2,732	8,450	5,429	28,604	12,000

for that month. These deaths had reached their acme during March, when 203 were registered, followed by April with 125. Towards the end of the year their numbers again began to run up.

The deaths from Scarlet Fever also appear in largest numbers during the months at the commencement and end of the year, the greatest number being 89 during October, the smallest during May. Hooping-cough is the most fatal of the Miasmatics for the year, causing a number of deaths during each month, varying from 175 in July, and 170 in June, to 97, the lowest, in October. Diphtheria is the cause of more deaths during the present than last year, appearing highest during January, when 35 so succumbed. Fevers caused their greatest number of deaths during the latter months of the year, and Diarrhoeal affections were most fatal during the later months of summer and those of autumn.

Phthisis decidedly caused the largest number of its deaths during the first half of the year, March and April especially. With 297 and 296 deaths respectively, being lowest in August and September, with 191 and 194. Croup on the other hand being just the reverse, the largest number of deaths from it being notified during the later months.

On no class of diseases have climatic influences more effect than upon those affecting the Respiratory Organs, especially Bronchitis and Pneumonia. We have seen the coldest months of the year were the three first and the two last, and it is exactly in those the greatest number of deaths from these affections occurred, the lowest on the other hand during the warmer months of July and August. Much the same may be said of deaths due to Disease of the Heart and Blood-vessels, to those from disease of the Brain, and in the case of the Aged.

Tables XVII. and XVIII. are as usual drawn up to allow the reader to ascertain the relative monthly mortality at different ages among the inhabitants of the aforesaid Towns. Thus with Children (0 to 5 years), the heaviest mortality is during the early and latter two months of the year, the lowest during September and October.

Among Adolescents (aged 5 to 20 years), the deaths were most frequent during February and March, least so during September.

In the case of Adults (20 to 60 years), the deaths occurred in largest numbers during January, March, and April, fewest during July and August.

And lastly, the mortality among the Aged, those over 60 years of age, is greatest during the early and later months of the year, those in fact which were the most inclement, and therefore trying to the old as well as the young.

The general mortality among the total population of the Eight Towns during 1887 was heaviest during March, followed in gradually diminishing numbers by January, December, April, February, November, May, June, October, August, July, and September.

TWENTY-THIRD ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1886.

The Returns of Vaccination for the year 1886 show that of the 127,968 children born in Scotland, 110,864, or 86·634 per cent. were successfully vaccinated. In 2325 cases, or in 1·817 per cent., vaccination was postponed on medical authority, the operation not having been performed at the close of 1887; 201 children, or 0·157 per cent. of the total

TABLE XIX.—Vaccinations in Scotland, 1876-1886, and Proportion to the Births each Year.

Years.		Success-fully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL BIRTHS.

births were pronounced insusceptible of vaccination from some constitutional peculiarity; and 241, or 0·189 per cent., were insusceptible in respect of having been previously successfully vaccinated, but not by persons qualified to give a certificate to that effect. No cases occurred in which the children were insusceptible in consequence of having had Small-pox. 11,282, or 8·816 per cent. of the children born died before vaccination; and in 3055 cases, or in 2·387 per cent. of the whole births, the children were unaccounted for, owing to their removal from the district in which they were born, or from some other cause. The proportion of children successfully vaccinated is the lowest for any year since the Act came into operation in 1864, and is 1·144 below the average for the last ten years; while, on the other hand, the proportion of postponed cases is the greatest that has occurred during any year since 1864, and is 0·594 above the average for the last ten years.

Table XX. gives the particulars relative to vaccination, omitting the children who died before. From this Table it is seen that of 116,686 children who were living at the age of six months, 110,864 or 95·011 per cent. were returned as successfully vaccinated. In 2325 cases, or in 1·993 per cent., vaccination was postponed; 201 children, or in 0·172 per cent., were stated to be constitutionally insusceptible of vaccination; and 241, or 0·206 per cent., were insusceptible in consequence of having previously been successfully vaccinated; while there were none insusceptible from having had Small-pox. In 3055 cases, or in 2·618 per cent., the children were unaccounted for in consequence of having left the district in which they were born, or from some other cause.

TABLE XX.—Vaccinations in Scotland, 1876–1886, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

20-60	3	75.00	1519	41.54	687	12.67
60 and above	-	...	40	1.09	6	0.11
Total	4	100.00	3657	100.00	5415	100.00

In Table XXI. is given the usual account of the deaths from Small-pox in Scotland, from 1855 to 1887, the numbers for the last two years being estimated. From Table XXII. it will be seen that only 4 deaths were caused by Small-pox in 1887, in the Eight Principal Towns of which particulars of the deaths are given in the Monthly Reports. Of these, 2 occurred in Aberdeen, and 2 in Perth.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

STATISTICAL DEPARTMENT,
29th February 1888.

XI.—ABSTRACT of the METEOROLOGY in Eight of the Principal Towns of Scotland during the several Months of the Year 1887.

Mean Height above the Sea-level, 124 feet. Mean Latitude, 56° 12'. Mean West Longitude, 3° 30'.

1887.	BAROMETER.		SELF-REGISTERING THERMOMETER.							HYGROMETER.		DEDUCTIONS from Glaisher's Tables, 2nd Edn.					RAIN.		WINDS.										YEAR
	Mean at 82° and Sea-level.	Monthly Range.	Inch.	Highest in Month.	Lowest in Month.	Mean Temperature.	Monthly Range.	Mean Daily Range.	Greatest Daily Range.	Dry Bulb, or Mean Temp. of Air.	Wet Bulb, or Temp. of Evaporation.	Dew-point Temperature.	Elastic Force of Vapour.	Wt. of Vapour in Cubic Foot of Air.	Humidity, Sat. 100.	Number of Days it fell.	Amount.	Inch.	Number of Days it blew in certain Directions.

Districts as containing Parliamentary and Royal Burghs are printed in capital, thus:—EDINBURGH. Districts containing Towns of 9000 Inhabitants and upwards are printed in small capitals thus:—CARLUKE.
A B A asterisk * is prefixed to those Districts which comprise one or more Parishes or parts of Parishes, and the components of these Districts will be found at page 80.
A dagger † is prefixed to those Districts which consist of only a part of the Parish of the same name.
‡ Vaccination Return not received.

No. of District.	REGISTRATION DISTRICTS.	REVISED POPULATION.		BIRTHS, DEATHS, AND MARRIAGES, 1887.			VACCINATIONS, 1888.						
		Census 1871.	Census 1881.	Births.	Deaths.	Marriages.	Vaccination Postponed.	Insusceptible of Vaccine Disease.			Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.	Total Births for 1888.
								On the ground of previous Successful Vaccination.	In respect of the Children having already had Small-pox.	On the ground of Constitutional Insusceptibility.

APPENDIX.

VACCINATIONS, 1886.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

1. SHETLAND.

12. (1) WALLS. — Measles, Hooping-Cough, and Bronchitis prevalent at time of vaccination.

12. (3) PAPA STOUR. — No Vaccinator visited the District during the year.

12. (4) FOULA. — The Vaccinator has not yet visited the Island.

2. ORKNEY.

14. DEERNES. — Vaccination carefully attended to, often in the face of bad weather and long distance from the Vaccinator's place of residence.

3. CAITHNESS.

43. WICK. — In consequence of the prevalence of Hooping-Cough and Bronchitis during the spring, the number of successful vaccinations has been retarded.

4. SUTHERLAND.

49. (2) KINLOCHBEEVIE. — Hooping-Cough, Measles, and Mumps prevented a number of children from being vaccinated.

55. LAIRG. — Vaccination continues to be well attended to, though for some time the prevalence of Hooping-Cough and Measles caused considerable delay in some cases. All have now, however, been successfully vaccinated.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Insular.

86. (a) BARVAS. — The prevalence of Measles has delayed the progress of vaccination.

87. LOCHS. — The Medical Officer has generally postponed vaccination on account of the prevalence of Measles. It is his custom, in accordance with the official recommendation, to visit every village in the Parish twice every year, in order to have arm to arm vaccination as far as possible.

88. STORNOWAY. — An epidemic of Measles is the cause of a number of postponements, and the scarcity of money among the fishing population prevented some from paying the Vaccinator's fee, and so obtaining Schedule (A.) in cases successfully vaccinated.

6. INVERNESS.

*Mainland.**

95. DAVIOT and DUNLIGHTY. — Neither distance nor weather prevents the new Vaccinator (appointed since last return) from attending to his duties.

Insular.

108. BARRA. — The children indicated in col. 7 (44) are all unvaccinated, none being removed from the District. The Vaccinator says that Measles was so prevalent that vaccination could not be performed.

111. (1) NORTH HARRIS. — Progress of vaccination greatly retarded on account of epidemic of Hooping-Cough and Measles, prevalent for the last four months.

114. (2) RAASAY. — Of the 20 entered in col. 7, a considerable number were vaccinated by the late Dr Ross, who died before granting certificates of successful vaccination.

117. (2) SOUTH SNIZORT. — Several of those entered in col. 7 were vaccinated, but the cases have not been certified, owing to the death of the Medical Officer.

III. NORTH-EASTERN DIVISION.

8. ELGIN (OR MORAY).

131. DUFFUS. — Scarletina and Measles prevalent during the year, hence so many Deaths before vaccination.

9. BANFF.

156. GRANGE. — An unusually large number of children died during 1886, in most cases before vaccination. The principal causes of Death were Pneumonia, Bronchitis, and Measles.

10. ABERDEEN.

168. (2) ABERDEEN (ABERDEEN).—The parent of a child born and registered in 1887 was prosecuted before the Sheriff for refusing to allow his child to be vaccinated, and a conviction followed.

222a. MIDMAR.—Vaccinations for 1886 complete. One postponed from 1884 now successfully vaccinated.

IV. EAST-MIDLAND DIVISION.

14. FIFE.

407. AUCHTERTOOL.—In some cases difficulty is experienced in getting certificates, the Vaccinators refusing to grant them before receiving payment of their fees.

412. CAMERON.—Two families removed from District before their children were vaccinated, but their addresses have been found, and it is understood the children have been vaccinated and that certificates will be received shortly.

V. WEST-MIDLAND DIVISION.

19. ARGYLL.

Insular.

543. KILMENY.—Eruptions about the head and face among children prevalent, and hence the unusually large number of postponements.

551. (2) COLL.—The Vaccinator is about to fix a day, in order to have the number of postponed cases disposed of.

VI. SOUTH-WESTERN DIVISION.

23. LANARK.

647. HAMILTON.—Of the 31 cases entered in col. 7, one is stated to have been vaccinated, but the Vaccinator refuses to give up the certificate unless his fee is paid. Another was a case in which the father was summoned before the Sheriff, on 17th June last, and fined 5s. and expenses, for refusing to have his child vaccinated. He still persists in his refusal.

VII. SOUTH-EASTERN DIVISION.

24. LINLITHGOW.

667. KIRKLISTON.—The strike amongst the Miners in the Niddry and Newliston Districts, and the shifting of the population caused thereby, has caused considerable difficulty in getting in the returns.

669. LIVINGSTONE.—Strikes at the Oilworks account for the 4 cases unaccounted for.

25. EDINBURGH.

691. LASSWADE.—The number unaccounted for is abnormally large, but this is due to the fact that during a recent strike many Miners left the District.

VIII. SOUTHERN DIVISION.

31. DUMFRIES.

823. DURRISDEER.—The entry in col. 7 refers to a child which has been removed to America.

**CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).**

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
15	Eday and Pharay	Part of Stronsay and Eday.
22	North Ronaldsay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
27b	Kelso	Parts of Canisbay and Wick.
68	Applecross	(1) Part of Applecross; (2) Rest of Applecross and part of Gairloch.

Applecross,	52	Bargrennan,	857	Boydie,	149	Carsstairs,	633	Crawford,	635

* The actual number of Districts is 1048—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

Crossmichael, 868	Dunnet, . 36	Forgandenny, 353	Harris, . 111	Kilchoman, 540
Croy & Dalcross, 94	Dunnichen, 283	Fortglen, . 154	Hawick, . 789	Kilchrenan, 517

REPORT.

TO THE MOST HON.

THE MARQUESS OF LOTHIAN, K.T.,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 19th March 1889.

MY LORD,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 and 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1888, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Twenty-fourth Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1887.

No deaths from Small-pox were recorded in the Registers of Eight of the Principal Towns of Scotland during the year under review.

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

REPORT OF THE REGISTRAR-GENERAL

FOR SCOTLAND FOR THE YEAR 1888.

THE following Report contains the usual details regarding the Births, Deaths, and Marriages registered during the year 1888 in the 1048 Registration districts into which Scotland was that year divided. Appended to the General Report is the Twenty-fourth Report on Vaccination, in which is contained all the available information regarding the administration of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1887.

The population of Scotland, estimated to the middle of 1888, was 4,034,156; of this number 1,956,790 being males, and 2,077,366 females.

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1888, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

years, as shown on tables I. and II., it is seen that the birth-rate is below that for last year, which was the lowest of any previously recorded, that the death-rate is the lowest, and that the marriage-rate, which had reached its lowest point in 1886, has since then been gradually increasing.

The excess of births over deaths is 52,064.

BIRTHS.

123,225 births were registered in Scotland during 1888, being at the rate of 3·05 per cent., or 305 for every ten thousand of estimated population; of these 63,156 were males, and 60,069 females. From Tables IV. and V. information may be obtained as to the number and proportion of births in the five groups of Registration districts into which the country is divided. In the Principal Town districts 50,581 births were recorded, being at the rate of 3·18 for every hundred of the estimated population; of these 26,087 were of males, and 24,494 of females; in the Large Town districts the number was 14,997, or 3·32 for every hundred inhabitants, 7730 being of males, and 7267 of females; the number in the Small Town districts was 26,324, or 3·09 per cent. of the population, 13,425 being of males, and 12,899 of females; the number in the Mainland-Rural districts was 28,268, or 2·79 per cent., 14,347 being of males, and 13,921 of females; and in the Insular-Rural districts 3055 births occurred, or 2·36 per cent. of estimated population, 1567 being of males, and 1488 of females. It thus appears that the highest birth-rate occurred in the Large Town districts, followed by the Principal Town, Small Town, and Mainland-Rural districts, and that the lowest rate occurred in the Insular-Rural districts.

Of the 123,225 births 9991, or 8·1 per cent. were illegitimate. In the Mainland-Rural districts the rate was 10·2 per cent.; in the Principal Town districts, 7·8; in the Small Town districts, 7·5; in the Large Town districts, 6·7; and in the Insular-Rural districts, 6·2 per cent.

TABLE III.—Births, Deaths, and Marriages in each of the Eight Divisions of Scotland during the Year 1888, and their Proportion to the Estimated Population.

SOUTH-EASTERN Do.	7·8	Elgin	15·7	Argyll	8·0	Roxburgh	10·4
SOUTHERN Do.	13·2	Banff	15·2	Bute	4·6	Dumfries	14·4
		Aberdeen	13·4	Renfrew	5·2	Kirkcudbright . .	12·7
		Kincardine . . .	13·6	Ayr	7·5	Wigtown	15·3

6·5; and the West-Midland, 6·0 per cent. In the counties the rate varied from 3·4 per cent. in Shetland to 15·7 per cent. in Elgin. In 13 counties the rate was over 10·0 per cent.; that in Aberdeen and Kinross being 13·4; Kincardine, 13·6; Dumfries, 14·4; Banff 15·2; Wigtown, 15·3; and Elgin, 15·7 per cent.

Of the whole 123,225 births, 63,156 were of males, and 60,069 of females, being at the rate of 105·1 boys for every 100 girls. The highest proportion of male to female births occurred in the Principal Town districts, and the lowest in the Mainland-Rural.

Births were most numerous in June, when they were registered at the rate of 357 daily, May coming next with 354 daily, October with 350 daily, April with 348 daily, July with 337 daily, March with 336, February with 335, January with 333, August with 329, December with 327; the lowest rates being 320 daily in November, and 314 daily in September. The daily average number of births registered during the year was 337, males 173, females 164. The average number of illegitimate births was 27 per diem.

DEATHS.

71,161 deaths were registered in Scotland during 1888, being in the proportion of 176 for every ten thousand of estimated population, or 1·76 per cent. This is the lowest death-rate for any year since 1855, when the present registration system commenced.

Table V. shows the highest mortality to have occurred in the Principal Town districts, where it was 192 per ten thousand of the estimated population; the rate in the Large Town districts was 186; in the Small Town districts, 168; in the Insular-Rural districts, 158; and in the Mainland-Rural districts, 157. These numbers, when compared with those for last year, show a lower rate of mortality in the Town districts and a slightly higher in the Rural districts.

The average number of daily deaths was highest during January, being for that month 234, for March 227, February 225, April 213, May 195, December 192, October 190, June 187, November 184, July 166, August 163, and September 158. The daily average for the year was 194.

MARRIAGES.

The number of marriages registered during the year was 25,281, being at the rate of 63 for every ten thousand of estimated population. This rate shows a slight increase on that for the last two years, although it is still below the average for the last ten.

The marriage rate was highest in the Principal Town districts, where it was 78 for every ten thousand of the estimated population, followed by the Large Town districts with 65 per ten thousand, the Small Town districts with 57, the Mainland-Rural districts with 47, the Insular-Rural districts coming last with 32.

Marriages occurred at the rate of 114 daily during June, 108 daily during December, 101 during January, 91 during July, 69 during November, 65 during April, 56 during October, 54 during September, 48 during February, 47 during August, 46 during March, and at the rate of 31 daily during May.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The remarks in the following sections of this Report are derived from information furnished in weekly returns by the Registrars of the following Principal Towns, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Greenock, Leith, Paisley, and Perth, and it is believed that facts relating to them apply also to a considerable extent to the surrounding districts.

BIRTHS IN THESE EIGHT TOWNS.

The number of births registered in these Towns during the year was 42,853, being at the rate of 326 for every ten thousand of estimated population. The highest birth-rate occurred in Glasgow, viz., 367 per ten thousand of its inhabitants; the next in Paisley, 354; Aberdeen, 322; Leith, 313; Greenock, 287; Edinburgh and Dundee each 285; and in Perth, 283.

Of the whole 42,853 births, 3576, or 8·34 per cent. were illegitimate. In Dundee, 10·5 per cent. of the births were illegitimate; in Aberdeen, 10·0; in Perth, 9·7; in Edinburgh, 8·7; in Glasgow, 8·2; in Leith, 6·3; in Paisley, 5·8; and in Greenock, 5·6 per cent. Table VIII. shows the percentage of illegitimate children born during the year to the estimated number of possible mothers, *i.e.*, the unmarried females and widows between the ages of 15 and 45 years living in these towns. In Glasgow, 2·27 illegitimate children were born for every hundred of possible mothers; in Aberdeen, 2·26; in Perth, 1·90; in Leith, 1·85; in Dundee, 1·77; in Greenock, 1·60; in Edinburgh, 1·48; and in Paisley, 1·35 per cent.

Of the total number of children born during the year in these eight towns, 22,090 were males, and 20,763 females, the proportion of boys to girls being 106·4 to 100.

DEATHS IN THESE EIGHT TOWNS.

26,134 deaths were registered in these towns during 1888, of whom 12,932 were males, and 13,202 females; the total rate of mortality being 199 for every ten thousand of the estimated population.

From Table VIII. it will be seen that the death-rate in Paisley was 258 per ten thousand of its estimated population; in Glasgow 222; in Dundee 184; in Aberdeen 183; in Perth 181; in Edinburgh 180; in Greenock 160; and in Leith 158.

If these rates are compared with those corresponding for 1887 (Table IX.), it will be found that a decrease in the mortality has occurred in all the towns; and, when compared with the mean death-rates for the last ten years, it is seen that a decrease has occurred in all the towns except Paisley.

From Table X. may be gathered information relating to the mortality among children under five years of age in each of these eight towns. In one column is shown the percentage of deaths of children under five years of age to the total number living at that age, and in another the percentage

among the same children to the total mortality. In Paisley, out of every thousand children estimated to be living there, 82 died during the year; in Glasgow the proportion was 66; in Dundee 53; in Edinburgh 49; in Aberdeen, in Greenock, and in Leith, 42; and in Perth 37. It also appears from this table, that of the total deaths in Paisley, 42·3 per cent. occurred among children under five years of age; in Glasgow 40·7; in Leith 40·1; in Greenock 39·4; in Dundee 38·2; in Edinburgh 33·4; in Aberdeen 31·4; and in Perth 25·1 per cent.

Information in regard to the more important causes of the deaths that were registered in each of the eight towns is given in Tables XI. and XII. From these it appears that Zymotic Diseases proved fatal to 0·242 per cent. of the total estimated population, or 12·18 per cent. of the specified deaths. This class of diseases proved fatal to 0·572 per cent. of the population of Paisley; to 0·293 of that of Glasgow; to 0·206 of that of Greenock; to 0·196 of that of Leith; to 0·186 of that of Perth; to 0·173 of that of Dundee; to 0·172 of that of Edinburgh; and to 0·163 of that of Aberdeen. The percentage of deaths from these diseases to the total deaths was 22·17 in Paisley; 13·20 in Glasgow; 12·91 in Greenock; 12·41 in Leith; 10·27 in Perth; 9·55 in Edinburgh; 9·38 in Dundee; and 8·90 in Aberdeen.

In Glasgow 3·73 per cent. of the specified deaths were from Hooping Cough; 2·05 from Diarrhœa and Dysentery; 1·86 from Measles; 1·45 from Diphtheria; 1·42 from Scarlet Fever; and 0·89 from Fevers, of which 0·63 were Typhoid or Enteric, and 0·16 Typhus.

In Edinburgh the percentage from Measles was 2·14; from Diarrhœa and Dysentery 1·55; from Hooping Cough, and from Diphtheria, each 1·48; and from Fevers 0·80, of which 0·63 were Typhoid or Enteric, and 0·11 Typhus.

In Dundee the deaths from Diarrhœa and Dysentery amounted to 3·32 per cent. of the whole; Scarlet Fever to 1·22; Diphtheria to 0·88; and Fevers 0·81, of which 0·61 were Enteric, and 0·20 Typhus.

In Aberdeen Hooping Cough caused 3·18 per cent. of the mortality; Diarrhœa and Dysentery 2·63; and Fevers 0·74, of which 0·60 were Enteric, and 0·14 Typhus.

In Greenock 3·51 per cent. of the deaths were attributed to Measles; 2·21 to Diarrhœa and Dysentery; 2·21 to Diphtheria; 1·22 to Hooping Cough; 1·39 to Fevers, 0·74 being Enteric, and 0·65 Typhus; and 1·14 to Scarlet Fever.

In Leith 3·51 per cent. of the deaths were ascribed to Measles; 2·31 to Hooping Cough; 1·54 to Diarrhœa and Dysentery; 1·28 to Fevers, 1·11 of which were Enteric, and 0·17 Typhus; and 1·11 to Diphtheria.

In Paisley no less than 11·34 per cent. of the deaths were from Measles; 2·64 from Diarrhœa and Dysentery; 2·20 from Hooping Cough; 2·20 from Fevers, 1·45 being Enteric, and 0·63 Typhus; and 1·45 from Diphtheria.

In Perth Scarlet Fever caused 3·25 per cent. of the deaths; Diphtheria, Diarrhœa and Dysentery, and Fevers, each 1·37; of the latter, 1·20 being Enteric, and 0·17 Typhus.

In the whole of these Eight Towns there were registered during the year, 668 deaths from Hooping Cough, being 2·57 per cent. of the whole specified deaths, or 5·1 per ten thousand of the estimated population. From Measles there resulted 604 deaths, being at the rate of 2·32 per cent. of the whole, or 4·6 per ten thousand of estimated population. Diarrhœa and Dysentery caused 561 deaths, being 2·16 per cent. of the whole, or 4·3 per

ten thousand inhabitants. Diphtheria caused 343 deaths, being 1·32 per cent. of the whole, or 2·6 per ten thousand inhabitants. Scarlet Fever caused 276, being 1·06 per cent. of the whole deaths, or 2·1 per ten thousand of population. Fevers caused 256 deaths, being 0·98 per cent. of the whole, or 1·9 per ten thousand of the population; of these Typhus caused 54, and Typhoid or Enteric 186 deaths; the highest proportion from the former occurring in Greenock and Paisley, and from the latter in Leith, Paisley, and Perth.

No deaths were registered from Smallpox during the year.

Zymotic Diseases caused 3165 deaths, being a considerable decrease on the number for the preceding year. Of these 126 were from Syphilis, 125 from Erysipelas, and 110 from Puerperal Fever.

Constitutional Diseases caused 4912 deaths, or 18·90 per cent. of the whole, the proportion to every ten thousand of the estimated population being 37·6. To Rheumatism and Rheumatic Fever were attributed 167 deaths. Cancer was the cause of 826 deaths, forming 3·18 per cent. of the whole, or 6·3 in every ten thousand of the population, and was most fatal in Edinburgh, Aberdeen, Leith, and Perth. Five deaths were ascribed to Gout. Phthisis was stated to have caused 2712 deaths, equal to 10·43 per cent. of the mortality, or 20·7 per ten thousand of estimated population, Glasgow, Paisley, and Dundee, showing the highest proportion to the population. Tubercular Meningitis caused 452 deaths, *Tabes Mesenterica* 371, and other forms of *Scrofula* 227.

TABLE IX.—Percentage of Deaths to the Population in each of Eight of the Principal Towns of Scotland during each of the Years 1878–1888.

TABLE X.—Deaths of Children under Five Years of age in each of Eight of the Principal Towns of Scotland during the Year 1888.

Towns.	Estimated Number of Living Children under 5 years in 1885.	Deaths under 5 years of age.	Percentage of Deaths under 5 years.	Percentage of Deaths under 5 years to the Total Deaths
Glasgow	72,071	4,750	6·59	40·7
Edinburgh	32,227	1,583	4·91	33·4
Dundee	21,452	1,181	5·27	38·2
Aberdeen	16,414	684	4·17	31·4
Greenock	11,420	485	4·25	39·4
Leith	11,180	471	4·21	40·1
Paisley	8,299	674	8·19	42·3
Perth	4,041	148	3·66	25·1

From Diseases of the Nervous System 3185 deaths occurred, constituting 12·25 per cent. of the total number, or 24·4 per ten thousand inhabitants. The percentage of these diseases to the total in the several towns was:—In Perth 14·38; in Greenock 13·89; in Aberdeen 13·75; in Glasgow 12·24; in Dundee 12·15; in Edinburgh 11·85; in Paisley 10·96; and in Leith 10·53; the proportion per ten thousand of the population being 28·3 in Paisley; 27·2 in Glasgow; 26·1 in Perth; 25·1 in Aberdeen; 22·4 in Dundee; 22·2 in Greenock; 21·4 in Edinburgh; and 16·6 in Leith.

To Diseases of the Organs of Circulation were attributed 2183 deaths, the percentage to the whole being 8·40, and the rate per ten thousand of the population 16·7. It appears that in Aberdeen the proportion of deaths from this class of diseases to the total deaths was 11·49 per cent.; in Leith 11·04; in Edinburgh 10·61; in Perth 10·27; in Dundee 8·09; in Greenock 7·52; in Glasgow 6·94; and in Paisley 6·86 per cent.

Diseases of the Respiratory Organs (not including Phthisis) caused 5679 deaths, or 21·85 per cent. of the total, the proportion to the population being 43·4 per ten thousand. The greatest proportion of deaths from these diseases was in Dundee, equal to 25·32 per cent.; Glasgow following with 22·92; Greenock with 21·73; Paisley with 20·53; Aberdeen with 19·74;

TABLE XI.—Percentage of Deaths from different Diseases to the Population in each of Eight of the Principal Towns of Scotland during the Year 1868, allowing for the Causes not specified.

Edinburgh with 19·58; Perth with 19·35; and Leith with 18·75. Of these deaths, 2890 were attributed to Bronchitis, the proportion to the whole mortality being 11·12 per cent., and to the population 22·1 per ten thousand; the highest rates from this disease occurring in Glasgow, Dundee, Aberdeen, and Paisley. Pneumonia caused 1884 deaths; Croup 233; and Pleurisy 119.

From diseases of the Organs of Digestion there resulted 1776 deaths, being 6·83 per cent. of the whole, or 13·6 per ten thousand of the population. Enteritis was stated to have caused 262 deaths; Peritonitis, 290; Dentition, 234; and Liver Disease, 320.

To diseases of the Urinary Organs were ascribed 646 deaths, or 2·49 per cent of the whole, and 4·9 for every ten thousand of the population. Acute Nephritis caused 143 deaths, and Brights Disease 250.

To Premature Birth were attributed 774 deaths; to Congenital Malformations, 131; and to Old Age, 1008.

Atrophy and Debility proved fatal in 859 cases, and Dropsy in 57; while in 234 cases the cause of death was ill defined, or else not stated.

The deaths from Violence amounted to 902, constituting 3·47 per cent. of the whole, or 6·9 per ten thousand of the inhabitants. Of these 849 were accidental, 6 homicidal, and 47 suicidal, 79 deaths were attributed to Intemperance.

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1888, allowing for the Causes of Death not specified.

DISEASES CAUSING DEATH.	Total Eight Towns.	Glasgow.	Edinburgh.	Dundee.	Aberdeen.	Greenock.	Leith.	Paisley.	Perth.

14 men and 64 women were aged 90 years and above; the eldest (a male and a female) had each reached the age of 98 years.

MARRIAGES IN EIGHT TOWNS.

In 1888 there was 10782 Marriages recorded, being at the rate of 82 for every ten thousand of the estimated population. In Glasgow 92 Marriages occurred for every ten thousand of the population; in Edinburgh, 82; in Paisley, 78; in Aberdeen, 77; in Leith, 75; in Dundee, 70; in Perth, 68; and in Greenock, 61.

WEATHER AND ITS INFLUENCE ON MORTALITY.

The following remarks on the weather of the year are extracted from the Notes of the Astronomer-Royal, which appear in the Registrar-General's Quarterly Reports:—

January enjoyed the characteristics of a mild, dry winter month. The mean barometric height had not been so great since 1882, and the monthly range was under the average. The direction of the wind was normal or W.S.W., and its force on the square foot less by one-fourth.

The general characteristics of February were a high and rather steadily high barometric pressure; much north-easterly direction of the wind, but with no great force; extremely low temperature, and very little rain-fall.

March was remarkable generally for low barometric pressure, large barometric monthly range, very low mean temperature, large rain-fall (if correctly interpreted out of the depth and height of snow-fall and snow-drift), and an unusually large proportion of easterly direction in the wind.

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1888, compared with the Mean of the Ten Years 1871-1880.

MONTHS.	YEAR 1888.			1871-1880.	
	Mean Temperature.	Actual Deaths.	Proportion to 12,000 per annum or 1000 per month.	Monthly Proportion of Deaths.	Mean Temperature.
January . . .	38°·5	7,253	1,223	1,154	37°·5
February . . .	35°·3	6,530	1,101	1,061	38°·6
March	35°·7	7,041	1,187	1,138	40°·2
April	42°·1	6,395	1,078	1,064	44°·2
May	48°·3	6,036	1,018	1,040	48°·4
June	52°·0	5,617	947	939	54°·7
July	53°·7	5,146	868	921	57°·8
August	54°·5	4,047	851	893	57°·3
September . . .	51°·7	4,726	797	834	52°·6
October	46°·8	5,898	995	885	46°·5
November . . .	42°·9	5,532	933	949	40°·2
December . . .	40°·5	5,940	1,002	1,122	37°·0
YEAR	45°·2	71,161	12,000	12,000	46°·2

The weather in April was of a nearly average and ordinary kind for the month, and if in the matter of mean temperature it was so much as $1^{\circ}8$ below the average, that is so much less than (or about half) the defect in that direction of the previous month of March to its predecessors, this April was felt as a great relief after a very severe and long continued winter.

In May the mean barometric pressure was close to the average, accompanied, however, by greatly increased monthly range thereof, indicative of the several squally periods which characterised the weather of the month, the pressure of the wind being also above the average, and its direction rather oftener from south and west than usual.

June was quite phenomenal beyond all precedent for its large amount of east wind, and the coldness of it. For the quantity or prevalence of that direction of the wind no June of any former year came nearer than 13 to the past June's 17; and for its coldness no year's June since 1862 came at all near it; while even 1862 was not so low by $0^{\circ}7$.

The characteristics of July were low barometric pressure, distressingly low mean temperature, lamentable excess of humidity, small daily range of temperature, indicating very little sunshine and overpowering rain, both in the number of its days of falling and the depth of rain fallen; while the direction of the wind was to a most abnormal extent for the season from the east.

TABLE XIV.—Meteorology of Scotland for 1888, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1888.

The chief characteristics of the Meteorology of August were large barometric range, low mean temperature, and small rain-fall. In other particulars the month was nearly normal.

The most remarkable features of the Meteorology of September were the very high barometric pressure and small fluctuations thereof, a rain-fall less than one-third of the average, and, as was to be expected from the small barometric range, a pressure of wind little more than half the normal amount, while the mean temperature was below the average, but only to the extent of 1°.

The chief characteristics of the Meteorology of October were high barometric pressure, with small barometric range, a mean temperature greater than the average, and a rain-fall rather less than half the average amount.

November was a wet and windy month, with high mean temperature, low barometric pressure, and a remarkably small barometric range, the latter being less than that of any November since 1876 while the direction of the wind was easterly more frequently than usual, especially in the first half of the month.

The weather of December was mild and calm, and on the whole dry, with nearly an average barometric pressure, and a barometric range smaller than usual for this month.

A comparison, by means of Table XIII. may be made between each month of 1888 and those of the decennial period between 1871 and 1880, as regards the average mean temperature and proportionate mortality. From this Table it appears that the mean temperatures of January, November, and December were above those of the same months for the decennial period, the months of February, March, April, June, July, August, and September being below, and May and October nearly the same. The greatest

proportionate mortality occurred during the coldest months, viz., January, February, and March, and the least during August and September. Further information as to the Meteorology of Scotland, deduced from observations at 55 Stations of the Meteorological Society, is given in Table XIV.

In Table XV. will be found a statement of the principal meteorological phenomena during each month in Eight of the Principal Towns in connection with deaths from certain diseases, and also the daily deaths. The daily deaths were most numerous in January, and became gradually less, month by month, until the lowest number was reached in September, after which there was an increase till the close of the year.

November	850	198	629	366	2,043	41.6	9.7	30.8	17.9	100
December	896	190	691	464	2,240	40.0	8.5	30.8	20.7	100
YEAR	9,926	2,431	8,296	5,481	26,134	38.0	9.3	31.7	21.0	100

The number of deaths from Measles was lowest during August, when 21 were recorded. An increase occurred each month until November, when there were 104 deaths, but in December the number had fallen to 53.

The largest number of deaths from Scarlatina occurred in November, when 39 were registered, the smallest during July, the number for that month being 10. The mortality from Hooping Cough was greatest in January (114), falling each month until September, when 20 deaths were recorded. Diphtheria shows a greater mortality this year than during 1887; it was most fatal at the beginning and end of the year. Deaths from Fevers varied considerably during the year, the highest number was 31 in November. Diarrhoeal affections were most prevalent in August, September, and October.

Deaths from Phthisis were most numerous in March, April, and May, and least so in August, September, and October. The months in which most deaths resulted from Croup were January, November, and December.

The effects of low temperature on diseases of the Respiratory Organs, especially Bronchitis, and Pneumonia, is again observable. In January, February, and March, the only three months in which the mean temperature was below 40°, we find the greatest number of deaths from these diseases occurred; while in August, when the highest mean temperature was reached, the number of these deaths was least. Diseases of the Respiratory Organs constituted 26·5 per cent. of all deaths in January, but only 15·4 per cent. of all in August.

Diseases of the Heart and Blood-vessels proved most fatal during the colder months, and the same remark also applies to diseases of the Brain, and in the case of old people.

Tables XVII. and XVIII. show the relative monthly mortality divided into four classes according to age in the before mentioned Principal Towns.

Children under five years of age died in largest proportion in January, and smallest in July and September.

The greatest proportion of deaths of persons between five and twenty years of age occurred in March and May, and the least in August and September.

TABLE XVIII.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1888.

MONTHS.	Relative Number of Deaths in 1888.					Monthly Deaths proportioned to 1000 per month or 12,000 per annum.
	0-5 Years.	5-20	20-60	60 and above.	Total.

YEAR	10,087	2,472	8,437	5,572	26,568	12,000

Among persons between twenty and sixty years of age the greatest mortality occurred in January, gradually diminishing, till the minimum was reached in August, there being an increase towards the end of the year.

Deaths among the Aged,—persons of sixty years and upwards were most numerous in January, declining each month till August, after which the numbers again increased till the close of the year.

The deaths among the inhabitants of the eight towns during the year were most frequent during January, and less so in the other months in the following order:—February, March, April, May, October and December the same, November, June, July, August, and September.

TWENTY-FOURTH ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1887.

From the Vaccination returns for the year 1887 it appears that of the 124,467 children born in Scotland, 107,077, or 86·028 per cent. were successfully vaccinated. In 2465 cases, or 1·980 per cent. of the births, the

performance of the operation was postponed on medical authority; 236 children, or 0·190 per cent. of the whole were found to be insusceptible of vaccination from some constitutional peculiarity; and 373, or 0·300 per cent., were insusceptible in respect of having been previously successfully vaccinated, although not by persons qualified to give a certificate to that effect. No cases in which children were insusceptible in consequence of having had Small-pox occurred. 11,269, or 9·054 per cent., of the children born died before vaccination; and 3047 children, or 2·448 per cent., of all births, were removed from the districts in which they had been born, or were otherwise unaccounted for. The proportion of cases successfully vaccinated is 1·589 per cent. below the average for the last ten years, and the proportion of postponed cases 0·657 per cent. above the average for the same period.

In Table XX. is given the proportion of the vaccinated to the children living at the age of six months, the particulars relating to the children that died unvaccinated being omitted. It will be observed from this Table that of 113,198 children who were living at the age of six months, 107,077, or 94·593 were successfully vaccinated. In 2465 cases, or in 2·178 per cent., vaccination was postponed. In 236 cases, or 0·208 per cent. the children were stated to be constitutionally insusceptible; and 373 children, or 0·329 per cent., were insusceptible in consequence of having previously been successfully vaccinated; while none were insusceptible from having

XI.—ABSTRACT of the METEOROLOGY in Eight of the Principal Towns of Scotland during the several Months of the Year 1888.

Mean Height above the Sea-level, 136 feet. Mean Latitude, 56° 12'. Mean West Longitude, 3° 30'.

1888.	BAROMETER.		SELF-REGISTERING THERMOMETER.							HYGROMETER.		DEDUCTIONS from Glaisher's Tables, 2nd Edit.			RAIN.		WINDS.										Mean Pressure on square foot.
	Mean at 32° and Sea-level.	Monthly Range.	Highest in Month.	Lowest in Month.	Mean Temperature.	Monthly Range.	Mean Daily Range.	Greatest Daily Range.	Dry Bulb, or Mean Temp. of Air.	Wet Bulb, or Temp. of Evaporation.	Dew-point Temperature.	Elastic Force of Vapour.	Wt. of Vapour in Cubic Foot of Air.	Humidity, Sat. 100.	Number of Days it fell.	Amount.	Number of Days it blew in certain Directions.

APPENDIX.

VACCINATIONS, 1887.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

59. (a) AVOCH.—The habit of delaying vaccination seems to have got a strong hold of the people. 12 notices to parents have just been sent out.

74. LOCHALSH.—The two unaccounted for will no doubt yet be vaccinated, as they are still in the parish.

75. (1) LOCHBROOM.—Most of those entered in Col. seven will yet be vaccinated, being cases of children whose period of postponement has expired, and who await the return of the vaccinator.

Insular.

87. LOCHS.—A severe epidemic of Measles passed over the parish, and the children were in such a weakly state that none were in a condition to be vaccinated until the beginning of autumn. Since then the Medical Officer has vaccinated as many as were fit.

6. INVERNESS.

Mainland.

97. (3) NORTH MORAR.—The Registrar has reason to believe that nearly all the children were successfully vaccinated last summer, although he has not been furnished with certificates, on account of the vaccinator for the district having been unfortunately drowned last August. A successor has been appointed who will furnish the certificates as soon as possible.

Insular.

110. (1) DUNRINISH.—That there are 21 in Col. seven is accounted for by the fact that Hooping Cough and Measles were prevalent, and children could not be vaccinated.

III. NORTH-EASTERN DIVISION.

9. BANFF

153. (2) PORTSOY.—The entry in Col. seven is of a child whose parents removed from the district, and are supposed to be in America. Enquiries are being made with the view of tracing them.

10. ABERDEEN.

168. (2) ABERDEEN.—Column seven includes two cases in which the parents refuse to vaccinate.

168. (3) WOODSIDE.—The case unaccounted for is one in which the parent refused to allow vaccination.

199. GLASS.—The only child whose vaccination is unaccounted for is that of a travelling tinker who left the district about Whitsunday 1888, and has not been seen in it since.

11. KINCARDINE.

257. FETTERCAIRN.—Of the children whose births were registered in 1887, one-fourth died before vaccination. Several of these were twins, and others were victims of Measles and Hooping-Cough.

IV. EAST-MIDLAND DIVISION.

12. FORFAR.

288. FORFAR.—An epidemic of Measles accompanied with Bronchitis caused a number of the Deaths before vaccination.

V. WEST-MIDLAND DIVISION.

19. ARGYLL.

Mainland.

505. (3) WESTERN DISTRICT OF ARDNAMURCHAN.—The prevalence of an epidemic of Hooping-Cough in spring of 1888, and an epidemic of Measles in December, operated against the carrying out of the provisions of the Vaccination Act. These causes together account for the abnormal number of 'Vaccination still postponed.

511. GLASSARY.—The entry in col. seven is that of the child of a tinker. The parents have not been seen in the district since the child was registered.

20. BUTE.

553. (2) KILBRIDE.—Hooping-Cough prevailed during the summer, and a good many vaccinations were postponed in consequence.

VI. SOUTH-WESTERN DIVISION.

21. RENFREW.

560. CATHCART.—In one of the two cases in Col. seven the parent refuses to allow vaccination, and the Local Authority intend to prosecute. Vaccination on the whole better attended to than it was some years ago.

22. Ayr.

590. (2) TROON.—There is still some difficulty in getting vaccination certificates in within the prescribed time. If the Vaccinator were paid a small fee for granting such, an improvement would be effected.

597. KILMARNOCK.—The chief difficulty is with those parents who are migratory in their habits.

607. MUIRKIRK.—There is considerable difficulty in getting certificates in cases of the very poor of the working classes. The children are regularly vaccinated, but Medical Practitioners refuse to give certificates until their fees are paid.

23. LANARK.

644. (2) CAMLACHIE (GLASGOW).—145 of the children born were vaccinated by Midwives, certificates being granted in the form of Schedule C.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

674. BORTHWICK.—Of the four cases in Col. seven, two were successfully vaccinated, and most likely all. It is presumed that certificates are withheld by the Vaccinator on account of non-payment of fees.

686. FALA AND SOUTHA.—Parents seem anxious to get their children vaccinated, but sometimes, especially in winter, owing to long distance from the doctor and blocked roads, vaccination is delayed beyond six months.

698b. STOBHILL.—Of the five entered in Col. seven, three have left for America.

701. WEST CALDER.—A great number of removals caused by the stoppage of shale pits, necessitating the removal of miners from the parish.

VIII. SOUTHERN DIVISION.

30. ROXBURGH.

807. SPROUSTON.—A scarcity of vaccine matter is reported to be the cause of so many cases of postponed vaccination.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
14	Deerness	Part of St Andrews.
15	Eday and Pharay	Part of Stronsay and Eday.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
27b	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Rest of Applecross and part of Gairloch.

Ardnamurchan, 505		Buchanan, 474	Clatt, 180	Crosshill, 584
Ardoch, 328		Buckle and Preston, 728	Cleish, 460	

* The actual number of Districts is 1048—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

Crossmichael, 863	Dunnet, 36	Forgandenny, 353	Harry, 18	Kilbueho, &c., 763
Croy & Dalross, 94	Dunnichen, 283	Forglen, 154	Harris, 111	Kilcalmonell, 516
